The new Edition of the report of the European Commission for the Efficiency of Justice (CEPEJ), which evaluates the functioning of the judicial systems in 45 Council of Europe's member states and an observer state to the CEPEJ, Israel, remains in line with the process carried out since 2002. Relying on a methodology which is already a reference for collecting and processing a wide number of quantitative and qualitative judicial data, this unique study has been conceived above all as a tool for public policy aimed at improving the efficiency and the quality of justice. To have the knowledge in order to be able to understand, analyse and reform, such is the objective of the CEPEJ which has prepared this report, intended for policy makers, legal practitioners, researchers as well as for those who are interested in the functioning of justice in Europe.

This book is the first comprehensive overview and evaluation of the origins, history and current size and condition of all of Iceland's major glaciers (including Vatnajökull, the largest in Europe) at the beginning of the twenty-first century. It is not only illustrated with many beautiful photographs and graphs of recent statistics and scientific data, but is also a collection of historical writings and drawings from annals, sagas, folk tales, diaries, reports, stories and poems, as it presents a unique approach to the study of glaciers on an island in the North Atlantic. Balancing and comparing the world of man with the world of nature, the perceptions of art and culture with the systematic and pragmatic analyses of science, The Glaciers of Iceland present a wide spectrum of readers with a new and stimulating view of the origins, development and possible future of these massive natural phenomena, as well as the study and role of glaciology, within specific time lines and geographical locations. Icelandic glaciers the author argues could prove essential for understanding the current unsettling progress of global warming. The glaciers of Iceland, therefore, aims at presenting to a wide readership an original, historical, cultural and scientific overview of these geophysical features in Iceland while also suggesting increasingly important lessons and models for man's future interaction with the world's glaciers as a whole.

Bulletin Du Bois OECD Publishing

Selon les estimations, environ 3 % de la population mondiale - soit 185 millions de personnes - consomment chaque année des drogues illicites, personnes qui vivent dans la quasi-totalité des pays du monde et viennent de tous les milieux. D'innombrables autres personnes participent à la production et au trafic de drogues illicites et plus nombreuses encore sont celles sur lesquelles pèse le coût économique et social faramineux de ce commerce. Ces individus vivent dans les pays développés ou dans les pays en développement, sont riches ou pauvres, en bonne santé ou malades, citoyens ou réfugiés; les drogues illicites constituent un phénomène véritablement mondial. Les analyses et les statistiques fiables sur la production, le trafic et la consommation des drogues sont rares, à cause tant de l'omniprésence que du caractère illicite et clandestin de ces substances. L'Office des Nations Unies contre la drogue et le crime (ONUDC) agissant en coopération avec les États Membres, a tenté de combler les lacunes. La première édition du nouveau Rapport mondial sur les drogues, en deux volumes, présente plus de données quantitatives que jamais pour augmenter les preuves factuelles disponibles dans un domaine où toute mesure est notoirement difficile. Cette année, l'analyse des tendances, dont certaines remontent à dix ans ou plus, est présentée dans le premier volume. Le second volume rassemble des statistiques détaillées. Pris ensemble, les deux volumes dressent un tableau complet de la situation actuelle en matière de drogues illicites.

Le Rapport mondial sur les drogues se propose à aider les États membres à mieux comprendre les tendances mondiales des drogues illicites et vise à sensibiliser l'ensemble des gouvernements à la nécessité de recueillir et de notifier de façon plus systématique les données concernant ces drogues illicites. L'ONUDC compte sur les États membres pour lui fournir les données dont il a besoin, principalement en répondant aux Questionnaire destiné à l'élaboration des rapports annuels. L'ONUDC a envoyé cette année 200 exemplaires de son Questionnaire; il a reçu 118 réponses à la section concernant l'abus de drogues, et 116 à celle qui concernait l'offre illicite. D'une manière générale, l'aptitude des États membres à fournir des informations sur l'offre de drogues illicites est très supérieure à sa capacité de fournir des données concernant la demande. En dépit de progrès louables, par exemple en ce qui concerne les estimations de prévalence, il reste encore beaucoup à faire pour pouvoir établir une base solide et fiable permettant l'analyse des tendances et des politiques suivies.
