The aim of the studies presented in this report is the implementation of rational concepts and testing procedures for the design and manufacture of bituminous materials for applications in pavement construction. Practical test procedures are recommended for binder evaluation, mix design and performance assessment of bituminous materials. The three main topics addressed are binder testing, mix design and mechanical testing of mixtures. Each is examined through interlaboratory tests and there is a literary review of existing practices and methods for the production of polymer modified binders, mixture design and the mechanical properties of mixtures.

In recent decades there has been an increasing interest in the study of food and drink in the ancient, Mediaeval and Byzantine worlds and of their supply and consumption. This volume presents selected papers from the biennial conference of the Australian Association for Byzantine Studies, which was held at the University of Adelaide, 11-12 July 2003. The theme was food and drink in Byzantium. Published selectively in the present volume, the papers of the conference are augmented by contributions from international scholars. While some papers address the use of food directly (children's diet, fasting) or tangentially (in love spells), or discuss philosophical approaches towards food (vegetarianism), other papers in this volume examine the topic from another perspective: the role and perception of food and drink - and their consumption - in society. Yet others examine issues of supply (military logistics) and the role it played in shaping Byzantium. This volume will appeal to readers interested in the history of food, in late antique and Byzantine society, in Byzantine rhetoric, in magic in late antiquity and in the Jews in early Byzantium.

Statistics for Lawyers presents the science of statistics in action at the cutting edge of legal problems. A series of more than 90 case studies, drawn principally from actual litigation, have been selected to illustrate important areas of the law in which statistics has played a role and to demonstrate a variety of statistical tools. Some case studies raise legal issues that are being intensely debated and lie at the edge of the law. Of particular note are problems involving toxic torts, employment discrimination, stock market manipulation, paternity, tax legislation, and drug testing. The case studies are presented in the form of legal/statistical puzzles to challenge the reader and focus discussion on the legal implications of statistical findings. The techniques range from simple averaging for the estimation of thefts from parking meters to complex logistic regression models for the demonstration of discrimination in the death penalty. Excerpts of data allow the reader to compute statistical results and an appendix contains the authors' calculations.

For anyone who ever stood in awe of a three-story-high dump truck or marveled at the engineering revolution propelling mechanical vehicles into the robotic age, *Ultra Haulers* presents the past, present, and future of the world's greatest haul trucks. From early rigid trucks and articulated dump trucks to tire technology and scraper tractors, *Ultra Haulers* details the innovations, evolutions, and revolutions in large-scale earthmoving equipment. Author Mike Woof, former editor-in-chief of *World Mining Equipment* magazine and current international editor for *E&MJ* and *Coal Age*, is a leading authority on mining

equipment, including the largest, most sophisticated factory-made equipment produced. The book incorporates original analysis, primary data, and firsthand commentary, putting an ear to the ground and a finger to the pulse of this dynamic and exciting field. Both knowledgeable hobbyists and industry veterans will enjoy Woof's sweeping overview, which is beholden to no one manufacturer, no one type of machine, and no one era, but to the entire field. With expert, prescient commentary, Woof's understanding of these machines and enthusiasm for the engineering triumphs they represent comes through on every page.

This is the first comprehensive work in English on the fifth-century Neoplatonic philosopher Hierocles. It contains a survey of his life, writings, and pagan and Christian surroundings, and examines the major tenets of his thought under the rubrics of contemplative philosophy, practical philosophy (civil and telestic), and providence. Schibli situates Hierocles in the mainstream of Neoplatonism from Plotinus to Damascius. Particularly helpful is the inclusion of a modern English translation of Hierocles' *Commentary on the Golden Verses of the Pythagoreans* and of the remnants of his treatise *On Providence*. The translations are fully annotated throughout.
