General physics, relativity, astronomy and plasmas Oxford University Press

Eva Picardi (1948-2017) was one of the most influential Italian analytic philosophers of her generation. She taught for forty years at the University of Bologna, raising three generations of students. This volume presents a selection of Picardi's essays on Frege's philosophy of logic, language, and psychology. Together, these papers provide a close look at the milieu within which Frege operated, and serve to highlight the relevance of his work for contemporary debates, particularly in the philosophy of language. One strand in Picardi's work on Frege concerns understanding and contextualizing Frege's anti-psychologism. Picardi contends that Frege was motivated by semantic considerations, much more so than by adherence to Kantian transcendentalism. Furthermore, Picardi draws on her deep knowledge of German, and the fact that she was a native speaker of Italian, to reconstruct the intricacies of Frege's relationship with other logicians of his time—both in Germany, like Kerry and Sigwart, and in Italy, like Peano and his school. Picardi's work shows how the historical and the theoretical (typically treated as separate in contemporary analytic philosophy, even in competition), complement and enrich one another.

Catalogs

Mit Erscheinen dieses Bandes ist die Tiefenerschliessung der mittelalterlichen lateinischen Handschriften der Thuringer Universitäts- und Landesbibliothek (ThULB) Jena nach den Richtlinien der Deutschen Forschungsgemeinschaft abgeschlossen. Hatte der erste Band* 100 Handschriften der Gruppe "Bibliotheca Electoralis", des Grundbestands der ThULB Jena, vorgestellt, so präsentiert nun der zweite Band die übrigen, auf mehrere Signaturreihen verteilten 131 lateinischen Handschriften des Mittelalters. Entstanden zwischen dem späten 9. und dem beginnenden 16. Jahrhundert, enthalten sie vorrangig theologische, daneben auch juristische, medizinische, astronomische, astrologische, alchemistische oder chronikalische Texte. Das breite Themenspektrum ist darauf zurückzuführen, dass etliche der Handschriften Gelehrtenbibliotheken entstammen, etwa des Historikers Johann Andreas Bose, des Juristen und Historikers Christian Gottlieb Buder oder des Goethe-Enkels Wolfgang Maximilian. Neben berühmten Zimelien wie dem Jenaer Exemplar der Weltchronik Ottos von Freising (Ms. Bos. q. 6) thematisiert der Katalog manches noch zu Entdeckende, etwa eine spätmittelalterliche illuminierte Weltchronik in Form einer über sieben Meter langen Pergamentrolle (Ms. App. 31). Der Band bietet reiches Material für künftige Forschungen, da er zahlreiche zuvor nicht oder kaum bekannte Handschriften vorstellt.
