droits nationaux de la famille. Sa signification théorique et politique dans l'Union est débattue par les auteurs, autant que son devenir. Loin de demeurer fragmentaire à côté des droits nationaux des États membres, il a probablement vocation à se densifier pour offrir aux citoyens et résidents européens un droit commun de la famille

au sein de l'Union. Family law, with its civil law tradition, and strong roots in the national cultures of the Member States, does not normally fall within the scope of European law. However, it is no longer possible to argue that family law is outside European law entirely. There are many aspects of the family which are subject to European

influence, to the point that the outlines of a «European family» are starting to emerge. This book is intended to highlight the European experience of family law and its substantive (i.e. European citizenship, EU social policy, EU civil service...) and private international law aspects. Union law therefore contains a form of

«special» family law which is shared between the Member States and supplements their national family laws. Its theoretical and political importance in the Union, as well as its future, are discussed by the authors. Far from remaining fragmented alongside the national laws of Member States, it will likely develop to offer

European citizens and residents a common family law within the EU. Debates in the Senate in Its Session of 1853-[1854]. Vols. for 1908-23 include: Bulletin bibliographique and Bulletin des sommaires. Index-catalogue of the Library ...
