Jazz Improvisation Using Simple Melodic Embellishment teaches fundamental concepts of jazz improvisation, highlighting the development of performance skills through embellishment techniques. Written with the college-level course in mind, this introductory textbook is both practical and comprehensive, ideal for the aspiring improviser, focused not on scales and chords but melodic embellishment. It assumes some basic theoretical knowledge and level of musicianship while

introducing multiple techniques, mindful that improvisation is a learned skill as dependent on hard work and organized practice as it is on innate talent. This jargon-free textbook can be used in both self-guided study and as a course book, fortified by an array of interactive exercises and activities: musical examples performance exercises written assignments practice grids resources for advanced study and more! Nearly all musical exercises--presented throughout the text in concert

pitch and transposed in the appendices for E-flat, B-flat, and bass clef instruments--are accompanied by backing audio tracks, available for download via the Routledge catalog page along with supplemental instructor resources such as a sample syllabus, PDFs of common transpositions, and tutorials for gear set-ups. With music-making at its core, Jazz Improvisation Using Simple Melodic Embellishment implores readers to grab their instruments and play, providing musicians with the

simple melodic tools they need to "jazz it up."

"I messed up," Calvin Newton lamented, after wasting thirty years and doing time in both state and federal prisons for theft, counterfeiting, and drug violations. "These were years of my life that I could have been singing gospel music." During his prime, he was super-handsome, athletic, and charged with sexual charisma that attracted women to him like flies to honey. Atop this

abundance was his astounding voice, "the voice of an angel." This book is his prodigal-son story. Audacious, Newton never turned down a dare, even if it meant climbing on the roof of a speeding car or wading into a freezing ocean. As a boy boxer, he was a Kentucky Golden Gloves champ who k.o.'ed his opponent in twenty-three seconds. By his late teens he had been recruited by the Blackwood Brothers, the number-one gospel quartet in the world. In his mid-twenties while he was singing Christian songs with the Oak Ridge Quartet, Newton's mighty talent and movie-star looks took him deep into hedonism--reckless driving, heavy romancing, and addictive

pill popping. As 1950s rock 'n' roll began its invasion of gospel, he and two partners formed the Sons of Song, the first all-male gospel trio. Long before the pop sound claimed contemporary Christian music, the Sons of Song turned gospel upside down with histrionic harmony, high-styled tuxedos, and Hollywood verve. Their signature song, "Wasted Years," foreshadowed Newton's punishing fall. This biography looks back at the destructive lifestyle that wrecked a sparkling career. When well into his sixties, Newton turned his life around and was able to confront his demons and discuss his prodigal days. He talked extensively with Russ Cheatham about his self-

destruction and the great personal expense of his own bad-boy choices and late redemption. In this candid biography, one of gospel's all-stars discloses a messed-up life that vacillated between achievement and failure, fame and infamy, happiness and grief.

All about the Church Music Director Shawnee Press

This edition is comprised of 86 different technical exercises composed by Liszt during 1868 to 1880. Liszt intended these highly challenging exercises to build greater performance skills in virtuoso pianists. The complete series consists of twelve volumes, each one dealing with a different pianistic problem. This

edition has been compiled from the original set to present the exercises in a reasonable length without harming the essence and effectiveness of the original work.

Presently, I am teaching a

group of students in Hong Kong to play by ear. Many of them have difficulty reading the standard music notation. They want to play the piano but reading music slows them down. In the process of teaching, I started coming up with this method that works effectively for them. That's how I started teaching them how to play by ear a year ago. In the process, I started coming up with a method that works effectively for them. Most people in Hong Kong are aware of another kind of music notation that is

used widely among the older generation. The system is simple, known by the Chinese as Jianpu which means simplified music notation. We sometimes see this Asian Music Notation in the older books but we seldom pay much attention to it because we've been trained to study the Western standard music notation when learning music. In the process of teaching my students to play by ear, I discover that they pick up this Asian Numeric Music Notation easily, and their play by ear skill thrives as a result. One of my students started playing by ear publicly as a church pianist half a year into the course. He is even able to compose his music at the piano and performs for us. You should see the glowing joy on his face. In the Play By Ear series, I provide you with many tips and analysis to show you how to take full advantage of this system. As I said earlier, it only takes a few hours to learn the system, maybe only one hour. That's how simple the system is. You don't believe me? Tell me about it after you learn the system from the PBE course. To guide you to use the system comfortably, I provide 40 songs in Play By Ear Volume 1 for you to work on, so that you get lots of practice to become proficient with the Asian Music Notation. By the end of the course, you will be able to notate your own songs in this numeric notation. It totally simplifies the thought process when you play songs. To me this is most valuable because it

frees the student from reading the more complicated music staff notation, and helps the student to acquire a QUIET mind to listen to the sounds deeply, to play with ease and with creative freedom. Level: Beginners to Advanced. In this course, you will learn 10 steps to start playing songs by EAR. The principles of playing by ear are laid out in detail. I also demonstrate in audios and in 40 videos with animated dotted keyboards to teach you how to play in different keys with the Asian Numeric Music Notation.

Each video shows a song demonstrated in at least 3 keys. This is a further look at the approach I take in this Series. Think in SCALE TONE NUMBERS to play BY EAR. To play a song by ear, first limit yourself to the 7 scale tones of a key. I use software-animated videos that show you clearly how to apply the simple Asian Music Notation to playing songs by ear. I first demonstrate how this is easily done in the key of C. Play song easily in ALL 12 KEYS. What you can do to the key of C can easily be

done to any key, even in the more difficult keys such as Db key, B key or F# key. The thinking and application is CONSISTENT in all 12 keys. In my videos, using 40 songs, I show you how to apply the Asian Numeric Music Notation to playing songs in all 12 different keys. I purposely also choose some of the harder keys to play in (B, Db, F#) so that you can see how easy the system is once your thinking is clear. Playing in all keys: Simplified FINGERING and HANDSHAPES. Learn to

LISTEN DEEPLY A lot of ear training programs want to help us to LISTEN DEEPLY to the sounds. My approach uses songs to help you listen DEEPLY to the tones you play rather than naming the intervals such as M6, m6, m2, M2, m7 or M7 etc. If playing songs by ear is what you want, this is perfect for you. If you want to learn sound intervals and distinguish them, you would have to go for ear training software for those drilling exercises. Have fun, Rosa

This book was written to provide a methodology for improvisation on the piano. Patterns are analyzed in and notated in all keys. Examples are given to illustrate how and where a fill fits. Then, step by step you can learn how to add the left hand accompaniment based on a lead sheet, or improvise with the right hand. While improvising, patterns may be woven into a beautiful tapestry of sound. Just as a kaleidoscope creates beautiful colorful

patterns before your eye, the patterns in this book will enable you to create a kaleidoscope of musical sounds for your ears. Most of the book consists of short examples using familiar tunes.
