**Ebony** Peterson's Pharmacy Education: What Matters in Learning and Teaching is an essential resource for any pharmacy faculty member. More than a narration of the philosophical aspects of teaching and personal perspectives on life as a faculty member, it explores "what matters", "why it matters", and "how to apply" the matter to teaching, learning, and assessment in pharmacy education. It covers a variety of teaching settings (e.g., large classroom, small group teaching, clinical site) and guides the reader in developing a deeper understanding of what it means to be a teacher. Scenarios are included in each chapter, offering readers the opportunity to readily apply educational theory to their role as educators and to adapt the book's content to their specific educational setting. The reader, whether a part-time faculty member, full-time faculty member, or adjunct professor/preceptor, is given the opportunity to personalize the material addressed in the text to his/her stage of development through engagement in reflective workbook exercises. Pharmacy Education: What Matters in Learning and

Teaching is a valuable tool for mid-level senior-level faculty members as well as for new faculty. This text can also serve as a resource for adjunct faculty members and pharmacy residency directors and preceptors to aid in the development and refinement of clinical educational programs in pharmacy. This book will be a valuable tool for not only individual pharmacy educators but for schools of pharmacy and pharmacy residency programs in their provision of faculty development and preceptor development programs.

Pharmacy Clinical Coordinator's Handbook ASHP

When they prepare for medical school, few candidates take the time to acquire the caliber of recommendation letters they will need to distinguish themselves in a highly competitive applicant pool. This book, which was written by an Ivy League admissions expert, offers detailed advice to write (and get) persuasive letters that highlight the personal, academic and professional strengths the committee expects to see. It also includes 45 successful recommendation letters, including several that "explain" extenuating circumstances in a candidate's history (such as disappointing grades, a gap in employment, and low MCAT scores). At top medical schools, where the competition is fierce, the quality and depth of a candidate's reference letters can make the difference between acceptance and rejection. Whether you are an applicant who needs a persuasive letter of recommendation, or someone who has been asked to write one, this exceptional book is mandatory reading.
