Cambridge University Press
Representing lawmakers and lawbreakers, artists and adventurers or scholars and activists, the women of Utah defied stereotypes.
At the crossroads

of the West, they found new challenges and opportunities to forge their own paths. Emma Dean explored the Rocky Mountains with her famous spouse, John Wesley Powell. Martha Hughes Cannon defeated her husband to become the first female state senator. Maud Fitch drove an ambulance under German artillery fire to rescue downed pilots in World War I. Author Emily Brooksby Wheeler celebrates the remarkable Utah women who,

whether racing into danger or nurturing those who fell behind, changed their world and ours.

Pharmacotherapeutics

McFarland ? In the last third of the 1800s, America was struck by a bicycle craze. This trend massively impacted the lives of women, allowing them greater mobility and changing perceptions of women as weak or in need of chaperons. This book traces the history and development of the American bicycle, observing its critical role in the fight for gender equality. The bicycle radically changed the face of fashion,

health and even morality and propriety in America. This thorough history traces the sweeping social advances made by women in relation to the development of the bicycle.

Cycling and the British Grand Central Publishing This book provides, in a single volume, an extensive, research-based evaluation of the most popular clinical assessment tools as applied in forensic settings. These widely used instruments often require important modifications in their

administration and interpretation when used for forensic purposes, and it is vital that the clinician is intimately familiar with their correct application, as well as their limitations. The test instruments included are analyzed by senior figures in the field of psychological assessment who are uniquely qualified to discuss them because they have either had a crucial role in the development of the tests, or they have dedicated their careers to advancing our understanding of these clinical

assessment measures. Each chapter begins with a summary of the development of the assessment instrument in its more traditional applications in clinical settings, and then considers its utilization in forensic settings. The types of forensic issues which have been addressed with that instrument are reviewed, and an illustrative case example is given which reflects the types of uses and limitations of the assessment technique when applied in a forensic context. New in this edition

are a chapter on the MMPI-2-RF and separate chapters for the adult and youth versions of the Hare Psychopathy Checklist. Psychologists using assessment instruments in applied forensic settings will find this to be a valuable and practical source of information, as will attorneys wishing to gain an understanding of the application of these psychological assessment approaches in the courtroom. Journal of the National Cancer Institute Indiana University Press

The fifth edition of the only comprehensive text dealing exclusively with rare or infrequently encountered malignancies in adults and children is an essential resource for any clinical oncologist. Encompasses all the information needed to diagnose and manage uncommon cancers, an area where advice and guidance is typically scarce Fully revised with new material and an evidence-based, teach-by-example approach Provides insight

on real-world decision making in the clinical setting Edited and authored by a highly experienced and senior team of medical oncologists, radiation oncologists, and other specialists, giving a balanced and complete overview Extensively illustrated in full color throughout, including heat maps to show gene expression

History of Lapeer County, Michigan
Saunders
Cycling is currently enjoying a boom in popularity.

What are the reasons behind this phenomenon? How have perceptions and the popularity of cycling shifted? This book charts the historical development of cycling both as a leisure and sporting activity since the 19th century and explores the wider political and cultural context in which cycling in Britain emerged. In particular, it examines cycling's relationship with environmental politics and its

place in popular culture. Neil Carter successfully traverses several historical sub-disciplines, including the history of transport, leisure, sport, medicine and politics, employing the analytical tools of class, gender, political culture, the role of the state and commercialism to demonstrate how British identity has shaped and been shaped by cycling. At a time when it has become part of debates over

transport and health, Cycling and the British: A Modern History provides a timely and clear analysis of the changes and continuities in attitudes towards cycling.

Why did the West become so rich? Why is inequality rising? How 'free' should markets be? And what does sex have to do with it? In this passionate and skilfully argued book, leading feminist

Victoria Bateman shows how we can only understand the burning economic issues of our time if we put sex and gender – 'the sex factor' – at the heart of the picture.

Spanning the globe and drawing on thousands of years of history, Bateman tells a bold story about how the status and freedom of women are central to our prosperity.

Genuine female empowerment requires us not only to recognize

the liberating potential of markets and smart government policies but also to challenge the double-standard of many modern feminists when they celebrate the brain while denigrating the body. This iconoclastic book is a devastating exposé of what we have lost from ignoring 'the sex factor' and of how reversing this neglect can drive the smart economic policies we need today.

