**The Presidential Years** Prabhat Prakashan Journals and letters, translated from the original French, bring Michaux's work to modern readers and scientists Known to today's biologists primarily as the "Michx," at the end of more than 700 plant names, André Michaux was an intrepid French naturalist. Under the directive of King Louis XVI, he was commissioned to search out and grow new, rare, and never-before-described plant species and ship them back to his homeland in order to improve French forestry, agriculture, and horticulture. He made major botanical discoveries and published them in his two landmark books, *Histoire des ch ê nes de l ' Am é rique* (1801), a compendium of all oak species recognized from eastern North America, and *Flora Boreali-Americana* (1803), the first account of all plants known in eastern North America. Straddling the fields of documentary editing, history of the early republic, history of science, botany, and American studies, André Michaux in *North America: Journals and Letters, 1785 – 1797* is the first complete English edition of Michaux's American journals. This copiously annotated translation includes important excerpts from his little-known correspondence as well as a substantial introduction situating Michaux and his work in the larger scientific context of the day. To carry out his mission, Michaux traveled from the Bahamas to Hudson Bay and west to the Mississippi River on nine separate journeys, all indicated on a finely rendered, color-coded map in this volume. His writings detail the many hardships—debilitating disease, robberies, dangerous wild animals, even shipwreck—that Michaux endured on the North American frontier and on his return home. But they also convey the soaring joys of exploration in a new world where nature still reigned supreme, a paradise of plants never before known to Western science. The thrill of discovery drove Michaux ever onward, even ultimately to his

untimely death in 1802 on the remote island of Madagascar.

Glenn Gould (1932-1982) was a giant of twentieth-century classical music, but one whose eccentricities have sometimes obscured the moral seriousness of his approach to art. Countering this common misperception, *Partita for Glenn Gould* is an eloquent tribute to the artist that illuminates his versatile genius, his thinking, and our reasons for loving his art.

Are there lessons to learn from the manner Chinese companies have grown tenfold or more in their home markets, and pushed away competitors of all hues in the US, Europe, Asia and Africa? What drives China's international trade surplus, which was \$351 billion in 2018, while India ended the 2018-19 financial year with trade deficit of \$103 billion? Are we in India ready to learn and seize new opportunities as part of the overall objective to become a \$5-trillion economy? The Chinese invest hugely in understanding foreign cultures and markets while basking in the knowledge that their competitors and would-be allies are unlikely to make sufficient effort to understand them. This is one reason why Chinese manufacturers have broken into the Indian market, making brands like Xiaomi, Haier, Huawei, ZTE, and Lenovo household names in major cities. Hardly any Indian product, with the exception of Tata Motors' Jaguar, seen primarily as a British brand, has gained a foothold in China. However, huge opportunities exist and it is possible to both compete and collaborate with the Chinese on our own terms. Entrepreneurs like Rajendra S. Pawar, chairman of NIIT, have shown the way, spending years learning the Chinese way of doing business, going on to establish IT teaching facilities in nearly a hundred universities and institutions in China. Some Indian pharmaceutical companies are also making their mark in China. Running with the Dragon seeks answers about what Chinese companies are likely to do next to expand in the Indian market under different scenarios. Things are likely to change as the government is keen on removing stumbling blocks for Chinese investments amidst a decelerating economy. Indian businesses in different sectors will have to decide if they want to fight the new competition or collaborate with rivals. The book reflects the experience of over forty Indian and Chinese businesspeople, officials and experts besides the author's own analysis.

**(Regulation) Act, 2014** Simon and Schuster  
Description What exactly is 'Indian' food? Can it be classified by region, or religion, or ritual? What are the culinary commonalities across the Indian subcontinent? Do we Indians have a sense of collective self when it comes to cuisine? Or is the pluralism in our food habits and choices the only identity we have ever needed? Turmeric Nation is an ambitious and insightful project which answers these questions, and then quite a few more.

