Bachelor Thesis from the year 2018 in the subject Pedagogy - School System, Educational and School Politics, grade: 5 (GHA-System), University of Education (Distance Learning), course: Post Graduate Diploma in Education, language: English, abstract: Students' academic performance is a key feature in education. This study was therefore conducted primarily to assess the factors contributing to improvement in academic performance of Junior High Students (JHS) in a Basic School which is in the Gomo-East District in the Central Region of Ghana. The mixed and descriptive research design was used and a sample size of 87 respondents (79 students and 8 teachers) were selected through random sampling technique. The findings revealed that the average academic performance (47.0%) of the JHS students in the Basic School is weak and their performance in Mathematics (average score of 31.48%) and English Language

(average score of 39.99%) is a fail. It was noticed that student factors that contribute to an improvement in academic performance include; regular studying, self-motivation, punctuality and regular class attendance, hard-work and interest in a subject. The teacher factors were completion of syllabus, use of TLM's, frequent feedback to students and given students special attention. Per the findings, parent factors which was very key was parent showing concern in their children's academics and providing them their academic needs. School factors that were significant included availability of text books and TLM's. The study also found that parent level of education and gender has a positive relationship with academic performance but it's insignificant. However, age has a positive significant (5% significance level) relationship with academic performance. Based on findings, the study recommends that there should be strict monitoring on teachers to vary their teaching methods to suit their needs of the students and also to provide the students with constant feedback on their academic performance. Again, the students should be motivated and orientated to take ownership of their studies by having regular studies and attending school during school days.

In response to the COVID-19 pandemic, many educational institutions across the globe had to close in-person learning and turn to online learning. Previous predictions on the future of education discussed the globalization of education through online learning that breaks down geographical barriers. However, many students, parents, and educators are still finding it

challenging to adapt to new methods of instruction. Creating global and multicultural classrooms creates additional challenges, especially when considering diverse, at-risk, and low-income student populations. Further study of these challenges is required to improve the future of global education. Contemporary Issues in Multicultural and Global Education discusses research, strategies, best practices, and insights dealing with important issues related to multicultural and global education. Covering topics such as remote learning and sustainable leadership, this premier reference source is ideal for educators, policymakers, administrators, curriculum designers, researchers, academicians, and students.

Explicit Biology - A Revision Course (3rd Edition) Dorrance Publishing

Scholars from history, economics, political science, and psychology describe the present state of school accountability, how it evolved, how it succeeded and failed, and how it can be improved. They review the history behind the ongoing conflict between educators and policymakers over accountability and testing, describe various accountability schemes, and analyze the costs of accountability. Case studies of three states with strong school systems compare how accountability works in practice. Evers is a research fellow at the Hoover Institution. Annotation (c)2003 Book News, Inc., Portland, OR (booknews.com).

Principles of Accounting Volume 1 -

Financial Accounting World Bank Publications
The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher

educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany

This volume provides an in-depth, comparative examination of how primary mathematics education is influenced by national education reform, policy, local resources, and culture in three different countries. By drawing on first-hand observations and interviews, as well as analysis of policy documents and learning resources, the book considers the viability of transferring best practices in primary mathematics education across global

contexts. Three diverse countries - Ghana, the US, and Singapore - are explored. Similarities and differences are highlighted, and the influence of national and regional initiatives related to pedagogical strategies, teacher education, and cultural expectations are considered, to offer an insightful examination of how best practices might be shared across borders. This book will benefit researchers, academics, and postgraduate scholars with an interest in international and comparative education, mathematics, and educational policy. Those with a specialization in primary mathematics education, including pedagogy and teacher preparation, will also benefit from this book.

Primary Mathematics Pedagogy at the Intersection of Education Reform, Policy, and Culture GRIN Verlag

The GED® test is your chance to get the job or career you want. The GED® test credential is the only high school equivalency credential recognized in all 50 states. This is your ticket to a great job and life. This is a comprehensive test with about 150+ power packed questions that covers the entire spectrum of Math topics covered at

the test. Each of these questions is answered in the book and we have provided explanation of the answers as well which will help students. This is a great practice book. Don't take the test without reviewing the questions in this book!

