This collection of previously published articles, chapters and keynotes traces both the theoretical contribution of Lucy Green to the emergent field of the sociology of music education, and her radical hands-on practical work in classrooms and instrumental studios. The selection contains a mixture of material, from essays that have appeared in major journals and books, to some harder-to-find publications. It spans issues from musical meaning, ideology, identity and gender in relation to music education, to changes and challenges in music curricula and pedagogy, and includes Greens highly influential work on bringing informal learning into formal music education settings. A newly-written introduction considers the relationship between theory and practice, and situates each essay in relation to some of the major influences, within and beyond the field of music education, which affected Greens own intellectual journey from the 1970s to the present day.

“ The natural tone of Nicky Gentil ’ s richly anecdotal narrative will delight not only pianists and jazz enthusiasts but anyone who just happens to like

pianos in general. ” - Cadence Info Magazine
A collection of humorous, touching, unputdownable stories set in Paris, *The Jazz-Girl*, *the Piano*, and *the Dedicated Tuner* transports you into a feel-good world of jazz, pianos and the little-known art of piano tuning. An entertaining slice of life, regardless of whether or not you play a musical instrument, this book explores the world of Nina Somerville, an Englishwoman who - while others are going through a mid-life crisis - discovers by complete chance her true calling: jazz improvisation. In a bid to enjoy that passion to the full, she purchases the piano of her dreams - a Steinway baby grand - leading her to make yet another discovery: the intricate mysteries of the fascinating piano tuning profession. Against the backdrop of the Eiffel tower and the Champs-Élysées, from the quest for the perfect sound to an unexpected chance to perform in public, music takes Nina on a journey which is at times improbable and hilarious, but equally moving, not to mention extremely informative. Previously published in France, *The Jazz-Girl* has been greatly received, and has the interesting addition of being musically illustrated on the author ’ s YouTube channel with some characters playing pieces alluded to in the stories.

Thinking as You Play Springer

In *Assessing Music Performance: A Valid System for Measuring Student Achievement and Growth*, Kevin McNulty, Sr. brings together his many years teaching band and orchestra and his professional judging career that spans over forty years. This breakthrough work gives instrumental and choral directors a solid philosophical basis for assessing performance students, using a performance-based system as the primary means of grading rather than systems used on other subjects, including general music. McNulty contends that only way to accurately measure the desired outcomes of music performance is through the prism of a music-performance teacher ’ s background and experience as a musician, and not simply against a list of criteria or an extraneous written exam. Furthermore, while other disciplines in schools use rating almost exclusively, his system supports the notion that rating and ranking are required in music performance evaluation. Ranking not only establishes program standards but also provides distinction, fine-tunes teacher tolerance, provides data for seating and ensemble placement, allows for program measurement, and facilitates the escalation of performance standards year-to-year. *Assessing Music Performance: A Valid System for Measuring Student Achievement and Growth* is a must have for all music directors seeking a valid way to grade students and answer the call for all subjects to measure what they teach.

In the music classroom, instructors who hope to receive aid are required to provide data on their classroom programs. Due to the lack of reliable, valid large-scale assessments of student achievement in music, however, music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands, music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers. In this two-volume Handbook, contributors from across the globe come together to provide an authority on the assessment, measurement, and evaluation of student learning in music. The Handbook's first volume emphasizes international and

theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music, and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and US-focused approaches to music education assessment. Chapters address assessment in different types of US classrooms; how to assess specific skills or requirements; and how assessment can be used in tertiary and music teacher education classrooms. Together, both volumes of *The Oxford Handbook of Assessment in Music Education* pave the way forward for music educators and researchers in the field.

