Alex just has to convince his mom to let him have an iguana, so he puts his arguments in writing. He promises that she won't have to feed it or clean its cage or even see it if she doesn't want to. Of course Mom imagines life with a six-foot-long iguana eating them out of house and home. Alex's reassurances: It takes fifteen years for an iguana to get that big. I'll be married by then and probably living in my own house. and his mom's replies: How are you going to get a girl to marry you when you own a giant reptile? will have kids in hysterics as the negotiations go back and forth through notes. And the lively, imaginative illustrations show their polar opposite dreams of life with an iguana.

**Letters of Introduction** Penguin

Women Letter-Writers in Tudor England represents one of the most comprehensive study of women's letters and letter-writing during the early modern period to be undertaken, and acts as an important corrective to traditional ways of reading and discussing letters as private, elite, male, and non-political. Based on over 3,000 manuscript letters, it shows that letter-writing was a larger and more socially diversified area of female activity than has been hitherto assumed. In that letters constitute the largest body of extant sixteenth-century women's writing, the book initiates a reassessment of women's education and literacy in the period. As indicators of literacy, letters yield physical evidence of rudimentary writing activity and abilities, document 'higher' forms of

female literacy, and highlight women's mastery of formal rhetorical and epistolary conventions. Women Letter-Writers in Tudor England also stresses that letters are unparalleled as intimate and immediate records of family relationships, and as media for personal and self-reflective forms of female expression. Read as documents that inscribe social and gender relations, letters shed light on the complex range of women's personal relationships, as female power and authority fluctuated, negotiated on an individual basis. Furthermore, correspondence highlights the important political roles played by early modern women. Female letter-writers were integral in cultivating and maintaining patronage and kinship networks; they were active as suitors for crown favour, and operated as political intermediaries and patrons in their own right, using letters to elicit influence. Letters thus help to locate differing forms of female power within the family, locality and occasionally on the wider political stage, and offer invaluable primary evidence from which to reconstruct the lives of early modern women.

Thinking English Grammar. To Honour Xavier Dekeyser, Professor Emeritus contains papers by 34 colleagues of professor Dekeyser on subjects that have interested him throughout his career. His research has mainly been devoted to the history of English, and it is only natural that the first and longest section should consist of 11 papers on variation in English, both diachronic and synchronic. The second, barely shorter with its 9 papers, is devoted to the description of various aspects of modern English; some of these papers shade off into theoretical linguistics. Professor Dekeyser having obtained his Ph.D. on grammaticography, there is a third section on "Grammar from the Past", with 5 papers. The final section, 9 papers on "Language Teaching and Contrast", honours the eminent teacher of literally thousands of budding anglicists.

### **I Wanna Iguana** A&C Black

A detailed introductory guide to every aspect of the advertising field, including the "why," "who," "where," and "what" -- with illustrations, glossary, index, and more.  
Discourse Analysis Walter de Gruyter  
During the last decade, sector wide crises in agriculture have rapidly followed each other, resulting in serious consumer concerns about the quality and safety of agri-food products. To prevent new crises, governments

have developed quality regulations and retailers have introduced quality management standards. However, concerns have been raised about the administrative burdens placed on firms, because they must comply with many private and public quality regulations. Therefore, both government and firms strive for more integration and self regulation of quality management systems. By combining managerial and economic theory, this study builds a framework to demonstrate the impact of integrated quality management on self regulation and performance. Using empirical evidence from the poultry meat, the fruit and vegetable and the flower and potted plant chains, this study shows that integrated quality management systems positively affect performance and self regulation. However, it is necessary to find committed partners that share the firm's quality objectives. In most cases, too strict enforcement of quality requirements is destructive, initiates conflict and does not lead to higher performance. Furthermore, governmental agencies should focus on innovative approaches to assure quality. Not legislation, but factors such as media attention and corporate social responsibility enlarge the integration of quality management systems. This book is recommended for a broad audience of professionals, practitioners and policy makers who concern themselves with the design, management and assessment of quality management and self regulation in agri-food supply chains.

Whether the Second Epistle of Paul to the Corinthians is a single document or a compilation of two or more, and the question of Paul's relations with the Corinthian church between the despatch of the First and the composition of the Second letter (or letters), have

been matters of debate since the eighteenth century. Margaret Thrall's commentary engages with these and all the other issues associated with 2 Corinthians. There follows a detailed verse-by-verse exegesis of chapters 1-7, which attempts to understand the viewpoint of the original readers of the text as well as Paul's own. This volume covers many of Paul's writings which have evoked considerable scholarly interest in recent years. This is an exemplary addition to the ICC series.

This study claims that Paul uses his personal example as an explicit literary strategy in 1 Corinthians, Galatians and Philippians, and as an arguably implicit strategy in 1 Thessalonians and Philemon. He uses his own example to ground and illustrate his argumentation in a rhetorically sophisticated manner, often structuring his argument on such a basis. In places a crisp statement of his own case serves as a thesis statement of the argument that follows (e.g., Rom. 1.17; Gal. 1.10), while at other times it serves to summarize the argument and to provide a transition to the next phase (especially in 1 Corinthians and Gal. 2.15-21). All the while Paul's self-portrayals in his letters serve not autobiographical or egoistic purposes but pedagogical and argumentative aims.
