NEW YORK TIMES BESTSELLER • A modern American epic set against the panorama of contemporary politics and culture—a hurtling, page-turning mystery that is equal parts *The Great Gatsby* and *The Bonfire of the Vanities* ONE OF THE BEST BOOKS OF THE YEAR: NPR, PBS, Harper's Bazaar, Esquire, Financial Times, The Times of India On the day of Barack Obama's inauguration, an enigmatic billionaire from foreign shores takes up residence in the architectural jewel of "the Gardens," a cloistered community in New York's Greenwich Village. The neighborhood is a bubble within a bubble, and the residents are immediately intrigued by the eccentric newcomer and his family. Along with his improbable name, untraceable accent, and unmistakable whiff of danger, Nero Golden has brought along his three adult sons: agoraphobic, alcoholic Petya, a brilliant recluse with a tortured mind; Apu, the flamboyant artist, sexually and spiritually omnivorous, famous on twenty blocks; and D, at twenty-two the baby of the family, harboring an explosive secret even from himself. There is no mother, no wife; at least not until Vasilisa, a sleek Russian expat, snags the septuagenarian Nero, becoming the queen to his king—a queen in want of an heir. Our guide to the Golden's world is their neighbor René, an ambitious young filmmaker. Researching a movie about the Goldenes, he ingratiates himself into their household. Seduced by their mystique, he is inevitably implicated in their quarrels, their infidelities, and, indeed, their crimes. Meanwhile, like a bad joke, a certain comic-book villain embarks upon a crass presidential run that turns New York upside-down. Set against the strange and exuberant backdrop of current American culture and politics, *The Golden House* also marks Salman Rushdie's triumphant and exciting return to realism. The result is a modern epic of love and terrorism, loss and reinvention—a powerful, timely story told with the daring and panache that make Salman Rushdie a force of light in our dark new age.

On 26th July 2015, Chris Froome entered the record books. He won cycling's ultimate race - the Tour de France - for the second time. Taking a double Yellow Jersey was a staggering achievement. This memoir shows just how remarkable it was, given the uphill struggle Froome faced. Growing up in Kenya, biking down mile after mile of dusty road, and staying in a humble tin hut, he developed a fierce passion and determination to win. The road to Europe was long, gruelling and filled with setbacks - but it prepared him for teamwork as a domestique and then the leap to leader of Team Sky and a shot at winning the Tour de France. In *The Climb*, written with the renowned investigative reporter David Walsh, he vividly recounts the struggles, the rivalries, the battles, the comebacks. Finally he traces his path to triumph and his mission to help clean up cycling. Inspiring and exhilarating, it will leave you ready to face your own challenges in life, whatever they may be. Have you ever wondered: What it's like to daily bet hundreds of thousands of dollars working for some of the largest professional gamblers in Las Vegas? ... How to spend a summer house sitting one of the biggest stars in the world's 11,000 square-foot mansion - without an invitation from it's celebrity owner ... Whether the life of crime - specifically, running a shoplifting ring in a middle American mall - pays? ... What causes a son to finally say enough is enough ... and decide "Today is the day I am going to kill my dad." Comedian Brandt Tobler has the answers in this funny, touching and sometimes downright unbelievable memoir of a small town Wyoming-kid turned "mall-fia" don, turned nationally touring comic. Brand tells his life story with candor, detailing the many pit stops, wrong turns, crazy connections and lucky breaks he experienced along the way to his comedy career, all while trying to balance a toxic relationship with his unreliable jailbird dad. In these pages Brandt will make you laugh (he better - it's his job!) and believe as he does that, when it comes to defining family, blood isn't always thicker than water. -- back cover.

