perfect; it's about giving it a try and feeling the benefits for your family.

[Exploring English](#) Abrams Books for Young Readers

Chaline discusses the metals, alloys, rocks, and organic minerals and gemstones that humans have used as the building blocks of civilization. Covering the economic, cultural, political and industrial history of each, he shows the effect of each on the scope and pace of human development, as well as the dangers posed by our exploitation of Earth's resources--

[Harry Potter: Crafting Wizardry](#) Arcadia Books

In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In [Experiments in Ethics](#), the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to

the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of “experimental philosophy,” provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Incorporated

Swedish cuisine is delicious, varied and often unexpected, and in this delightful book Margareta Schildt Landgren shares wonderful stories from her own Swedish kitchen along with over 100 fabulous recipes. Here Margareta includes both traditional and modern recipes, from Gravalax with Herbs and Swedish Meatballs to St Lucia Buns and Elderflower Cordial. The mouth-watering recipes are interspersed with captivating narrative on Sweden's food traditions, the development of regional cuisine, the importance of seasonal eating and celebration foods. Margareta's text is illustrated beautifully with stunning recipe and location

photography from Tine Guth Linse, as well as photographs from her own archive. This is essential reading for anyone with a passion for food or a love of Swedish culture.

Oil Painting for Beginners Bloomsbury Publishing

A classic tale of unlikely friendship featuring two lovable new characters. Every Monday, Professor Bumble and his fishy friend Beluga go swimming at the lake. One day, Otter warns them of a mysterious creature lurking in the depths—a beast that “could swallow a bear in one bite!” The ever-cautious Professor Bumble resigns himself to the safety of the shore, while bold Beluga decides to brave the water. But when Beluga’s bowl suddenly tips and he disappears into the lake, it is up to Professor Bumble to save his buddy and face the Monster of the Deep. This charming picture book features a comic friendship that will remind readers of such odd couples as Winnie-the-Pooh and Piglet or Frog and Toad, and leave them wishing for more adventures with Bumble and Beluga.

Drawing Lab for Mixed-Media Artists Amigurumi Creations from Khuc Cay's Little Hands

Woven textiles are produced by nearly all human societies. This volume investigates evidence for patterned textiles (that is, textiles woven with elaborate designs) that were produced by two early Mediterranean civilizations: the Minoans of Crete and the Mycenaeans of mainland Greece, that prospered during the Aegean Bronze Age, c. 3000 – 1200 BC, contemporary with Pharaonic Egypt. Both could boast of specialists in textile production. Together with their wine, oil, and art, Minoan and Mycenaean textiles were much desired as trade goods. Artistic images of their fabrics preserved both in the Aegean and in other parts of the Mediterranean show elaborate patterns woven with rich decorative detail and color. Only a few small scraps of textiles survive but evidence for their production is abundant and frescoes supply detailed information about a wide variety of now-lost textile goods from luxurious costumes and beautifully patterned wall hangings

and carpets, to more utilitarian decorated fabrics. A review of surviving artistic and archaeological evidence indicates that textiles played essential practical and social roles in both Minoan and Mycenaean societies.

Scandinavian Christmas Oxbow Books

Leibniz was probably the last universal scholar in modern times who made original and innovative achievements in all the essential fields of knowledge of his time: as a reform-oriented lawyer, a multilateral thinking diplomat, as a mathematician of infinitesimal calculus, as the inventor of a calculating machine and in the mining of horizontal wind power, as an organizer of science and as one of the first historians who strived for source-critical methodical objectivity. However, this baroque diversity can only be understood from the center of a monadological philosophy, which wants to establish the unity of scientific worldview and metaphysical concept of the world. It is distorted in the classical reception because only Leibniz the Theodicy was known. The topicality of Leibniz today consists in re-exposing the original basic idea of unity in diversity and asking how it can be made fruitful for philosophical and political thought in the 21st century. This book is a translation of the original German 1st edition Leibniz und die Folgen by Jörg Zimmer, published by J.B. Metzler, imprint of Springer-Verlag GmbH, part of Springer Nature in 2018. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.
