The Traveller's Guide to Sacred Ireland JHU Press

Since the publication of the first edition in 1999, the science of probiotics and prebiotics has matured greatly and garnered more interest. The first handbook on the market, *Handbook of Probiotics and Prebiotics: Second Edition* updates the data in its predecessor, and it also includes material topics not previously discussed in the first edition, including methods protocols, cell line and animal models, and coverage of prebiotics. The editors supplement their expertise by bringing in international experts to contribute chapters. This second edition brings together the information needed for the successful development of a pro- or prebiotic product from laboratory to market.

Augmented Reality in Tourism, Museums and Heritage Michelin Travel Publications

This textbook is appropriate for senior undergraduate and first year graduate students in mechanical and automotive engineering. The contents in this book are presented at a theoretical-practical level. It explains vehicle dynamics concepts in detail, concentrating on their practical use. Related theorems and formal proofs are provided, as are real-life applications. Students, researchers and practicing engineers alike will appreciate the user-friendly presentation of a wealth of topics, most notably steering, handling, ride, and related components. This book also: Illustrates all key concepts with examples Includes exercises for each chapter Covers front, rear, and four wheel steering systems, as well as the advantages and disadvantages of different steering schemes Includes an emphasis on design throughout the text, which provides a practical, hands-on approach

Ireland - Michelin National Map 712 Oxford University Press

This open access book provides insight into the implementation of Life Cycle approaches along the entire business value chain, supporting environmental, social and economic sustainability related to the development of industrial technologies, products, services and policies; and the development and management of smart agricultural systems, smart mobility systems, urban infrastructures and energy for the built environment. The book is based on papers presented at the 8th International Life Cycle Management Conference that took place from September 3-6, 2017 in Luxembourg, and which was organized by the Luxembourg Institute of Science and Technology (LIST) and the University of Luxembourg in the framework of the LCM Conference Series.

Telecommunications Law and Regulation Michelin Travel & Lifestyle

Since the last edition of the book was published, there have been a number of important developments in the telecommunications industry. *Telecommunications Law and Regulation* takes these changes into account, including an examination of the EU New Regulatory Framework, as well as the establishment of the Body of European Regulators for Electronic Communications (BEREC). There are also new chapters on spectrum management (radio frequencies), and consumer protection rules. The access and interconnection chapter addresses the issues surrounding the high capacity broadband widely provided by Next Generation Networks. The chapter on licensing and authorisation has been refocused to reflect the increasing regulatory focus on the mobile sector. The chapter on regulating content has also been significantly restructured and revised to reflect the changes in how we consume content. Written by leading experts, it is essential reading for legal practitioners and academics involved in the telecommunications industry.

The experts at America's Test Kitchen and National Geographic bring Italy's magnificent cuisine, culture, and landscapes--and 100 authentic regional recipes--right to your kitchen. Featuring 100 innovative, kitchen-tested recipes, 300 gorgeous color photographs, and 30 maps, this illustrated

guide takes you on a captivating journey through the rich history of Italian cuisine, region by region. Rich excerpts feature the origins of celebrated cheeses, the nuances of different wine growing regions, the best farmer's markets in Venice, and more. Intriguing prose illuminates key ingredients, from olive oil and how it's made to the various pasta shapes of Northern Italy. In every region, the food experts at America's Test Kitchen bring it all home, with foolproof recipes for standout dishes as well as hidden gems: Piedmontese braised beef in lustrous red wine sauce, crispy-custardy chickpea flour farinata pancakes from Genoa (achieved without the specialty pan and wood-burning oven), and hand-formed rustic malloreddus pasta of Sardinia that is a breeze to make.

Handbook of Probiotics and Prebiotics Springer

Updated from Ireland's official mapping agencies, OSI and OSNI, this atlas includes AA-approved camping sites and AA-recommended golf courses, car parks, picnic sites, port plans and ferry routes. There are 11 detailed city and town plans: Belfast, Cork, Londonderry, Dublin, Galway, Killarney, Kilkenny, Limerick, Sligo and Waterford, plus an easy-to-read 3,500 place name index including tourist sites.