The inspirational inside story from the 2018 Tour de France and Sports Personality of the Year winner "This year G was the strongest rider, and he finally had Lady Luck on his side. An unstoppable combination" Chris Froome "I understood what Geraint's win meant: for him, for me, for the team, and for Wales, too" Dave Brailsford "Wow!" Thierry Henry For years Geraint Thomas appeared blessed with extraordinary talent but jinxed at the greatest bike race in the

world: twice an Olympic gold medallist on the track, Commonwealth champion, yet at the Tour de France a victim of crashes, bad luck and his willingness to sacrifice himself for his team-mates. In the summer of 2018, that curse was blown away in spectacular fashion - from the cobbles of the north and the iconic mountain climbs of the Alps to the brutal slopes of the Pyrenees and, finally, the Champs-Elysees in Paris. As a boy, G had run home from school on summer afternoons to watch the Tour on television. This July, across twenty-one stages and three weeks, and under constant attack from his rivals, he made the race his own. With insight from the key characters around Geraint, this is the inside story of one of the most thrilling and heart-warming tales in sport. Not only can nice guys come first - they can win the biggest prize of all.

Geraint Thomas's inside guide to twenty-five of the greatest cycling climbs in the world. Cycling fans obsess about climbs and big mountains. They love reading about their tests and tribulations and they love to ride them - a cricket lover can never bat at Lord's, or a football supporter score at Wembley, but any rider can take on the challenge of an iconic mountain. There have been fine books about the big climbs before but never from the voice of an elite GC winner, taking you inside what these climbs really feel like, where the attacks come, where the pain kicks in. From best-known big-hitters, via pro-peloton favourites, to the secret climbs Geraint has come to love, and featuring Australia, Belgium, France, the Netherlands, Mallorca and Wales, this is the cyclist's secret manual.

Plump, grumpy, slumped on the couch, and going nowhere fast at age 16, Phil Gaimon began riding a bicycle with the grand ambition of shedding a few pounds before going off to college. He soon fell into racing and discovered he was a natural, riding his way into a pro contract after just one season despite utter ignorance of a century of cycling etiquette. Now, in his book *Pro Cycling on \$10 a Day*, Phil brings the full powers of his wit to tell his story. Presented here as a guide--and a warning--to aspiring racers who dream of joining the professional racing circus, Phil's adventures in road rash serve as a hilarious and cautionary tale of frustrating team directors and broken promises. Phil's education in the ways of the peloton, his discouraging negotiations for a better contract, his endless miles crisscrossing America in pursuit of race wins, and his conviction that somewhere just around the corner lies the ticket to the big time fuel this tale of hope and ambition from one of cycling's best story-tellers. *Pro Cycling on \$10 a Day* chronicles the racer's daily lot of blood-soaked bandages, sleazy motels, cheap food, and overflowing toilets. But it also celebrates the true beauty of the sport and the worth of the journey, proving in the end that even among the narrow ranks of world-class professional cycling, there will always be room for a hard-working outsider.

A devastating examination of how collapsing insect populations worldwide threaten everything from wild birds to the food on our plate. From ants scurrying under leaf litter to bees able to fly higher than Mount Kilimanjaro, insects are everywhere. Three out of every four of our planet's known animal species are insects. In *The Insect Crisis*, acclaimed journalist Oliver Milman dives into the torrent of recent evidence that suggests this kaleidoscopic group of creatures is suffering the greatest existential crisis in its remarkable 400-million-year history. What is causing the collapse of the insect world? Why does this alarming decline pose such a threat to us? And what can be done to stem the loss of the miniature empires that hold aloft life as we know it? With urgency and great clarity, Milman explores this hidden emergency, arguing that its consequences could even rival climate change. He joins the scientists tracking the decline of insect populations across the globe, including the soaring mountains of Mexico that host an epic, yet dwindling, migration of monarch butterflies; the verdant countryside of England that has been emptied of insect life; the gargantuan fields of U.S. agriculture that have proved a killing ground for bees; and an offbeat experiment in Denmark that shows there aren't that many bugs splattering into your car windshield these days. These losses not only further tear at the tapestry of life on our degraded planet; they imperil everything we hold dear, from the food on our supermarket shelves to the medicines in our cabinets to the riot of nature that thrills and enlivens us. Even insects we may dread, including the hated cockroach, or the stinging wasp, play crucial ecological roles, and their decline would profoundly shape our own story. By connecting butterfly and bee, moth and beetle from across the globe, the full scope of loss renders a portrait of a crisis that threatens to upend the workings of our collective history. Part warning, part celebration of the incredible variety of insects, *The Insect Crisis* is a wake-up call for us all.

