In the summer of 1941, the Atlantic Charter marked the first of many meetings between President Franklin Roosevelt and Prime Minister Winston Churchill. The Charter laid out eight articles promoting ideals such as equality among nations and promising post-war freedom of the seas. It was ironic that in a conference concerning war aims, the United States was still a neutral country and the British were far from sure they could win the war against Germany.

Man Making (MM) is important and is required in the realm of the human existence only; Other animals need no separate making of them. They go by their respective instinct only; no conscious effort directed at changing the course to follow and to nurture one's ways of the traits. All cows are more or less the same. Every individual human is discreet. Swami Vivekananda, the saint savant of the late 19th CEE from India, presented before the western world the need for exchange of knowledge of their material science for the spirit and the purpose of living emanating from the ancient wisdom of India. But for Man Making human existence in this world is incomplete to say the least. There remains the scope for the acceptance in both hands of both the phenomenal and the transcendental. The exchange has become more important today in view of the strife torn separatism prevailing.

The peerless young Kovalan leaves his loyal wife Kannaki for the courtesan Madhavi, and though he returns to her, he still meets his death because of her ill-omened ankle bracelet. The Shilappadikaram has been called an epic and even a novel, but it is also a book of general education. Adigal packed his story with information: history merging into myth, religious rites, caste customs, military lore, descriptions of city and country life. And four Cantos are little anthologies of the poetry of the period (seashore and mountain songs, hunters and milkmaid s song). Thus the story gives us a vivid picture of early Indian life in all its aspects.

Vladimir Lenin created this hugely significant Marxist text to explain fully the inevitable flaws and destructive power of Capitalism: that it would lead unavoidably to imperialism, monopolies and colonialism. He prophesied that those third world countries used merely as capitalist labour would have no choice but to join the Communist revolution in Russia. GREAT IDEAS. Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.

The Tempest is a comedy written by William Shakespeare. It is generally dated to 1610-11 and accepted as the last play written solely by him, although some scholars have argued for an earlier dating. While listed as a comedy in its initial publication in the First Folio of 1623, many modern editors have relabelled the play a romance

The great French zoologist Lamarck (1744-1829) was best known for his theory of evolution, called 'soft inheritance', whereby organisms pass down acquired characteristics to their offspring. Originally a soldier, Lamarck later studied medicine and biology. His distinguished career included admission to the French Academy of Sciences (1779), and appointments as Royal Botanist (1781) and as professor of zoology at the Musée Nationale d'Histoire Naturelle in 1793. Acknowledged as the premier authority on invertebrate zoology, he is credited with coining the term 'invertebrates'. In this 1809 work, translated into English in 1914, he outlines his theory that under the pressure of different external circumstances, species can develop variations, and that new species and genera can eventually evolve as a result. Darwin paid tribute to Lamarck as the man who 'first did the eminent service of arousing attention to the probability of all change ... being the result of law'.

Filippo and Caroline Osella, anthropologists who spent three years in rural Kerala, south India, write about the modern search for upward social mobility: the processes involved, the ideologies that support or thwart it, and what happens to the people involved. They focus on the caste called Izhavas, a group that in the mid-19th century consisted of a small land-owning and titled elite and a large mass of landless and small tenants who were largely illiterate and considered untouchable, and who eked out a living by manual labor and petty trade. In the 20th century, Izhavas pursued mobility in many social arenas, both as a newly united caste and as families. The work considers how successful the mobility has been and looks at the effects on their society of an ethos of progress. Distributed by Stylus. Annotation copyrighted by Book News Inc., Portland, OR
