What will it take to create a more gender-balanced workplace?
If you read nothing

else on leadership and gender at work, read these 10 articles by experts in the field. We've combed through hundreds of articles in the Harvard Business Review archive and selected the most important ones to help you understand where gender equality is today--and how far we still have to go. This book will inspire you to: Better understand the path women must take to leadership Learn the root causes of the barriers that exist for women in the workplace Check your own gender biases and distinguish between confidence and competence in

your colleagues
Manage a more
effective gender-
diversity program
Recognize the issues
women face when
speaking up about
bias or harassment
Help women reenter
the workforce after
taking time off--and
create opportunities
for them to reach their
ambitions. This
collection of articles
includes "Women and
the Labyrinth of
Leadership," by Alice
H. Eagly and Linda L.
Carli; "Do Women
Lack Ambition?" by
Anna Fels; "Women
Rising: The Unseen
Barriers," by
Herminia Ibarra,
Robin Ely, and
Deborah Kolb;
"Women and the
Vision Thing," by
Herminia Ibarra and
Otilia Obodaru; "The
Power of Talk: Who
Gets Heard and

Why," by Deborah
Tannen; "The Memo
Every Woman Keeps
in Her Desk," by
Kathleen Reardon;
"Why Diversity
Programs Fail," by
Frank Dobbin and
Alexandra Kalev;
"Now What?" by Joan
C. Williams and
Suzanne Lebsock;
"The Battle for
Female Talent in
Emerging Markets,"
by Sylvia Ann
Hewlett and Ripa
Rashid; "Off-Ramps
and On-Ramps:
Keeping Talented
Women on the Road
to Success," by Sylvia
Ann Hewlett and
Carolyn Buck Luce;
and "Sheryl Sandberg:
The HBR Interview,"
by Sheryl Sandberg
and Adi Ignatius.

Within the past
two decades,
extraordinary
new functions
for the
nucleolus have
begun to
appear, giving
the field a new
vitality and
generating
renewed
excitement and
interest. These
new
discoveries
include both ne
wly-discovered
functions and
aspects of its
conventional
role. The
Nucleolus is
divided into
three parts:
nucleolar

structure and organization, the role of the nucleolus in ribosome biogenesis, and novel functions of the nucleolus.

To Suffer Thy Comrades

National Academies Press
Tehran's ability to fight by, with and through third parties in foreign jurisdictions has become a valuable and effective sovereign capability that gives Iran

strategic advantage in the region. Tehran has possessed a form of this capability since the Islamic Revolution in 1979, but its potency and significance have risen sharply in the past decade, to the point where it has brought Iran more regional influence and status than either its nuclear or ballistic-missile programmes. The IISS Strategic

Dossier Iran's Networks of Influence provides an understanding of how Iran builds, operates and uses this capability. Based on original field research, open-source information and interviews with a range of sources, the dossier conducts an audit of Iran's activities in the principal regional theatres of Iraq, Lebanon,

Syria and Yemen, and its reach into Bahrain, Saudi Arabia and Kuwait. It includes an examination of Tehran's nurturing of groups such as the Houthis in Yemen, the Badr Organisation in Iraq, Hizbullah in Lebanon and Shia militias in Syria, and details related to recruitment, weapons supply, logistics and command-and-control

systems. Iran's Networks of Influence is intended through objective, fact-based analysis to inform both policymakers and practitioners, and to stimulate debate on the wider significance of Iran's use of third-party partners and the strategic depth they afford Tehran. The dossier also examines the advantages that Iran

possesses through its recent experience of conflict, and its ability to mobilise and deploy sympathetic Shia communities across theatres. In a time of rising tension in the region, the dossier looks at how Iran might further develop the use of its partnership capability and the risks and constraints it might face.

The Philippines Royal Botanic Gardens Kew Since the beginning of anti-government protests in March 2011, Syrian security forces have killed more than 4,000 protesters, injured many more, and arbitrarily arrested tens of thousands across the country, subjecting many of them to torture in detention. The security forces have committed these abuses as part of a widespread and systematic attack against the civilian population, which means they therefore constitute crimes against humanity. Based on interviews with more than 60 defectors from Syria's armed forces and intelligence agencies, this report focuses on the individual and

command responsibility of Syrian military commanders and intelligence officials for these crimes. Human Rights Watch names commanders and officials who gave both direct and standing orders to use lethal force against the protestors as well as to unlawfully arrest, beat, and torture the detainees. The report concludes that senior military and civilian leadership, including President Bashar al-Assad and the heads of the intelligence agencies, bear command responsibility for violations committed by their subordinates to the extent that they knew or should have known of the abuses but failed to take action to stop them. Given Human Rights

