"Barthes's most popular and unusual performance as a writer is "A Lover's Discourse," a writing out of the discourse of love. This language primarily the complaints and reflections of the lover when alone, not exchanges of a lover with his or her partner is unfashionable. Thought it is spoken by millions of people, diffused in our popular romances and television programs as well as in serious literature, there is no institution that explores, maintains, modifies, judges, repeats, and otherwise assumes responsibility for this discourse. . . Writing out the figures of a neglected discourse, Barthes surprises us in "A Lover's Discourse" by making love, in its most absurd and sentimental forms, an object of interest." Jonathan Culler

In today's wireless environment, marketing is more frequently occurring at the server-to-device level—with that device being anything from a laptop or phone to a TV or car. In this real-time digital marketplace, human attributes such as income, marital status, and age are not the most reliable attributes for modeling consumer behaviors. A more effective approach is to monitor and model the consumer's device activities and behavioral patterns. Machine-to-Machine Marketing (M3) via Anonymous Advertising Apps Anywhere Anytime (A5) examines the technologies, software, networks, mechanisms, techniques, and solution providers that are shaping the next generation of mobile advertising. Discussing the interactive environments that comprise the web, it explains how to deploy Machine-to-Machine Marketing (M3) and Anonymous Advertising Apps Anywhere Anytime (A5). The book is organized into four sections: Why – Discusses the interactive environments and explains how M3 can be deployed How – Describes which technologies and solution providers can be used for executing M3 Checklists – Contains lists of techniques, strategies, technologies, and solution providers for M3 Case Studies – Illustrates M3 and A5 implementations in companies across various industries Providing wide-ranging coverage that touches on data mining, the web, social media, marketing, and mobile communications, the book's case studies show how M3 and A5 are being implemented at JP Morgan Chase, Hyundai, Dunkin' Donuts, New York Life, Twitter, Best Buy, JetBlue, IKEA, Urban Outfitters, JC Penney, Sony, eHarmony, and NASCAR just to name a few. These case studies provide you with the real-world insight needed to market effectively and profitably well into the future. Each company, network, and resource mentioned in the book can be accessed through the hundreds of links included on the book's companion site: www.jesusmena.com

"Last night there was a snowstorm that made my window disappear. I woke up thinking you had died. This is my first letter in three and a half years. First letter since I left Pakistan. First letter since Nusrat." It is 1992. Violence is exploding in Pakistan. In India, a 16th century mosque is about to be demolished. Tanya Talati in Karachi and Tania Ghosh in Bombay write letters to each other, moving from the commonplace to what cannot be said to anyone: a mother who has fallen silent, sex that has become a weapon, bills that cannot be paid and a servant with impossibly soft hands. When Tanya's brother receives a kidnapping threat in Karachi, she sets in motion what no one could have predicted, least of all Tania, who finds herself alone in a forbidden Bombay bazaar, listening to a riot torn city draw closer and closer and closer. Tanya Tania is a story about power, love and belonging as two girls searching for selfhood become women in adolescent India and Pakistan.

Sometimes, something happen and we think it is a coincidence. Some people think it's part of life But I think it to be memories. The best things with people who give memories are that they are the same people

who give the best memories and the worst wounds. Life with Kajri included the best moments of my life, but the wound she caused when she said goodbye, is still fresh as if it happened yesterday. To release this pain, I started writing poems and shayari but kept them to myself. After some time I started writing about her in my time of loneliness. What followed was a book close to my heart, which I am sharing with the world now. The story from when I met her till she left me alone. You know what, it 's better to be alone than to be lonely. I know somewhere Kajri would be looking at me and saying, " Mad! "

An award-winning political journalist for The Atlantic tells the inside story of how the embattled Democratic Party, seeking a direction for its future during the Trump years, successfully regained the White House. The 2020 presidential campaign was a defining moment for America. As Donald Trump and his nativist populism cowed the Republican Party into submission, many Democrats—haunted by Hillary Clinton 's shocking loss in 2016 and the resulting four-year-long identity crisis—were convinced that he would be unbeatable. Their party and the country, it seemed, might never recover. How, then, did Democrats manage to win the presidency, especially after the longest primary race with the biggest field ever? How did they keep themselves united through an internal struggle between newly empowered progressives and establishment forces—playing out against a pandemic, an economic crisis, and a new racial reckoning? Edward-Isaac Dove's *Battle for the Soul* is the searing, fly-on-the-wall account of the Democrats ' journey through recalibration and rebirth. Dove traces this process: from the early days in the wilderness of the post-Obama era to the jockeying of potential candidates; from the backroom battles and exhausting campaigns to the unlikely triumph of the man few expected to win; and on through the inauguration and the insurrection at the Capitol. Dove draws on years of on-the-ground reporting and contemporaneous conversations with the key players—whether with Pete Buttigieg in his hotel suite in Des Moines an hour before he won the Iowa caucuses or with Joe Biden in his first-ever interview in the Oval Office—as well as with aides, advisors, and voters. Offering unparalleled access and an insider 's command of the campaign, *Battle for the Soul* takes a compelling look at the policies, politics, and people, as well as the often absurd process of running for president. This fresh and timely story brings you on the trail, into the private rooms, and along to eavesdrop on critical conversations. You will never see campaigns or this turning point in our history the same way again.