Princess Adetoun Prentice Hall

After a decade-long civil war, Sierra Leone witnessed an unprecedented surge in school enrollments at the primary and then the secondary levels. Committed to the Education for All objectives, the government further encouraged greater access to school. The country must now negotiate the transition from postwar recovery to regular delivery of education services. The main tasks ahead include reaching the remaining out-of-school children and improving the quality of the learning environment and, ultimately, of learning outcomes. Success will depend on the unrelenting, strong commitment of the government, the capacity of providers to effectively deliver education services, and a sustainable financial framework.

Influences of the IEA Civic and Citizenship Education Studies National Academies Press

This book offers new insights into a largely understudied group of Greek texts preserved in selected manuscripts from the Library at Wellcome Collection, London. The content of these manuscripts ranges from medicine, including theories on diagnosis and treatment of disease, to astronomy, philosophy, and

poetry. With texts dating from the ancient era to the Byzantine and Ottoman worlds, each manuscript provides its own unique story, opening a window onto different social and cultural milieus. All chapters are illustrated with black and white and colour figures, highlighting some of the most significant codices in the collection.

Factors contributing to academic performance of students in a Junior High School

This open access book identifies the multiple ways that IEA's studies of civic and citizenship education have contributed to national and international educational discourse, research, policymaking, and practice. The IEA International Civic and Citizenship Education Study (ICCS), first conducted in 2009, was followed by a second cycle in 2016. The project was linked to the earlier IEA Civic Education Study (CIVED 1999, 2000). IEA's ICCS remains the only large-scale international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes, and participatory skills. It also

discusses in-depth how a wide range of countries prepare their young people for citizenship in changing political, social, and economic circumstances. The next cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia, and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999/2000 have been used to improve nations' understanding of their students' civic knowledge, beliefs, attitudes, current civic-related behaviors, and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies' results indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational discourse, policy, practice, and research in an area of education that is becoming increasingly important for many societies.

Inequity is the central challenge facing basic education in Ghana and undercuts the potential contribution of basic education to Ghana's national development goals.

Persistent disparities in education service delivery and inequitable allocation of resources in Ghana lead to highly inequitable educational outcomes. These inequities negatively affect system quality, efficiency and accountability and ultimately undermine broader national development. Widespread inequity in education service delivery significantly depresses system learning outcomes. This report describes a "missing middle" in terms of learning outcomes: While a small number of children perform well, the majority of pupils (more than 60%) pass through primary school without becoming proficient in numeracy and literacy. Specifically, children from Ghana's northern regions and deprived districts, poor and rural households and ethnic and linguistic minorities - students

who require the most support to meet learning districts and populations) is further outcomes - receive, on average, disproportionately fewer resources from the government than their peers. Systemic inequities create this missing middle and drag down system performance. Following a decade of rapid change, as of 2013, more children are attending basic and senior high schools than at any time in the history of Ghana. In the past decade, Ghana has realized great growth, progress and change. Population growth, urbanization and significant GDP growth have changed the economic, political and social landscape of Ghana. In the past decade, incidence of extreme poverty has been cut in half. Introduction of Free, Compulsory, Universal Basic Education (FCUBE) and kindergarten has supported a near doubling of basic education enrollment in the past 15 years. Delivering basic education and ensuring equity has become more challenging. Compared to a decade ago, more stakeholders are involved in allocating and managing core education inputs and accountability systems remain unclear and weak. Addressing the deeply embedded inequities (e.g. allocation of trained teachers, support to deprived complicated by a complex and fragmented policy, management and financing environment. The persistence of inequity reflects the persistence of conflicting sector interests and poses genuine policy dilemmas. However, recent experience shows that accelerating progress toward equity and quality basic education for all is possible. Several recent initiatives in Ghana point to the possibility of improving equitable resource allocation, strengthening social protection and providing additional support to improve learning outcomes. For example, children with below-average learning outcomes in poorly resourced environments are likely to show measurable gains when provided additional support (e.g. instructional support, learning resources, management support, demand-side incentives).