Peter Walker—reporter at the Guardian and curator of its popular bike blog—shows how the future of humanity depends on the bicycle. Car culture has ensnared much of the world—and it's no wonder. Convenience and comfort (as well as some clever lobbying) have made the car the transportation method of choice for generations. But as the world evolves, the high cost of the automobile is made clearer—with its dramatic effects on pollution, the way it cuts people off from their communities, and the alarming rate at which people are injured and killed in crashes. Walker argues that the simplest way to tackle many of these problems at once is with one of humankind's most perfect inventions—the bicycle. In *How Cycling Can Save the World*, Walker takes readers on a tour of cities like Copenhagen and Utrecht, where everyday cycling has taken root, demonstrating cycling's proven effect on reducing smog and obesity, and improving quality of life and mental health. Interviews with public figures—such as Janette Sadik-Khan, who led the charge to create more pedestrian- and cyclist- friendly infrastructure in New York City—provide case studies on how it can be done, and prove that you can make a big change with just a few cycling lanes and a paradigm shift. Meticulously researched and incredibly inspiring, *How Cycling Can Save the World* delivers on its lofty promise and leads readers to the realization that cycling could not only save the world, but have a lasting and positive impact on their own lives.

Cycling is exploding in a good way. Urbanites everywhere, from ironic hipsters to earth-conscious commuters, are taking to the bike like aquatic mammals to water. *BikeSnobNYC*—cycling's most prolific, well-known, hilarious, and anonymous blogger—brings a fresh and humorous perspective to the most

important vehicle to hit personal transportation since the horse. Bike Snob treats readers to a laugh-out-loud rant and rave about the world of bikes and their riders, and offers a unique look at the ins and outs of cycling, from its history and hallmarks to its wide range of bizarre practitioners. Throughout, the author lampoons the missteps, pretensions, and absurdities of bike culture while maintaining a contagious enthusiasm for cycling itself. Bike Snob is an essential volume for anyone who knows, is, or wants to become a cyclist.

The bestselling autobiography of a cycling legend and winner of the 2011 Tour de France On the afternoon of Sunday, the first of February 2015, Cadel Evans crossed the finish line in the first-ever race of the event that would immortalise his name: the Cadel Evans Great Ocean Road Race. At that moment, an extraordinary cycling career, spanning 20 years and more than 750 professional races, came to a close. Now, looking back on his journey, Cadel Evans tells his story of the races and moments that mattered. Ranging from the dirt tracks of his early 1990s mountain-biking days to the Tour de France's famous podium in 2011 and beyond, *The Art of Cycling* is a tale of potential realised and ambition fulfilled. It's also the inspiring story of a young boy from the Australian bush, whose focus, talent and dedication conquered the elite world of international cycling in an era when few Australians competed, let alone won. Famous in the sport for his meticulous preparation and as an athlete who prided himself on his ability to give his all, Evans writes with forensic detail about the triumphs, the frustrations, the training, the preparation, the psychology of the sport, his contemporaries, the legends, the controversies and, above all, his enduring love of cycling.

