Today ' s students are tomorrow ' s leaders, and the college years are a critical period for their development of ethical standards. Cheating in College explores how and why students cheat and what policies, practices, and participation may be useful in promoting academic integrity and reducing cheating. The authors investigate trends over time, including internet-based cheating. They consider personal and situational explanations, such as the culture of groups in which dishonesty is more common (such as business majors) and social settings that support cheating (such as fraternities and sororities). Faculty and administrators are increasing their efforts to promote academic honesty among students.

Orientation and training sessions, information on college and university websites, student handbooks that describe codes of conduct, honor codes, and course syllabi all define cheating and establish the consequences. Based on the authors ' multiyear, multisite surveys, Cheating in College quantifies and analyzes student cheating to demonstrate why academic integrity is important and to describe the cultural efforts that are effective in restoring it. -- Gary Pavela, Syracuse University
Connecting Lives and Learning MacMillan
This book details some of the most important and interesting questions raised about the NEC4 family of contracts and provides clear, comprehensive answers to those questions. Written by an NEC expert with over 20 years ' experience

using, advising and training others, the book has several distinctive features: It covers the whole NEC4 family. It is written by a very experienced NEC author who explains sometimes complex issues in a simple and accessible style. The questions and answers range from beginner level up to a masterclass level. The questions are real life questions asked by actual NEC practitioners on real projects. The book includes questions and answers relating to tendering, early warnings, programme issues, quality management, payment provisions, compensation events, liabilities, insurances, adjudication, termination and much more. It is essential reading for anyone working with the NEC4 family of contracts, whether professionals or students in construction, architecture, project management and engineering.

Public Examinations Examined World Bank

Publications

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the

development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations.

“ This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and

of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as “ the diploma disease † ? takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog. † ? Angela W. Little, Professor Emerita, Institute of Education, University College London “ This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings. † ? Mark Bray, UNESCO Chair

Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning

“ I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations. † ? Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

*absenteeism and beyond:
instructional time loss and
consequences* Oxford University
Press

Studies have shown that learning outcomes are related to the amount

of time students engage in learning tasks. However, visits to schools have revealed that students are often taught for only a fraction of the intended time, particularly in lower-income countries. Losses are due to informal school closures, teacher absenteeism, delays, early departures, and sub-optimal use of time in the classroom. A study was undertaken to develop an efficient methodology for measuring instructional time loss. Thus, instructional time use was measured in sampled schools in Tunisia, Morocco, Ghana, and the Brazilian state of Pernambuco. The percentage of time that students were engaged in learning vis-à-vis government expectations was approximately 39 percent in Ghana, 63 percent in

Pernambuco, 71 percent in Morocco, and 78 percent in Tunisia. Instructional time use is a mediator variable that is challenging to measure, so it often escapes scrutiny. Research suggests that merely financing the ingredients of instruction is not enough to produce learning outcomes; students must also get sufficient time to process the information. The quantity-quality tradeoff that often accompanies large-scale enrollments may be partly due to instructional time restrictions. Time wastage also distorts budgetary outlays and teacher salary rates. To achieve the Millennium Development Goals students must get more of the time that governments, donors, and

parents pay for.

Youth Employment Programs in Ghana
Routledge

Dilemma of a Ghost When Ato returns to Ghana from his studies in North America he brings with him a sophisticated black American wife. But their hopes of a happy marriage and of combining 'the sweetness and loveliest things in Africa and America' are soon shown to have been built on an unstable foundation.

Overview of Youth Development in Ghana
Springer Nature

This report presents the yearly assessment of global progress towards the Millennium Development Goals (MDGs), determining the areas where progress has been made, and those that are lagging behind. The report is based on a master set of data compiled by the Inter-Agency and Expert group on MDG indicators led by the

Statistics Division of the Department of Economic and Social Affairs.

The History of Education in Ghana World Bank Publications

Double-shift schooling primarily aims to extend access and minimize unit costs. However, some systems only achieve those goals at the expense of educational quality. Policy-makers may be faced by difficult choices when designing systems. This book highlights the advantages and problems of double-shift systems.

The Psychology of Arithmetic Springer

This book focuses on how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries. It deploys a new conceptual framework to show how the type of political settlement shapes the level of elite commitment and state capacity to improving learning outcomes.