Through a series of fascinating essays—delving into geography, history, myth, sociology, film, literature and personal experience—Shylashri Shankar traces the myriad patterns that have formed Indian food cultures, taste preferences and cooking traditions. From Dalit 'haldiya dal' to the last meal of the Buddha; from aphrodisiacs listed in the Kama Sutra to sacred foods offered to gods and prophets; from the use of food as a means of state control in contemporary India to the role of lemonade in stoking rebellion in 19th-century Bengal; from the connection between death and feasting and between fasting and pleasure, this book offers a layered and revealing portrait of India, as a society and a nation, through its enduring relationship with food.

Written by IMF's Legal Department, this book outlines the key issues involved in designing and implementing orderly and effective insolvency procedures, which play a critical role in fostering growth and competitiveness and may also assist in the prevention and resolution of financial crises. The book draws on lessons learned from firsthand experience by some of the IMF's 182 member countries. It includes an analysis of the major policy choices that countries need to address when designing an insolvency system, a discussion of the advantages and disadvantages of these choices, and a number of specific recommendations.

Amma Bi is an elderly widow who lives alone in her deserted Lucknow haveli. Every afternoon, at precisely 3 o'clock, she hears the sound of unknown footsteps. Every afternoon, she peeks out ... but no one is there. In a state of growing panic, Amma Bi considers moving to an old people's home, before finally taking in a lodger -- a winsome young woman named Sabiha. Her arrival fills Amma Bi's lonely world with love and laughter, and Jumman, the household help, is transformed as well. When Sabiha finds herself in trouble, Amma Bi must draw on hidden reserves of skill and empathy in order to resolve the situation... Dopehri --

legendary film and theatre personality Pankaj Kapur's first novel -- is a wonderfully evocative work of great charm, wry humour and quiet power, a story that readers will fall in love with.

In 1492, Columbus Sailed to Slay a Jew. Landmark Cases in the Law of Contract Current Publications In the months leading up to Independence, in Delhi, Jawaharlal Nehru and Vallabhbhai Patel are engaged in deliberations with British Viceroy Dickie Mountbatten over the fate of the country. In Lahore, Sepoy Malik returns home from the Great War hoping to win his sweetheart Tara's hand in marriage, only to find divide-and-rule holding sway, and love, friendships, and familial bonds being tested. Set in parallel threads across these two cities, Lahore is a behind-the-scenes look into the negotiations and the political skulduggery that gave India its freedom, the price for which was batwara. As the men make the decisions and wield the swords, the women bear the brunt of the carnage that tears through India in the sticky hot months of its cruellest summer ever. Backed by astute research, The Partition Trilogy captures the frenzy of Indian independence, the Partition and the accession of the states, and takes readers back to a time of great upheaval and churn.

One of India's most influential columnists, and one not averse to controversy, Tavleen Singh was among the few mainstream 'Delhi' voices to see the Narendra Modi wave coming in 2014. In *Messiah Modi*, she details her early support for Modi the candidate, followed by a helpless disenchantment with Modi the PM and the cabinet he headed. She tells the story of his first term as it unfolded. From lynchings to demonetization up to Article 370, she gives an intimate account of her subject. In the 2019 verdict, and her own inability to get it right, she sees that she and her ilk have been swept to the margins of India; the masses of India speak in one voice, and that voice chants 'Modi'. And yet, there is a marked difference between her enthusiasm of 2014 and her acceptance of 2019 as she examines whether Modi delivered on the promises he made in his first term. Is he the messiah so many hoped he would be? This is Tavleen Singh's frank and forthright reckoning of Prime Minister Narendra Modi.

This book is a comprehensive, expert guide to doing business in China. Western technology, management expertise and capital have fueled an incredible expansion of China's economy. Trade with China is at an all time high and so are the numbers of Westerners travelling to China for business. Business from China has also picked up as Chinese firms look to expand abroad. Understanding the ins and outs of the confusing and often contradictory Chinese business culture can lend an enormous advantage. The Chinese Way in Business is an invaluable tool that teaches Westerners the basic Chinese philosophy of doing business and how to cultivate