Boundary Areas in Social and Developmental Psychology is based largely on the proceedings of a conference at Vanderbilt University in June 1981. One of the goals is to highlight some examples of research that illustrate facets of the important boundary area between social and developmental psychology. The book opens with a chapter that deals with the broad issues of boundary areas in psychology, ending with specific consideration of the boundary between social and developmental psychology. This is followed by separate chapters that consider general propositions regarding the importance of integrating concepts and methods from social and developmental psychology in the study of social relationships; show how integrating social and developmental considerations can assist in the understanding of relationships between parents and children; and apply developmental and social concepts to identify and study some of the aspects of the marital relationship that may lead to its dissolution. Subsequent chapters deal with boundary area issues focusing primarily on children's social behavior. These include the complexity of social processes inherent in children's peer relationships and the role of social exchange processes in social relationships from infancy to adulthood.

(Instructional). "What good is music if it ain't got that swing?" Duke Ellington The Associated Board responds with *Jazz Piano*, a comprehensive introduction to the world of jazz. A pioneering set of publications and optional assessment materials provide the building blocks you need to play jazz with imagination, understanding, and style, and to improvise effectively right from the start. Five levels of graded pieces contain a wide range of styles: funky jazz, up-tempo swing, calypso, Latin, jazz waltz, modal, bebop, Gospel, ragtime, free jazz, and more. There are classic tunes by Duke Ellington, Miles Davis, Bill Evans, and Thelonious Monk. Within each level there are 15 pieces, aural tests, quick studies, scales, arpeggios, and a CD. The 15 pieces are presented in three categories: blues, standards, and contemporary jazz. Each piece provides a head/melody which contains all the characteristic voicings, phrasing, and rhythmic patterns needed for a stylish performance. An improvised section follows, where guideline pitches and left-hand voicings are given as a practical starting point for solos. Totally accessible and at the highest musical standards, these pieces provide the opportunity to play jazz confidently and creatively.

Central to the lives of the religiously committed are not simply religious convictions but also religious practices. The religiously committed, for example, regularly assemble to engage in religious rites, including corporate liturgical worship. Although the participation in liturgy is central to the religious lives of many, few philosophers have given it attention. In this collection of essays, Terence Cuneo turns his attention to liturgy, contending that the topic proves itself to be philosophically rich and rewarding. Taking the liturgical practices of Eastern Christianity as its focal point, *Ritualized Faith* examines issues such as what the ethical importance of

ritualized religious activities might be, what it is to immerse oneself in such activities, and what the significance of liturgical singing and iconography are. In doing so, Cuneo makes sense of these liturgical practices and indicates why they deserve a place in the religiously committed life.

This open access book tackles the design of 3D spatial interactions in an audio-centered and audio-first perspective, providing the fundamental notions related to the creation and evaluation of immersive sonic experiences. The key elements that enhance the sensation of place in a virtual environment (VE) are: Immersive audio: the computational aspects of the acoustical-space properties of Virtual Reality (VR) technologies Sonic interaction: the human-computer interplay through auditory feedback in VE VR systems: naturally support multimodal integration, impacting different application domains Sonic Interactions in Virtual Environments will feature state-of-the-art research on real-time auralization, sonic interaction design in VR, quality of the experience in multimodal scenarios, and applications. Contributors and editors include interdisciplinary experts from the fields of computer science, engineering, acoustics, psychology, design, humanities, and beyond. Their mission is to shape an emerging new field of study at the intersection of sonic interaction design and immersive media, embracing an archipelago of existing research spread in different audio communities and to increase among the VR communities, researchers, and practitioners, the awareness of the importance of sonic elements when designing immersive environments.

The contributions to this volume aim to stimulate discussion about the role of assessment in the learning experiences of students in music and other creative and performing arts settings. The articles offer insights on how assessment can be employed in the learning setting to enhance outcomes for students both during their studies at higher education institutions and after graduation. An international group of leading researchers offers an exciting array of papers that focus on the practice of assessment in music, particularly in higher education settings. Contributions reflect on self-, peer- and alternative assessment practices in this environment. There is a

particular emphasis on the alignment between assessment, curriculum structure and pedagogy.