Watch's conclusion that crimes against humanity have been committed in Syria, the pervasive climate of impunity for security forces and pro-government militias, and the grave nature of many of their abuses, Human Rights Watch believes that the United Nations Security Council should refer the situation in Syria to the International Criminal Court (ICC). HBR's 10 Must Reads on Women and Leadership (with bonus article "Sheryl Sandberg: The HBR Interview") Jones & Bartlett Learning Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative

assessment of global political rights and civil liberties. The survey ratings and narrative reports on 194 countries and 14 territories are used by policymakers, the media, international corporations, civic activists, and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. In *de Olde Worlde* Routledge Disarmament, Demobilization, and Reintegration (DDR) and Security Sector Reform (SSR) have emerged in recent years as promising though generally poorly understood mechanisms for consolidating

stability and reasserting state sovereignty after conflict. Despite the considerable experience acquired by the international community, the critical interrelationship between DDR and SSR and the ability to use these mechanisms with consistent success remain less than optimally developed. The chapters in this book reflect a diversity of field experience and research in DDR and SSR, which suggest that these are complex and interrelated systems, with underlying political attributes. Successful application of DDR

and SSR requires the setting aside of preconceived assumptions or formulas, and should be viewed flexibly to restore to the state the monopoly of force. *Compliant Rebels* HSRC Press Use of and trade in wildlife is a fact of life for human society around the globe. Article IV of the CITES Convention requires that exporting countries restrict trade in Appendix II species to levels that are not detrimental either to species? survival, or to their role within the ecosystems in which they occur (known as the ?non-

detriment finding?).
Based on two

Hybrid Actors
IUCN
Influential armed
groups continue to
confound
policymakers,
diplomats, and
analysts decades
after their
transformational
arrival on the
scene in the
Middle East and
North Africa. The
most effective of
these militias can
most usefully be
understood as
hybrid actors,
which
simultaneously
work through,
with, and against
the state. This
joint report from

The Century
Foundation
identifies the
factors that make
some hybrid actors
persistent and
successful, as
measured by
longevity,
influence, and
ability to project
power militarily as
well as politically.
It finds that three
factors correlate
most closely with
impact: constituent
loyalty, resilient
state relationships,
and coherent
ideology. The
authors of this
report examined
cases in Lebanon,
Syria, and Iraq,
drawing on years
of fieldwork, to
distinguish hybrid

actors, classic nonstate proxies, and aspirants to statehood--all of which merit different analytical and policy treatment. The report demonstrates the ways that groups can shift along a spectrum as they adapt to changing conditions.

The Revolution Falters Asian Development Bank This book is the most up to date and thorough account of the natural history of the plants that comprise the most important food crop on Earth, the grasses and grasslands. Freedom in the

World 2014 SEAP Publications The link between security and development has been rediscovered after 9/11 by a broad range of scholars. Focusing on Southern Africa, the Security-Development Nexus shows that the much debated linkage is by no means a recent invention. Rather, the security/development linkage has been an important element of the state policies of colonial as well as post-colonial regimes during the Cold War, and it seems to be prospering in new configurations under the present wave of democratic

transitions. Contributors focus on a variety of contexts from South Africa, Mozambique and Namibia, to Zimbabwe and Democratic Congo; they explore the nexus and our understanding of security and development through the prism of peace-keeping interventions, community policing, human rights, gender, land contests, squatters, nation and state-building, social movements, DDR programmes and the different trajectories democratization has taken in different parts of the region. The Miombo in Transition Bentham

Science Publishers
This new release presents the wealth of information gleaned about nonhuman primates nutrition since the previous edition was published in 1978. With expanded coverage of natural dietary habits, gastrointestinal anatomy and physiology, and the nutrient needs of species that have been difficult to maintain in captivity, it explores the impact on nutrition of physiological and life-stage considerations: infancy, weaning, immune function, obesity, aging, and more. The committee also discusses issues of environmental enrichment such as opportunities for foraging. Based on the world's scientific

literature and input from authoritative sources, the book provides best estimates of nutrient requirements. The volume covers requirements for energy: carbohydrates, including the role of dietary fiber; proteins and amino acids; fats and fatty acids; minerals, fat-soluble and water-soluble vitamins; and water. The book also analyzes the composition of important foods and feed ingredients and offers guidelines on feed processing and diet formulation. Polar Bears Zed Books Ltd. On August 26, 2011, a suicide bomber drove a vehicle-borne improvised explosive device (VBIED) into the United Nations

