Jo Nesbo, author of the number one bestselling Harry Hole series, is back with a tense and atmospheric thriller about two brothers bound together by dark secrets. When Roy and Carl's parents die suddenly, sixteen-year-old Roy is left as protector to his impulsive younger brother. But when Carl decides to travel the world in search of his fortune, Roy stays behind in their sleepy village, satisfied with his peaceful life as a mechanic. Some years later, Carl returns with his charismatic new wife, Shannon - an architect. They are full of exciting plans to build a spa hotel on their family land. Carl wants not only to make the brothers rich but the rest of the village, too. It's only a matter of time before what begins as a jubilant homecoming sparks off a series of events that threaten to derail everything Roy holds dear, as long-buried family secrets begin to rise to the surface... The Kingdom is a simmering and complex thriller full of unexpected twists,

devastating family legacies and an ever growing body count. *JONESBO HAS SOLD OVER 45 MILLION BOOKS WORLDWIDE*

A powerful Catalan author gives us a penetrating story of meaningless deaths and personal isolation, set in the heart of one of Spain's most beautiful, vibrant places. In sleepy Vidreres, a Catalonian village suffering a deadening recession, prostitutes sit along the highway and two teenage boys have just died a horrible death. After attending their funeral, a banker named Ernest heads out to the spot where their car collided with a tree -- a tree that he himself planted there. Trying to come to terms with the accident, he meets a brutish trucker named Miqui who takes him to two sweet whores. So begins Ernest's journey into the dark depths of this unfathomable loss. Meanwhile, Miqui has his own plans, which involve a striking young woman and his senile father's shotgun. Long recognized among Catalonia's leading authors, Toni Sala is at his dark, mischievous best, delivering a sinister, fast-moving tale laced with labyrinthine meditations worthy of Javier Marias. From Internet hookups and face transplants to tense standoffs, sexual fantasies, and the loss of the ones we hold most dear, Sala offers us a frighteningly contemporary vision of how alone we are in an age of unparalleled connectivity.

This book brings together technical expertise, best practices, case studies and ground-level application of the ideas for empowering the rural population of the world to live economically prosperous, environmentally sustainable, and socially progressive lives, on par or comparable with the quality of life enjoyed by the global urban

population. The idea of Smart Villages takes on greater urgency in light of the investments made in this millennium on “ Smart Cities ” , taking advantage of the technological advances, particularly in digital connectivity. These investments have and will continue to expand the urban-rural divide, unless similar investments are made in the villages as well. The book provides a much-needed guide for a holistic development of a Smart Village, by defining the need, developing the framework, and describing the delivery, complete with successful case studies. Contributors to the book, from Canada, USA, Africa and India bring years of academic, industry and governmental experience, including organization of several Smart Village conferences. The knowledge base in the book will be of great value to anyone interested in or active in rural planning, including governmental and non-governmental organizations, industrial solution providers, public healthcare professionals, public policy professionals and students, as well as rural communities around the world. Consolidates all the aspects of creating/developing a Smart Village; Delivers an effective tool-kit for practitioners in the area of Smart Villages; Provides a policy-based framework for the development of an ideal Smart Village; Illustrates, through case studies, the fulfillment of key requirements of a Smart Village; Brings together experts from around the world to share their vision of a Smart Village; Highlights the importance of balancing development with social/gender equity and cultural traditions.

Former insider turned critic Wendy Liu busts the myths of the tech industry, and offers a galvanising argument for why and how we must reclaim technology's potential for the public good. Former insider turned critic Wendy Liu busts the myths of the tech industry, and offers a galvanising argument for why and how we must reclaim technology's potential for the public good. "Lucid, probing and urgent. Wendy Liu manages to be both optimistic about the emancipatory potential of tech and scathing about the industry that has harnessed it for bleak and self-serving ends." -- Naomi Klein, author of *On Fire: The Burning Case for a Green New Deal* "An inspiring memoir manifesto...Technologists all over the world are realizing that no amount of code can substitute for political engagement. Liu's memoir is a road map for that journey of realization." --

Cory Doctorow, author of *Radicalized* and *Little Brother* Innovation. Meritocracy. The possibility of overnight success. What's not to love about Silicon Valley? These days, it's hard to be unambiguously optimistic about the growth-at-all-costs ethos of the tech industry. Public opinion is souring in the wake of revelations about Cambridge Analytica, Theranos, and the workplace conditions of Amazon workers or Uber drivers. It's becoming clear that the tech industry's promised "innovation" is neither sustainable nor always desirable. *Abolish Silicon Valley* is both a heartfelt personal story about the wasteful inequality of Silicon Valley, and a rallying call to engage in the radical politics needed to upend the status quo. Going beyond the idiosyncrasies of the individual founders and companies that characterise the industry today, Wendy Liu delves into the structural factors of the economy that gave rise to Silicon Valley as we know it. Ultimately, she proposes a more radical way of developing technology, where innovation is conducted for the benefit of society at large, and not just to enrich a select few.