strong personal relationships with Chinese business people and Chinese nationals. The author, Boye Lafayette De Mente worked in Asia for over thirty years as a journalist and business consultant and has long been considered an authority on East Asian business. In this book, he reveals the historical factors, collective traits and individual qualities that determine how the Chinese do business today, and the direction their economy will take in the future. His is a true insider's view—whether the topic is the legal framework for business development, or the importance of social relationships to successful business dealings in China. The book is broken into ten key parts: Introduction: The Land and the People—includes a overview of Chinese ethnicity and the languages of China Part One: Return of the Central Kingdom—an extensive overview of recent events and new technologies in China Part Two: The Historical Perspective—Chinese philosophy and the Chinese mindset from antiquity to modern times Part Three: Doing Business in China—A detailed analysis of the nuts and bolts of Chinese Business Part Four: Key Concepts in Chinese Business—Concepts native to China such as Guanxi (relationships) that drive Chinese business practice Part Five: Additional Business Vocabulary Part Six: Glossary of Useful Terms—designed for quick referencing Part Seven: Internet Gateways to China—An overview of the dynamic online world in China Part Eight: Miscellaneous Information—contains information about English Language Publications and Weather Patterns Part Nine: Learning Some New Skills—Classical Chinese techniques which might benefit Western business people City Milk Supply Penguin Random House India Private Limited Landmark Cases in the Law of Contract offers twelve original essays by leading contract scholars. As with the essays in the companion volume, *Landmark Cases in the Law of Restitution* (Hart, 2006) each essay takes as its focus a particular leading case, and analyses that case in its historical or theoretical context. The cases range from the early eighteenth- to the late twentieth-

centuries, and deal with an array of contractual doctrines. Some of the essays call for their case to be stripped of its landmark status, whilst others argue that it has more to offer than we have previously appreciated. The particular historical context of these landmark cases, as revealed by the authors, often shows that our current assumptions about the case and what it stands for are either mistaken, or require radical modification. The book also explores several common themes which are fundamental to the development of the law of contract: for instance, the influence of commercial expectations, appeals to 'reason' and the significance of particular judicial ideologies and techniques.

'People will leave. Even the good ones do. The music will stay.' This is what life has taught Ragini. A struggling music composer who left the world of Hindustani classical music in Delhi to do her own kind of music in Bangalore, Ragini is impulsive, emotional and often a little lost. The typical creative type - or so Andrew thinks. The head honcho at a mega Pharma company, Andrew is half-British, half-Indian and a full-on 'propah' pain. Even if he's gorgeous. The typical corporate type - or so Ragini thinks. He needs her to compose a song for the company's silver jubilee. She needs him (well, just his project really) to be able to keep doing her music. They can definitely do without the sparks they set off in each other. Or the highs and lows and all the conflicting notes that being together seems to bring. Because love is off the table for him. And music is her only love. Can two stubborn people from such different worlds ever find harmony together?

Mitochondria are far more than the "powerhouse" of the cell as they have classically been described. In fact, mitochondria biological activities have progressively expanded to include not only various bioenergetic processes but also important biosynthetic pathways, calcium homeostasis and thermogenesis, cell death by apoptosis, several different signal transduction pathways mainly related to redox control of gene

---

expression and so on. This functional and structural complexity may undergo important derangements so to justify the definition of ‘ mitochondrial medicine ’, which should include all the clinical consequences of congenital or acquired mitochondrial dysfunctions. There are actually a growing number of studies which assign a significant pathogenic role to damaged mitochondria in different diseases: ischemia/reperfusion injury, neurodegenerative diseases, cancer with its dramatic sequelae (i.e, metastasis), metabolic syndrome, hyperlipidemias, just to mention a few of the most important pathologies. In this context, a further aspect that should not be disregarded is the interaction of pharmacological agents with mitochondria, not only in regard of the toxicological aspects but, above all, of the potential therapeutic applications. In fact, it is interesting to note that, while the properties of different so-called “ mitoxicants ” are well-known, the subtle linkages between drugs and mitochondria is still in need of a real pharmacological and therapeutic control at the clinical level. This lack of consideration can often lead to an underestimation of unwanted toxic effects but also of desirable therapeutic activities. A reevaluation of the potential clinical role of mitochondria could give a new light on some yet obscure aspects of human pathophysiology.