Cheating in College World Bank Publications

In all parts of Asia, households devote considerable expenditures to private supplementary tutoring. This tutoring may contribute to students' achievement, but it also maintains and exacerbates social inequalities, diverts resources from other uses, and can contribute to inefficiencies in education systems. Such tutoring is widely called shadow education, because it mimics school systems. As the curriculum in the school system changes, so does the shadow. This study documents the scale and nature of shadow education in different

parts of the region. Shadow education has been a major phenomenon in East Asia and it has far-reaching economic and social implications.

World's Best Bank Ibadan University Press

Originally published in 1974, a comprehensive history of Nigerian Education, from early times right through to the time of publication, had long been needed by all concerned with Education in Nigeria, students, teachers and educational administrators. No one was better qualified than Professor Fafunwa to provide such a book, and in doing so he gave due emphasis to the beginnings of Education in its three main stages of indigenous, Muslim and

Christian Education. Nigerian Education had been considered all too often as a comparatively recent phenomenon, but this book points out from the start that 'Education is as old as Man himself in Africa' and that both Islam and Christianity were comparative newcomers in the field. A historical treatment of these three strands which have combined to make up the modern Educational system was vital to a clear understanding of what was needed for the future, and most of the first half of the book is concerned with these Educational beginnings. The imposing of a foreign colonial system on this framework did not always lead to a happy fusion of the systems, and the

successes and the failures are examined in detail. There was no shortage of documentary evidence in the form of reports and statistics during the decades prior to publication, but this evidence was frequently scattered and inaccessible to the student, so that the author's careful selection of key evidence and reports, often drawn from his own personal experience, will be invaluable for those wishing to trace the development of Education in Nigeria up to the early 1970s. A knowledge of the history and development of the Nigerian Education system, of the numerous and intensely varied personalities and beliefs which have combined and often conflicted to shape it, is indispensable to all students in colleges and universities studying to become teachers. It is this knowledge that Professor Fafunwa set out to provide, drawing on his wide experience as teacher writer and educationalist.

History of Education in Nigeria Graphic Communications Group
CONNECTING LIVES AND LEARNING is a project dedicated to connecting learning to student lives, connecting teachers with the latest middle years research, and better connecting primary and secondary schools to keep students at school longer. Based in Adelaide's lower socio-economic northern urban fringe, the project helps teachers use students' everyday experience and expertise to develop new ways of teaching and learning that involve students in intellectually challenging tasks. This book tells the stories of

real teachers, in real classrooms, making real attempts for change, and not always succeeding. It is a book about teachers making a difference in difficult times and tough places. But most importantly, this book reaffirms that being an educator is inherently about adopting socially just practices, building community capacity and contributing to a more socially sustainable world.

The ultimate guide to UX from the world's most popular resource for web designers and developers Smashing Magazine is the world's most popular resource for web designers and developers and with this book the authors provide the ideal resource for mastering User Experience Design (UX). The authors provide an overview of UX and User Centred Design and examine in detail sixteen of the most

common UX design and research tools and techniques for your web projects. The authors share their top tips from their collective 30 years of working in UX including: Guides to when and how to use the most appropriate UX research and design techniques such as usability testing, prototyping, wire framing, sketching, information architecture & running workshops How to plan UX projects to suit different budgets, time constraints and business objectives Case studies from real UX projects that explain how particular techniques were used to achieve the client's goals Checklists to help you choose the right UX tools and techniques for the job in hand Typical user and business requirements to consider when designing business critical pages such as

homepages, forms, product pages and mobile interfaces as well as explanations of key things to consider when designing for mobile, internationalization and behavioural change. Smashing UX Design is the complete UX reference manual. Treat it as the UX expert on your bookshelf that you can read from cover-to-cover, or to dip into as the need arises, regardless of whether you have 'UX' in your job title or not.

Logistics (Log) Training and Readiness (T&r) Manual SIAM

Anyone embarking on a research project for the first time is likely to be daunted by the research process and the huge array of seemingly impenetrable terminology. This user-friendly yet comprehensive book is divided into three sections. Tehmina Basit carefully guides the reader step-by-step

through the entire research process, from getting started and gathering data, to making sense of the data. Accessible and down-to-earth, *Conducting Research in Educational Contexts* will prove an invaluable resource for educational researchers everywhere.

Millennium Development Goals

Report 2015 Bloomsbury Academic

This book makes recommendations for how Ghana can mainstream youth issues in its development strategies, providing baseline evaluations of socio-economic issues that particularly affect the youth demographic, such as underemployment, a lack of access to quality education and poverty.