The first in-depth look at Lance Armstrong's doping scandal, the phenomenal business success built on the back of fraud, and the greatest conspiracy in the history of sports Lance Armstrong won a record-smashing seven Tours de France after staring down cancer, and in the process became an international symbol of resilience and courage. In a sport constantly dogged by blood-doping scandals, he seemed above the fray. Then, in January 2013, the legend imploded. He admitted doping during the Tours and, in an interview with Oprah, described his "mythic, perfect story" as "one big lie." But his admission raised more questions than it answered—because he didn't say who had helped him dope or how he skillfully avoided getting caught. The Wall Street Journal reporters Reed Albergotti and Vanessa O'Connell broke the news at every turn. In *Wheelmen* they reveal the broader story of how Armstrong and his supporters used money, power, and cutting-edge science to conquer the world's most difficult race. *Wheelmen* introduces U.S. Postal Service Team owner Thom Weisel, who in a brazen power play ousted USA Cycling's top leadership and gained control of the sport in the United States, ensuring Armstrong's dominance. Meanwhile, sponsors fought over contracts with Armstrong as the entire sport of cycling began to benefit from the "Lance effect." What had been a quirky, working-class hobby became the pastime of the Masters of the Universe set. *Wheelmen* offers a riveting look at what happens when enigmatic genius breaks loose from the strictures of morality. It reveals the competitiveness and ingenuity that sparked blood-doping as an accepted practice, and shows how the Americans methodically constructed an international operation of spies and revolutionary technology to reach the top. It went on to become a New York Times Bestseller, a Wall Street Journal Business Bestseller, and win numerous awards, including a Gold Medal for the Axiom Business Book Awards. At last exposing the truth about Armstrong and American cycling, *Wheelmen* paints a living portrait of what is, without question, the greatest conspiracy in the history of sports.

**The World of Cycling According to G** Quercus Publishing

A manifesto for a radically different philosophy and practice of manufacture and environmentalism "Reduce, reuse, recycle" urge environmentalists; in other words, do more with less in order to minimize damage. But as this provocative, visionary book argues, this approach perpetuates a one-way, "cradle to grave" manufacturing model that dates to the Industrial Revolution and casts off as much as 90 percent of the materials it uses as waste, much of it toxic. Why not challenge the notion that human industry must inevitably damage the natural world? In fact, why not take nature itself as our model? A tree produces thousands of blossoms in order to create another tree, yet we do not consider its abundance wasteful but safe, beautiful, and highly effective; hence, "waste equals food" is the first principle the book sets forth. Products might be

designed so that, after their useful life, they provide nourishment for something new--either as "biological nutrients" that safely re-enter the environment or as "technical nutrients" that circulate within closed-loop industrial cycles, without being "downcycled" into low-grade uses (as most "recyclables" now are). Elaborating their principles from experience (re)designing everything from carpeting to corporate campuses, William McDonough and Michael Braungart make an exciting and viable case for change.

The #1 New York Times bestseller that has all America talking—with a new afterword on expanding your range—as seen on CNN's Fareed Zakaria GPS, Morning Joe, CBS This Morning, and more. “ The most important business—and parenting—book of the year. ” —Forbes “ Urgent and important. . . an essential read for bosses, parents, coaches, and anyone who cares about improving performance. ” —Daniel H. Pink Shortlisted for the Financial Times/McKinsey Business Book of the Year Award Plenty of experts argue that anyone who wants to develop a skill, play an instrument, or lead their field should start early, focus intensely, and rack up as many hours of deliberate practice as possible. If you dabble or delay, you ' ll never catch up to the people who got a head start. But a closer look at research on the world ' s top performers, from professional athletes to Nobel laureates, shows that early specialization is the exception, not the rule. David Epstein examined the world ' s most successful athletes, artists, musicians, inventors, forecasters and scientists. He discovered that in most fields—especially those that are complex and unpredictable—generalists, not specialists, are primed to excel. Generalists often find their path late, and they juggle many interests rather than focusing on one. They ' re also more creative, more agile, and able to make connections their more specialized peers can ' t see. Provocative, rigorous, and engrossing, Range makes a compelling case for actively cultivating inefficiency. Failing a test is the best way to learn. Frequent quitters end up with the most fulfilling careers. The most impactful inventors cross domains rather than deepening their knowledge in a single area. As experts silo themselves further while computers master more of the skills once reserved for highly focused humans, people who think broadly and embrace diverse experiences and perspectives will increasingly thrive.