A Description of

University of Illinois Press

The true story of a woman in Victorian London who murdered her lover's wife—and how her crime led some to believe she was Jack the Ripper. On October 24, 1890, a woman was discovered on a pile of rubbish in Hampstead, North London. Her arms were lacerated and her face bloodied; her head was severed from her body save a few sinews. Later that day, a blood-soaked stroller was found leaning against a residential gate, and the following

morning the dead body of a baby was found hidden underneath a nettle bush. So began the chilling story of the Hampstead Tragedy. Eventually, Scotland Yard knocked on the door of No. 2 Priory Street, home to Mary Eleanor Pearcey, the pretty 24-year-old mistress whose dying request was as bizarre and mysterious as her life. *Woman at the Devil's Door* is a thrilling look at this notorious murderer and the webs she wove.

The Spokeswoman

The story of how lost civilizations,

buried cities, and ancient scripts were rediscovered for the modern age, as seen through the lives and exploits of the great archaeologists who made these phenomenal finds. *The Great Archaeologists* takes the reader on a journey from the first attempt to establish just how ancient the "ancient past" really was, through the revelatory discovery of lost civilizations and unknown cultures, right up to today's search for explanations about the past. We meet

Thomsen and Worsaae, Danish researchers and rivals, and Sanz de Sautuola and Abbé Breuil, who astonished the world with their discoveries of cave art. Controversial figures such as Heinrich Schliemann and the Hungarian Aurel Stein, plunderer of ancient manuscripts from Central Asia, are given new assessments. Little-known pioneers such as Max Uhle in Peru and Li Chi in China are set beside the giants in the field—from Koldewey,

Dörpfeld, and Woolley in the Near East, to Louis and Mary Leakey, who transformed knowledge of our African ancestry. Other indomitable women include Gertrude Bell, Kathleen Kenyon, and the script-decipherer Tatiana Proskouriakoff. Brian Fagan has assembled a team of some of the world's greatest living archaeologists to write knowledgeably and entertainingly about their distinguished predecessors in this handsome volume, full of fascinating

anecdotes, personal accounts, and unexpected insights. American Decades: 1900-1909 John Wiley & Sons This richly illustrated textbook and atlas brings together high-quality, color photographs that highlight all the variations seen in colposcopic practice. Its unique organization highlights the correlations between cytology, colposcopy, and

histology, just as is needed when examining patients. Each chapter addresses a specific topic, from basic science to clinical colposcopy, written and edited by a well-known, recognized expert. Atlas images are incorporated into the text alongside relevant discussions, and descriptive graphics clarify topics such as low and high grade CIN, and cancer and

Charlie Chaplin
and A Woman of
Paris Indiana
University Press
Charlie Chaplin's
A Woman of
Paris (1923) was
a

groundbreaking film which was neither a simple recycling of Peggy Hopkins Joyce's story, nor quickly forgotten. Through heavily-documented "period research," this book lands several bombshells, including Paris is deeply rooted in Chaplin's previous films and his relationship with Edna Purviance, Paris was not rejected by heartland America, Chaplin did "romantic research" (especially with

Pola Negri), and Paris' many ongoing influences have never been fully appreciated. These are just a few of the mistakes about Paris.

World of Sports Indoor Wheeler Publishing, Incorporated McPhee, in prose distinguished by its warm humor, keen insight, and rich sense of human character, looks at the people who drive trucks, captain ships, pilot towboats, drive coal trains, and carry lobsters through the air: people who work

in freight transportation.

American Book Publishing Record University of Toronto Press

Possibly the first novel written by a black woman slave, this work is both a historically important literary event and a gripping autobiographical story in its own right.

Woman at the Devil's Door John Wiley & Sons

the society in which he lived."--BOOK JACKET.

Wheeler's Handbook of medicine Lynne Rienner Publishers
The Heart of a Woman offers the first-ever biography of Florence B. Price, a composer whose career spanned both the Harlem and Chicago Renaissances, and the first African American woman to gain national recognition for her works. Price's twenty-

five years in Chicago formed the core of a working life that saw her create three hundred works in diverse genres, including symphonies and orchestral suites, art songs, vocal and choral music, and arrangements of spirituals. Through interviews and a wealth of material from public and private archives, Rae Linda Brown illuminates Price's major works while exploring the considerable depth of her

achievement. Brown also traces the life of the extremely private individual from her childhood in Little Rock through her time at the New England Conservatory, her extensive teaching, and her struggles with racism, poverty, and professional jealousies. In addition, Brown provides musicians and scholars with dozens of musical examples.
