Cities throughout the Roman Empire flourished during the reign of Hadrian (A.D. 117-138), a phenomenon that not only strengthened and legitimized Roman dominion over its possessions but also revealed Hadrian as a masterful negotiator of power relationships. In this comprehensive investigation into the vibrant urban life that existed under Hadrian's rule, Mary T. Boatwright focuses on the emperor's direct interactions with Rome's cities, exploring the many benefactions for which he was celebrated on coins and in literary works and inscriptions. Although such evidence is often as imprecise as it is laudatory, its collective analysis, undertaken for the first time together with all other related material, reveals that over 130 cities received at least one benefaction directly from Hadrian. The benefactions, mediated by members of the empire's municipal elite, touched all aspects of urban life; they included imperial patronage of temples and hero tombs, engineering projects, promotion of athletic and cultural competitions, settlement of boundary disputes, and remission of taxes. Even as he manifested imperial benevolence, Hadrian reaffirmed the self-sufficiency and traditions of cities from Spain to Syria, the major exception being his harsh treatment of Jerusalem, which sparked the Third Jewish Revolt. Overall, the assembled evidence points to Hadrian's recognition of imperial munificence to cities as essential to the peace and prosperity of the empire. Boatwright's treatment of Hadrian and Rome's cities is unique in that it encompasses events throughout the empire, drawing insights from archaeology and art history as well as literature, economy, and religion.

World History Portage & Main Press

The quality of 'monumentality' is attributed to the buildings of few historical epochs or cultures more frequently or consistently than to those of the Roman Empire. It is this quality that has helped to make them enduring models for builders of later periods. This extensively illustrated book, the first full-length study of the concept of monumentality in Classical Antiquity, asks what it is that the notion encompasses and how significant it was for the Romans themselves in moulding their individual or collective aspirations and identities. Although no single word existed in antiquity for the qualities that modern authors regard as making up that term, its Latin derivation - from monumentum, 'a monument' - attests plainly to the presence of the concept in the mentalities of ancient Romans, and the development of that notion through the Roman era laid the foundation for the classical ideal of monumentality, which reached a height in early modern Europe. This book is also the first full-length study of architecture in the Antonine Age - when it is generally agreed the Roman Empire was at its height. By exploring the public architecture of Roman Italy and both Western and Eastern provinces of the Roman Empire from the point of view of the benefactors who funded such buildings, the architects who designed them, and the public who used and experienced them, Edmund Thomas analyses the reasons why Roman builders sought to construct monumental buildings and uncovers the close link between architectural monumentality and the identity and ideology of the Roman Empire itself.

Medical Latin in the Roman Empire Mark Twain Media

Assessment Prep for Common Core Reading is designed to help students acquire the skills and practice the strategies needed to successfully perform on CCSS assessments. U.S. States and Territories Maps, Grades 5 - 8 Mark Twain Media

Etymology is the study of word origins and development. It provides one of the easiest and most effective ways to build vocabulary, because knowledge of some common roots and prefixes makes possible the figuring out of new word meanings. English is compounded of several languages, primarily Anglo-Saxon (Germanic) and Latin. Their Latin influence persists notably in the names of English cities ending in "-caster" or "-chester," from the Latin "castra" meaning "encampment." This is the third book of a series that focuses on etymology from Latin and Greek. The texts are designed to aid in learning the definitions of specific, deconstructed words. The meanings of a series of "reusable" classical prefixes and roots are presented that facilitate the deciphering of multiple related words.

The Carolingians in Central Europe, Their History, Arts, and Architecture Rowman & Littlefield Publishers

Develop student 's vocabulary with weekly lessons and activities on word roots. Roman Art Mark Twain Media

This engaging text offers a brief, readable description of our common Western heritage as it began in the first human societies and developed in ancient Greece and Rome, then through the Middle Ages. Providing a tightly focused narrative and interpretive structure, Brian A. Pavlac covers the basic historical information that all educated adults should know. His joined terms "supremacies and diversities" develop major themes of conflict and creativity throughout history. The text is also informed by five other topical themes: technological innovation, migration and conquest, political and economic decision-making, church and state, and disputes about the meaning of life. Written with flair, this easily accessible yet deeply knowledgeable text provides all the essentials for a course on Western civilization.

Music and Philosophy in the Roman Empire Mark Twain Media

This book is an attempt to focus where pertinent on the Carolingian cultural inventory produced and assembled in the libraries, museums and architectural sites of Central Europe. This inventory allows conclusions which demonstrate the originality of the literary, artistic and architectural efforts.

Global History Regents Vocabulary Workbook Oxford University Press

Is music just matter of hearing and producing notes? And is it of interest just to musicians? By exploring different authors and philosophical trends of the Roman Empire, from Philo of Alexandria to Alexander of Aphrodisias, from the rebirth of Platonism with Plutarch to the last Neoplatonists, this book sheds light on different ways in which music and musical notions were made a crucial part of philosophical discourse. Far from being mere metaphors, notions such as harmony, concord and attunement became key philosophical tools in order to better grasp and conceptualise fundamental notions in philosophical debates from cosmology to ethics and from epistemology to theology. The volume is written by a distinguished international team of contributors.

Monumentality and the Roman Empire BRILL

This unit, designed for use with intermediate and junior high school students, centers on Ancient Rome and contains literature selections, poetry, writing ideas, curriculum connections to other subjects, group projects and more. The literary works included are: Ancient Rome / by Simon James.