Child Language OUP Oxford

Car ownership is set to triple by 2050, trucking activity will double and air travel could increase fourfold. This book examines how to enable mobility without accelerating climate change. It finds that if changes are made to the way people travel, adoption of technologies to improve vehicle efficiency and a shift to low-CO2 fuels, it is possible to move onto a different pathway where transport CO2 emissions by 2050 are far below current levels, at costs that are lower than many assume. The report discusses the prospects for shifting more travel to the most efficient modes and reducing travel growth rates, improving vehicle fuel efficiency by up to 50% using cost-effective, incremental technologies, and moving toward electricity, hydrogen, and advanced biofuels to achieve a more secure and sustainable transport future. If governments implement strong policies to achieve this scenario, transport can play its role and dramatically reduce CO2 emissions by 2050.

Designing Sustainable Technologies, Products and Policies Michelin Travel Publications

This report builds on the OECD Well-being Framework and applies a new perspective that analyses synergies and trade-offs between climate change mitigation and broader goals such as health, education, jobs, as well as wider environmental quality and the resources needed to sustain our

livelihoods through time. This report takes an explicitly political economy approach to the low-emissions transitions needed across five economic sectors (electricity, heavy industry, residential, surface transport, and agriculture) that are responsible for more than 60% of global greenhouse gas emissions.

Advanced Nutrition and Dietetics in Obesity Organization for Economic

Discover Ireland's hidden gems on 25 leisurely drives through the country's diverse landscape-from Belfast and the rugged Mourne Mountains to the magical Ring of Kerry. The ebook includes practical information for exploring the 32 counties of Ireland, including zip codes for use with GPS, rules of the road, driving tips, and ideas for outdoor activities, stunning walks, and whiskey-tasting. There are also recommendations for the best-value hotels and restaurants specializing in regional produce.

Covering the whole of the United Kingdom with more than 200 places listed, from castles to cozy inns, this book offers the reader the chance to experience the true delights of the U.K.

Taking Stock of Industrial Ecology Penguin

Investigates how activists confront global powers with their street-level dissent.

Ecology of Faunal Communities on the Andaman and Nicobar Islands AA ROAD ATLAS

This book provides extensive research into the use of augmented reality in the three interconnected and overlapping fields of the tourism industry, museum exhibitions, and cultural heritage. It is written by a virtual team of 50 leading researchers and practitioners from 16 countries around the world. The authors explore the opportunities and challenges of augmented reality applications, their current status and future trends, informal learning and heritage preservation, mixed reality environments and immersive installations, cultural heritage education and tourism promotion, visitors with special needs, and emerging post-COVID-19 museums and heritage sites. *Augmented Reality in Tourism, Museums and Heritage: A New Technology to Inform and Entertain* is essential reading not only for researchers, application developers, educators, museum curators, tourism and cultural heritage promoters, but also for students (both graduates and undergraduates) and anyone who is interested in the efficient and practical use of augmented reality technology.

Michelin Green Guide Ireland OECD Publishing

The Andaman and Nicobar Islands, India, consist of 572 islands with a land area of 8,249 km². Their topography is hilly and undulating, with elevations up to 732 m on the Andaman and up to 568 m on the Nicobar Islands. They are known for their rich biodiversity and a very high degree of endemism in all taxa, especially in plants, reptiles, fishes and corals. Their habitats include bays, mangroves, moist deciduous forests and evergreen forests. Comprising 20 chapters each written by an expert or professional in his/her particular field this book offers new insights into the fascinating faunal communities of these islands and provides the fundamentals for their conservation and environmental management.

Exhibiting War Springer Science & Business Media

This volume offers a detailed analysis of the issues related to the protection of non-traditional marks. In recent years, the domain of trademark law and the scope of trademark protection has grown exponentially. Today, a wide variety of non-traditional marks, including colour, sound, smell, and shape marks, can be registered in many jurisdictions. However, this expansion of trademark protection has led to heated discussions and controversies about the impact of the protection of non-traditional marks on freedom of competition and, more generally, on socially valuable use of these or similar signs in unrelated non-commercial contexts. These tensions have also led to increasing litigation in this area across several jurisdictions. This book provides an overview of the debate and state of the law surrounding non-traditional marks at the international, regional, and national level. In particular, this book addresses relevant international treaties administered by the World Intellectual Property Organization (WIPO) and the Agreement on Trade-Related Aspects to Intellectual Property Rights (TRIPS) as well as several regional and national legislations and leading judicial decisions in order to examine current law and practice culminating in critical reflections and suggestions on the topic. This is an open access title available under the terms of a CC BY-NC-ND 3.0 licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations.