Basic Education Beyond the Millennium

Development Goals in Ghana

Commonwealth Secretariat

This book provides a comparative look at key issues that characterize and contextualize upper secondary science education in sixteen countries in Oceania, South America, Asia, Europe, North America, Africa, and the Middle East, including links with elementary and early science, final assessment, and the secondary/tertiary education interface.

The Early Years Foundation Stage

Routledge

This is an African retelling of Euripides: an unnervingly topical story of a people and a beloved city destroyed by the brutality of war. The play was first performed in Lagos in 2003 under the distinguished director

Chuck Mike, and subsequently toured the UK.

Smashing UX Design CreateSpace

Per references (a) through (g), this T&R Manual establishes training standards, regulations and practices regarding the training of Marines and sailors whose primary mission is logistics.

Daily Graphic World Bank Publications
Inequity is the central challenge facing basic education in Ghana and undercuts the potential contribution of basic education to Ghana's national development goals. Persistent disparities in education service delivery and inequitable allocation of resources in Ghana lead to highly inequitable educational outcomes. These inequities negatively affect system quality, efficiency

and accountability and ultimately undermine broader national development. Wide-spread inequity in education service delivery significantly depresses system learning outcomes. This report describes a “missing middle” in terms of learning outcomes: While a small number of children perform well, the majority of pupils (more than 60%) pass through primary school without becoming proficient in numeracy and literacy. Specifically, children from Ghana’s northern regions and deprived districts, poor and rural households and ethnic and linguistic minorities – students who require the most support to meet learning outcomes – receive, on average, disproportionately fewer resources from the government than their peers. Systemic inequities create this missing middle and drag down system performance. Following a decade of rapid change, as of 2013, more children are attending basic and senior high schools than at any time in the history of Ghana. In the past decade, Ghana has realized great growth, progress and change. Population growth, urbanization and significant GDP growth have changed the economic, political and social landscape of Ghana. In the past decade, incidence of extreme poverty has been cut in half. Introduction of Free, Compulsory, Universal Basic Education (FCUBE) and kindergarten has supported a near doubling of basic education enrollment in the past 15 years. Delivering basic education and ensuring equity has become more challenging. Compared to a decade ago, more stakeholders are involved in

allocating and managing core education inputs and accountability systems remain unclear and weak. Addressing the deeply embedded inequities (e.g. allocation of trained teachers, support to deprived districts and populations) is further complicated by a complex and fragmented policy, management and financing environment. The persistence of inequity reflects the persistence of conflicting sector interests and poses genuine policy dilemmas. However, recent experience shows that accelerating progress toward equity and quality basic education for all is possible. Several recent initiatives in Ghana point to the possibility of improving equitable resource allocation, strengthening social protection and providing additional support to improve learning outcomes. For

example, children with below-average learning outcomes in poorly resourced environments are likely to show measurable gains when provided additional support (e.g. instructional support, learning resources, management support, demand-side incentives).

Conducting Research in Educational Contexts
World Bank Publications

Unemployment and underemployment are global development challenges. The situation in Ghana is no different. In 2016, it was projected that, given the country's growing youth population, 300,000 new jobs would need to be created each year to absorb the increasing numbers of unemployed young people. Yet the employment structure of the Ghanaian economy has not changed much from several decades ago. Most jobs are low skill, requiring limited cognitive or technology

know-how, reflected in low earnings and work of lower quality. An additional challenge for Ghana is the need to create access to an adequate number of high-quality, productive jobs. This report seeks to increase knowledge about Ghana's job landscape and youth employment programs to assist policy makers and key stakeholders in identifying ways to improve the effectiveness of these programs and strengthen coordination among major stakeholders. Focused, strategic, short- to medium-term and long-term responses are required to address current unemployment and underemployment challenges. Effective coordination and synergies among youth employment programs are needed to avoid duplication of effort while the country's economic structure transforms. Effective private sector participation in skills development and employment programs is recommended. The report posits interventions

in five priority areas that are not new but could potentially make an impact through scaling up: (1) agriculture and agribusiness, (2) apprenticeship (skills training), (3) entrepreneurship, (4) high-yielding areas (renewable energy†“solar, construction, tourism, sports, and green jobs), and (5) preemployment support services. Finally, with the fast-changing nature of work due to technology and artificial intelligence, Ghana needs to develop an education and training system that is versatile and helps young people to adapt and thrive in the twenty-first century world of work.