This book explores “ making ” in the school curriculum in a period in which the ability to create and respond to digital artifacts is key and focuses on makerspaces in educational settings. Combining the arts with design to give a fuller picture of the engagement and wonder that unfolds with maker literacies, the book moves across such settings and themes as: Creativity and writing in classrooms Making and developing civic engagement Emotional experiences of making Race and gender in makerspace Game-based play and coding in schools and draws its case studies from the Netherlands, Finland, Canada, Australia, the United Kingdom, and the United States. Giving as broad a perspective on makerspaces, making, and design as possible, the book will help scholars expand their

understandings and help educators appreciate the power and worth of making to inspire students. It is useful for anyone hoping to apply design, maker, and makerspace approaches to their teaching and learning.

It is difficult to imagine a world without the car, and yet that is exactly what Dennis and Urry set out to do in this provocative new book. They argue that the days of the car are numbered: powerful forces around the world are undermining the car system and will usher in a new transport system sometime in the next few decades. Specifically, the book examines how several major processes are shaping the future of how we travel, including: Global warming and its many global consequences Peaking of oil supplies Increased digitisation of many aspects of economic and social life Massive global population increases The authors look at changes in technology, policy, economy and society, and make a convincing argument for a future where, by necessity, the present car system will be re-designed and re-engineered. Yet the book also suggests that there are some hugely bleak dilemmas facing the twenty first century. The authors lay out what they consider to be possible 'post-car' future scenarios. These they describe as 'local sustainability', 'regional warlordism' and 'digital networks of control'. After *The Car* will be of great interest to planners, policy makers, social scientists, futurologists, those working in industry, as well as general readers. Some have described the 20th Century as the century of the car. Now that century has come to a close – and things are about to change.

In *The Return of the Real* Hal Foster discusses the development of art and theory since 1960, and reorders the relation between prewar and postwar avant-gardes. Opposed to the assumption that contemporary art is

somehow belated, he argues that the avant-garde returns to us from the future, repositioned by innovative practice in the present. And he poses this retroactive model of art and theory against the reactionary undoing of progressive culture that is pervasive today. After the models of art-as-text in the 1970s and art-as-simulacrum in the 1980s, Foster suggests that we are now witness to a return to the real—to art and theory grounded in the materiality of actual bodies and social sites. If *The Return of the Real* begins with a new narrative of the historical avant-gard, it concludes with an original reading of this contemporary situation—and what it portends for future practices of art and theory, culture and politics.

'Liquid life' is the kind of life commonly lived in our contemporary, liquid-modern society. Liquid life cannot stay on course, as liquid-modern society cannot keep its shape for long. Liquid life is a precarious life, lived under conditions of constant uncertainty. The most acute and stubborn worries that haunt this liquid life are the fears of being caught napping, of failing to catch up with fast moving events, of overlooking the 'use by' dates and being saddled with worthless possessions, of missing the moment calling for a change of tack and being left behind. Liquid life is also shot through by a contradiction: it ought to be a (possibly unending) series of new beginnings, yet precisely for that reason it is full of worries about swift and painless endings, without which new beginnings would be unthinkable. Among the arts of liquid-modern living and the skills needed to practice them, getting rid of things takes precedence over

their acquisition. This and other challenges of life in a liquid-modern society are traced and unravelled in the successive chapters of this new book by one of the most brilliant and original social thinkers of our time.

Journey of Hope... North Atlantic Books

Now in Currency paperback -- Sally Helgesen's classic study of female leaders and how their strategies represent a highly successful revision of male leadership styles. Sixty thousand copies in print! In her bestselling 1990 book, Sally Helgesen discovered that men and women approach work in fundamentally different ways. Many of these differences hold distinct advantages for women, who excel at running organizations that foster creativity, cooperation, and intuitive decision-making power, necessities for companies of the twenty-first century. Helgesen's findings reveal that organizations run by women do not take the form of the traditional hierarchical pyramid, but more closely resemble a web, where leaders reach out, not down, to form an interrelating matrix built around a central purpose. The strategy of the web concentrates power at the center by drawing others closer and by creating communities where information sharing is essential. She presents her findings through unique, closely detailed accounts of four successful women business leaders -- Frances Hesselbein of Girl Scouts USA, Barbara Grogan of Western Industrial Contractors, Nancy Badore of Ford Motor Company's Executive Development Center, and Dorothy Brunson of Brunson Communications. Helgesen observes their meetings, listens to their phone calls and conferences, and reads their correspondence. Her "diary studies" document how women leaders make decisions, schedule their days, gather and disperse information, motivate others, delegate tasks, structure their

companies, hire, and fire. She chronicles how their experiences as women -- wives, mothers, friends, sisters, daughters -- contribute to their leadership style.
