Erfolgsfaktoren von ERP-Projekten Mit vielen Beispielen ein perfekter Ratgeber für KMU Jedes Jahr werden in Deutschland Milliardenbeträge für die Anschaffung betriebswirtschaftlicher Standardsoftware und nachgelagerte Dienstleistungen ausgegeben. Gleichwohl werden fünfzig bis neunzig Prozent aller Projekte im Nachhinein als wenig erfolgreich oder gar misslungen beurteilt. Mit diesem Ratgeber für die mittelständische Praxis werden die Gründe untersucht und Mittel und Wege aufgezeigt, wie Fehlinvestitionen, Überstunden und Frustration künftig vermieden werden können. Der Fokus des Buches liegt auf der pointierten Darstellung struktureller Gemeinsamkeiten der nur auf den ersten Blick unübersichtlich erscheinenden Produktfamilien sowie dem Aufzeigen typischer Problembereiche, die dem Autor in den letzten

beiden Jahrzehnten unabhängig von Unternehmensgröße und Softwarelösung bei Projekten immer wieder begegnet sind.

efforts, OPC UA and cloud computing, field devices, PLCs, SCADA, MES, ERP and automation history. All that history is seen in the context of  $\mu$ -controller, DSP (Digital signal processor), FPGAs (Field Programmable Gate Arrays), ASICs (Application-Specific Integrated Circuit), Chip on Board. It includes the HW-history, from Intel 8080 to octuple multicore processors. In the same way it is shown the history of field device out from laboratory into the field with all difficulties and benefits of that transition. The issues are summarized in a pyramid of complexity. Requirements for robustness and safety are shown for field devices. In the same way it is shown the development of mainframes, workstations and PC's. SAP a leading ERP System is explained in more detail. Specially it is figured out how SAP works and what has to be considered in working with such kind of system.

The differences between MES- and ERP-systems are discussed, specially also for future combined SAP/MES systems. Explained are the problems of midsized companies (SMEs) in dealing with Industry 4.0 and automation. Further examples are given and discussed for automated quality control in automotive, PCB-handling, CIGS (Solar cell)-production. Also shown is the upgrade for older products and make them ready for automation standards. In detail the history of modern robotics is shown for the automotive industry. In summary also is figured out the Industry 5.0 which is just coming up more and more.

In the meantime, over 20 years have passed since I first came into contact with SAP. After graduating, I started my first job at an international consulting company. During the introductory meeting with my boss, he asked me: "Do you want to do SAP?" - I can

---

well remember that I just thought, "Hmm ... SAP ... What's that?" So I left his office without giving him an answer. I promptly went to speak to an experienced colleague: "Hey Jochen, tell me, should I do SAP? " His answer was firm and precise: "By all means do it, it's a life insurance. " In these 20 years, I have been lucky enough to be involved in several international SAP projects, to help shape the processes of corporations and to meet many interesting people. In this book, I have summarized my SAP knowledge in a pointed and systematic way. My claim was to convey SAP knowhow that is helpful but not generally known. This reference book will not disappoint you if you are looking for something new on the following topics: - SAP GUI tips and tricks - SAP IDoc analysis and setup - Insider knowledge about SAP customizing - Hidden features for ABAP debugging - Important knowhow about message determination - Background knowledge on SD processes - Batch job setup and analysis

tasks, but also shows how Business Development can be integrated organizationally into a company. In addition, a prototypical Business Development Process is presented in concrete terms and explained using a case study. The book shows why enterprises fail, deals with new creative techniques such as Hackthons and dedicates itself more comprehensively than so far to the topic of communication in the course of changes. The book helps all, which want to introduce and/or optimize Business Development in the enterprise as responsible ones or work in the future in this range.