A Lover's Discourse Macmillan

On 23 May 2019, when the results of the general elections were announced, Narendra Modi and the BJP-led NDA coalition were voted back to power with an overwhelming majority. To some, the numbers of Modi's victory came as something of a surprise; for others, the BJP's triumph was a vindication of their belief in the

government and its policies. Irrespective of one's political standpoint, one thing was beyond dispute: this was a landmark verdict, one that deserved to be reported and analysed with intelligence -- and without bias. Rajdeep Sardesai's new book, 2019: How Modi Won India, does just that. What was it that gave Modi an edge over the opposition for the second time in five years? How was the BJP able to trounce its rivals in states that were once Congress bastions? What was the core issue in the election: a development agenda or national pride? As he relives the excitement of the many twists and turns that took place over the last five years, culminating in the 2019 election results, Rajdeep helps the reader make sense of the contours and characteristics of a rapidly changing India, its politics and its newsmakers. If the 2014 elections changed India, 2019 may well have defined what 'new India' is likely to be all about. 2019: How Modi Won India takes a look at that fascinating story, which is still developing.

Internet use-related addiction problems (e.g., Internet addiction, problem mobile phone use, problem gaming, and social networking) have been defined according to the same core element: the addictive symptomatology presented by individuals who excessively and problematically behave using the technology. Online activity is the most important factor in their lives, causing them the loss of control by stress and difficulties in managing at least one aspect of their daily life, affecting users ' wellbeing and health. In 2018, Gaming Disorder was included as a mental disease in the 11th Revision of the International Classification of Diseases by the World Health Organization. In 2013, the American Psychiatric Association requested additional research on Internet Gaming Disorder. The papers contained in this e-Book provide unique and original perspectives on the concept, development, and early detection of the prevention of these health problems. They are diverse in the nature of the problems they deal with, methodologies, populations, cultures, and contain insights and a clear indication of the impact of individual, social, and environmental factors on Internet use-related addiction problems. The e-Book illustrates recent progress in the evolution of research, with great emphasis on gaming and smartphone problems, signaling areas in which research would be useful, even cross-culturally. *Is This What Life Is?* Bloomsbury Publishing
This monograph proposes a reconstruction of the lexicon, the morphophonology and the noun class system of Proto-Fula-Sereer (~3500 BP). Fula-Sereer represents one of the six branches of the North-Atlantic group. North-Atlantic, together with the Bak group of languages, forms the Atlantic family, which represents a separate branch within the Niger-Congo macro-family. The lexical reconstruction of the proto-language of a group such as Fula-Sereer requires the solution of a number of questions that are of interest for the general theory of comparative studies. These questions deal with the morphophonological mutations of root-initial

consonants. Since consonant mutations were structured into morphological paradigms already at the Proto-Fula-Sereer stage, the evolution of initial consonantism in Fula and Sereer was based not on regular phonetic changes, but on massive irregular analogous changes. The reconstruction of Proto-Fula-Sereer consonant mutations is given in Chapter 2. In Chapters 3-6 the author proposes a reconstruction of the initial consonants. Next, the reconstruction of final consonants (Chapter 7) as well as vowels (Chapter 8) is given. In Chapter 9, taking in account the lexical cognates, the long-standing problem of the PFS noun class reconstruction is rediscussed. The Appendix provides a list of ~720 lexical reconstructions and their approximate meanings.

Corruption is one of the biggest global issues, ahead of extreme poverty, unemployment, the rising cost of food and energy, climate change, and terrorism. It is thought to be one of the principal causes of poverty around the globe. Its significance in the contemporary world cannot be undervalued. In this Very Short Introduction Leslie Holmes considers why the international community has only highlighted corruption as a problem in the past two decades, despite its presence throughout the millennia. Holmes explores the phenomenon from several different perspectives, from the cultural differences affecting how corruption is defined, its impact, and its various causes to the possible remedies. Providing evidence of corruption and considering ways to address it around the world, this is an important introduction to a significant and serious global issue. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Raising a child has never been more challenging. If you ever doubt yourself or wonder if it is worth the heartache, read this little book. If you worry that your family will not weather life's storms or if you fear losing your children to the prevailing culture, read it again. Why Children Matter offers biblical wisdom and commonsense advice on how to hold a family together and raise children with character. Johann Christoph Arnold, a father, grandfather and pastor, has written eleven books, including three on parenting and children's education. As the fabric of family and society is torn apart, this book offers up concrete steps to encourage parents faced with difficult child-rearing decisions.

Cownomics is a deep dive into the place of the cow in the society and economy. It takes a 360 degree view

of the impact of cow slaughter and dairy farms on health, nutrition, environment, climate change, agriculture, and economics. It seeks to resurrect and revive the Vedic economic model of "Cownomics" - a healthy, prosperous society, the fulcrum of which was the holy cow. Backed by scientific research as well as research from Hindu scriptural texts like Shiva Agamas, Vedas, Upanishads, Ayurveda texts, Yoga texts and many more, the book brings to light many forgotten aspects of how changing the place of the cow in the society can change the society at large, for better. Not a bundle of opinions, but sourced from hundreds of research papers, books & scriptures with ground research and independent analysis. It is a misconception that banning cow slaughter & making dairy humane is not economically viable. The book discusses how this system is broken & ailing. It is hurting the economy, animals and YOU - and not helping anyone. Demolishing all misplaced arguments, this is an exploration of a humane world.