(U.N.) headquarters in Abuja, Nigeria, killing 23 people and injuring more than 80 others.¹ Responsibility for the bombing, one of the deadliest in the United Nations' history, was claimed by Boko Haram, an Islamist religious sect turned insurgent group based in the predominantly Muslim northern Nigeria. While this attack occurred inside Nigerian borders, it was the first time Boko Haram had targeted an international, non-Nigerian entity. The Alawis of Syria MDPI This User ' s Guide is intended to support the design, implementation,

analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User ' s Guide was created by researchers affiliated with AHRQ ' s Effective Health

Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

Functional Neurologic Disorders Century Foundation Press

This Selected Issues paper describes Uganda's experience under the 2013 Policy Support Instrument (PSI).

The current 2013 PSI was approved by the IMF's Executive Board in June 2013 with an initial duration of three years. Overall, performance under this PSI has been assessed to be satisfactory. Most quantitative assessment criteria were met, and macroeconomic stability maintained.

However, the pace of structural reforms slowed down compared with the past, and only about half of the structural benchmarks were ultimately met. The experience

shows the importance of ensuring commitment to the reforms, explaining them better, and getting broad-based buy-in to achieve progress.

Registries for Evaluating Patient Outcomes Cambridge University Press

This handbook aims at focusing on the husbandry of the common water buffalo, (*Bubalis bubalis*). The book covers a broad range of topics such as the buffalo's genetic evolution, cytogenetics, subspecies, breed diversification, feeding and metabolic specificity, adaptable response to environmental stress

factors, welfare, dairy requirements and production, reproduction and embryo technologies, cryopreservation, sperm cell sexing, somatic cell cloning and transgenesis. Chapters presented and reviewed in this book have been by contributed by renowned scientists that have devoted years of research to the understanding of this species, and highlight the most recent advances in basic and applied science to unveil the understanding of physiological facets intrinsic to this animal species. The depth of the selected topics makes this book especially suited for readers of all academic levels of study. Researchers, students and

professionals will find this book a useful guide to breeding and farming the water buffalo. The Buffalo (Bubalus bubalis) - Production and Research Government Printing Office These 15th Proceedings provide an overview of the ongoing research and management activities on polar bears in the circumpolar Arctic. Together with the previous 14 proceedings, they provide an historic record of the international effort in protecting, studying, and managing polar bears. The document addresses

more recent concerns of threats arising as a consequence of increased human activities in both the Arctic and in regions far beyond the Arctic. Previous proceedings included a Status Report for each of the world's subpopulations, which focused largely on the known or unknown status as it related to harvest. In the Status Report of the 15th Proceedings, we provide a more comprehensive assessment of all threats to the status of each polar bear subpopulation. Uganda Rowman & Littlefield Publishers From clean drinking

water, to seat belts, to immunizations, the impact of public health on every individual is undeniable. For undergraduates, an understanding of the foundations of public health is an essential step toward becoming an educated citizen. Public Health 101 provides a big-picture, population perspective on the determinants of health and disease and the tools available to protect and promote health. It examines the full range of options for intervention including use of the healthcare system, the public health system, and society-wide systems such as laws and taxation.

Functional Neurologic Disorders, the latest volume in the Handbook of Clinical Neurology series, summarizes state-of-the-art research findings and clinical practice on this class of disorders at the interface between neurology and psychiatry. This 51-chapter volume offers an historical introduction, chapters on epidemiology and pathophysiology, a large section on the clinical features of different type of functional neurologic symptoms and disorders (including functional movement disorders, non-epileptic seizures, dizziness, vision, hearing, speech and cognitive symptoms), and then concluding with approaches to therapy. This group of

internationally acclaimed experts in neurology, psychiatry, and neuroscience represent a broad spectrum of areas of expertise, chosen for their ability to write clearly and concisely with an eye toward a clinical audience. This HCN volume sets a new landmark standard for a comprehensive, multi-authored work dealing with functional neurologic disorders (also described as psychogenic, dissociative or conversion disorders). Offers a comprehensive interdisciplinary approach for the care of patients with functional disorders seen in neurologic practice, leading to more efficient prevention, management, and

treatment Provides a synthesis of research efforts incorporating clinical, brain imaging and neurophysiological studies Fills an existing gap between traditional neurology and traditional psychiatry Contents include coverage of history, epidemiology, clinical presentations, and therapy Edited work with chapters authored by leaders in the field, the broadest, most expert coverage available