The Woman Wails! Graphic Communications Group Today's students are tomorrow's leaders, and the college years are a critical period for their development of ethical standards. Cheating in College explores how and why students cheat and what policies, practices, and participation may be useful in promoting academic integrity and reducing cheating. The

authors investigate trends over time, including internet-based cheating. They consider personal and situational explanations, such as the culture of groups in which dishonesty is more common (such as business majors) and social settings that support cheating (such as fraternities and sororities). Faculty and administrators are increasing their efforts to promote academic honesty among students.

Orientation and training sessions, information on college and university websites, student handbooks that describe codes of conduct, honor codes, and course syllabi all define cheating and establish the consequences. Based on the authors' multiyear, multisite surveys, *Cheating in College* quantifies and analyzes student cheating to demonstrate why academic integrity is important and to describe the cultural efforts that are effective in restoring it. -- Gary Pavela, Syracuse University

Basic Education Beyond the Millennium Development Goals in Ghana Graphic Communications Group

Who Is to Blame By Alhaji Mohamed Abu Sesay In his quiet moments, Author Alhaji Mohamed Abu Sesay reads a lot of novels. He reads religious books to enlighten himself to God's word. Outside of reading, he jokes a lot with his children and meets friends on weekends. He is married with six children. Despite his ability to work in the civil service, his passion has always been teaching.

Supervisory Leadership emphasizes leadership practices and covers the concepts, principles, and skills needed to be a successful supervisor. This new, well-researched and comprehensive book describes the supervisor's work with teachers as moving from a deficit model (helping) to a collegial, cooperative, mentoring approach. It also provides helpful connections that describe and support the role of supervisors in school culture. The authors provide a view of contemporary supervisory practice with particular attention given to the importance of past practices, the work place and culture, leadership qualities, communication skills, models and mechanics of the supervision process, and the process of change and decision-making. Written in a language that is easily understood, *Supervisory Leadership* provides an interactive, realistic and meaningful learning experience that offers continuous opportunities for readers to reflect upon their own leadership skills development. For supervisors and educational administrators. **The Dilemma of a Ghost ; Anowa** Sub-Saharan Pub & Traders

Dilemma of a Ghost When Ato returns to Ghana from his studies in North America he brings with him a sophisticated black American wife. But their hopes of a happy marriage and of combining 'the sweetness and loveliest things in Africa and America' are soon shown to have been built on an unstable foundation.

Indigenist African Development and Related Issues Springer Nature

Street life in the slums of Accra is realistically portrayed in this socially-committed, subtle novel about four educated women who are inspired by the plight of a 14-year old girl, Fofo. As the main characters convert their library center into a practical street initiative, the novel invokes the squalor, health risks, and vicious cycles of poverty and violence that drive children to the streets and women to prostitution; and, from which, ultimately, no one in the society is free.

Self-Awareness (HBR Emotional Intelligence Series) Brill / Sense

Self-awareness is the bedrock of emotional intelligence that enables you to see your talents, shortcomings, and potential. But you won't be able to achieve true self-awareness

with the usual quarterly feedback and self-reflection alone. This book will teach you how to understand your thoughts and emotions, how to persuade your colleagues to share what they really think of you, and why self-awareness will spark more productive and rewarding relationships with your employees and bosses. This volume includes the work of: Daniel Goleman Robert Steven Kaplan Susan David HOW TO BE HUMAN AT WORK. The HBR Emotional Intelligence Series features smart, essential reading on the human side of professional life from the pages of Harvard Business Review. Each book in the series offers proven research showing how our emotions impact our work lives, practical advice for managing difficult people and situations, and inspiring essays on what it means to tend to our emotional well-being at work. Uplifting and practical, these books describe the social skills that are critical for ambitious professionals to master.
