This book presents some twenty essays on different aspects of Islam in history and the present. These essays are grouped into eight larger sections. The first, "The Beginnings", deals with the transition from pre-Islamic understandings and reason, an essential part of the Quranic message. The next two sections deal with Islam specifically as a religion with its particular signs and symbols. The question of rules of interpretation in Islam and its structural features is discussed here. Sections four and five deal with ethics in Islam, including Muslim identity and human rights, and certain social functions of Islam. Section six introduces some 19th and 20th century reform movements, with special attention given to developments in Saudi Arabia and the "puritan" characteristics of present-day Islamic revival movements. The final two sections discuss contemporary issues: Islamization processes and policies, Islamic ideologies, the ideologization of Islam, and the political uses of religion. Throughout the book the author shows the links between the religious and other interpretations and uses made of Islam and the contexts in which they are made. The Introduction signals some important developments in Islamic studies since World War II.

After the Fall A common refrain heard since the collapse of the World Trade Center towers on September 11, 2001 is that "everything has changed." After the Fall presents a timely and provocative examination of the impact and implications of 9/11 and the war on terror on American culture and literature. Author Richard Gray — widely regarded as the leading European scholar in American literature — reveals the widespread belief among novelists, dramatists, and poets — as well as the American public at large — that in the post-9/11 world they are all somehow living "after the fall." He carefully considers how many writers, faced with what they see as the end of their world, have retreated into the seductive pieties of home, hearth, and family; and how their works are informed by the equally seductive myth of American exceptionalism. As a counterbalance, Gray also discusses in depth the many writings that "get it right" — transnational and genuinely crossbred works that resist the oppositional and simplistic "us and them" / "Christian and Muslim" language that has dominated mainstream commentary. These imaginative works, Gray believes, choose instead to respond to the heterogeneous character of the United States, as well as its necessary positioning in a transnational context. After the Fall offers illuminating insights into the relationships of such issues as nationalism, trauma, culture, and literature during a time of profound crisis.

What is religion? Can it be defined at all? Or is it too easily defined in far too many ways so as to make a "religion" a drifting signifier or whatever one's pleasure is? Does the study of religion require special, perhaps religious, tools of analysis and explanation? What is the difference between a knowledge of religion derived from practicing it and a knowledge about religion derived from nonreligious modes of inquiry? Sooner or later, any serious student of religion must face these questions if religious practices are to be investigated in the light of the terms and aims of the social and human sciences in the modern university. The Guide to the Study of Religion provides a map of the key concepts and thought-structures for imagining and studying religion as a class of everyday social practices that lend themselves to no more or less difficult explanation than any other class of social phenomena.

Drawing on trauma theory, genre theory, political theory, and theories of postmodernity, space, and temporality, Literature After 9/11 suggests ways that these often distinct discourses can be recombined and set into dialogue with one another as it explores 9/11's effects on literature and literature's attempts to convey 9/11.

The story of an enigmatic man through the voices of ten remarkable women who have loved him at one point in their lives. Each woman has succumbed, even if only for an hour, to that seductive, imprudent, and furtively feline man who drifted so naturally into their lives. Still clinging to the vivid memory of his warm breath and his indecipherable sentences, ten women tell their stories as they attempt to recreate the image of the unfathomable Nishino. Like a modern Decameron, this humorous, sensual, and touching novel by one of Japan's best-selling and most beloved writers is a powerful and embracing portrait of the human comedy in ten voices. Driven by desires that are at once unique and common, the women in this book are modern, familiar to us, and still mysterious. A little like Nishino himself... 'Forget the label "free trade agreement". The TPPA, under negotiation between New Zealand, the USA and ten other countries, is a direct assault on our right to decide our own future.' In this hard-hitting BWB Text, Professor Jane Kelsey picks apart the current negotiations surrounding the proposed Trans-Pacific Partnership Agreement (TPPA) and comes to some disturbing conclusions. Such a treaty, she says in this new work, has little credible economic rationale but could have potentially dangerous effects on our ability to decide for ourselves how we address the economic, environmental, social and Treaty challenges of the twenty-first century. At a time of constitutional review, the secrecy surrounding the TPPA negotiations raises hard questions about the future shape of New Zealand.

The rise and fall of the Japanese empire constitutes one of the most dramatic episodes of modern history. Within the short span of fifty years Japan grew out of political backwardness into a position of tremendous power. Japan's rise to power challenged Europe's hegemony over Asia, but, paradoxically, it was Japan's fall that caused the irreparable ruin of the colonial system over Eastern lands. Japan went to war against the West under the banner of Asia's liberation from European colonialism. In reality, for forty years, beginning with her first war against China, she had striven to imitate this colonialism, as she had endeavoured to imitate the political, military and economic achievements of Europe. A thorough understanding of the imitative character of the Japanese Empire might well have induced the leaders of the nation to side with the conservative trend of political thought in the Western world in order to maintain the existing world-wide political system of which colonial rule was an accepted part. They might have understood that an adventurous, revolutionary policy was bound to result in grave dangers for their own state and most conservative structure. Japan might have continued to grow and to expand if she had succeeded to play the role of the legitimate heir to Europe's decaying power in Asia. By violently opposing that power, she undermined the very foundations of her own rule outside the home-islands.

Tracing the Way is the product of a lifetime of experience. In researching and compiling this book Hans Kung has traveled to every corner of the globe in search of God in his many guises. Kung casts an analytical eye over the major world religions and offers a view of the present and what that means when measured against the past. Kung surveys, as succinctly as possible, the historical stages of each world religion and analyses their major paradigms and paradigm shifts. For the present can be understood only in the light of constellations from the past which have persisted side by side with each other Tracing the Way attempts to understand the religions as objectively as possible and discusses the social, political and historical contexts of the many forms of belief that exist today.
