Paper crafters will

warmly welcome this first-of-its kind volume, which presents the richness and variety of a newly popular technique. Whether it's used in scrapbooks or on handmade cards, for decorative effects or functional bindings, stitched paper is found everywhere these days. The spectacular results are unique and impossible to achieve with just glue or folding. Explore a cornucopia of different papers and threads. Follow the clever tips for preventing delicate papers from tearing and for machine-stitching around curves. Best of all, you can create a beautiful baby mobile; a "family tree" to frame; and a "slipcover" for a bud vase. A Selection of the Crafters Choice Book Club.

In this bestselling modern classic, a young boy's lost mitten leads to a charming snowy adventure. Jan Brett's beautiful retelling makes a

perfect holiday gift. When Nicki drops his white mitten in the snow, he goes on without realizing that it is missing. One by one, woodland animals find it and crawl in; first, a curious mole, then a rabbit, a badger and others, each one larger than the last. Finally, a big brown bear is followed in by a tiny brown mouse and what happens next makes for a wonderfully funny climax. As the story of the animals in the mitten unfolds, the reader can see Nicki in the borders of each page, walking through the woods unaware of what is going on. In her distinctive style, Jan Brett brings the animals to life with warmth and humor, and her illustrations are full of visual delights and details faithful to the Ukrainian tradition from which the story comes. Jan Brett is also the creator of such wintery classics as *The Hat*, *The Snowy Nap*, *Three Snowy Bears*, *The Animal's Santa*, and *The Night Before Christmas*. This book is also available in Spanish, as *El mitón*.

Artistry in Paper Penguin

View the animal kingdom up close as never before in this breathtaking title, which has already sold over 1.5 million copies. Written by 70 specialists, it features stunning wildlife photography of more than 2000 of the world's most important wild mammals, birds, reptiles, amphibians, and insects. With around two million species identified to date, animals are the dominant and most varied form of life on the planet. Animal presents a representative selection, ranging from the giant baleen whale, to fast-moving

predators such as sharks, big cats, and birds of prey, as well as microscopic beetles barely 1mm long and other insects. It presents some of the latest species to be described: meet the cute but elusive olinguito from South America, which was only identified in 2013, or the skywalker hoolock gibbon that was named after a Star Wars character in 2017. Animal also explains how the earth's biodiversity is in sharp decline and the conservation projects underway to safeguard precious species. For each one, it gives a locator map and statistics, including its conservation status. For anyone who wants a reliable and enthralling reference, in which you can find the answers to everything - from why zebras are striped or how the sunbear got its name - Animal is your essential one-stop guide.
