Public Roads Routledge

This synthesis report will be of interest to Department of Transportation (DOT) administrators, supervisors, equipment, and Management Information System (MIS)/Information Technology (IT) managers and staff, as well as to the engineering and MIS/IT consultants that work for them. It reviews that state of the practice, updating an earlier effort, NCHRP Synthesis 52: Maintenance and Selection Systems for Highway Maintenance Equipment. The synthesis addresses highway fleet maintenance issues in management, equipment, staffing, and technology. It describes the trend toward more sophisticated and complex MISs and reports on DOT efforts to develop more systematic approaches to measure equipment effectiveness and to incorporate this quantitative technology, successfully, into daily operations. This TRB report profiles specific state agency experience in hiring and retaining mechanics, staffing levels, management system complexity, and technologies. Sample shop work load and productivity reports from the Montana DOT are included.

Hearings were held in Richland, Wash.

Monthly Catalogue, United States Public Documents

I quit my job at 43 to write my own paychecks and maintain and manage my rental properties. This book describes how I started with almost nothing and reached my goal in 11 years, which was to be financially independent. I did this by investing in older style apartment buildings and stores in Seattle, Washington. You will see many pictures of buildings I bought, how I operated, maintained, improved, and sold some. Many anecdotes and examples are presented. Also pictures of my rewards along the way. You will learn what I think "money makers" are: why, where they are, and how I bought them. Many tips, maintenance and repair techniques are described. You will learn the same opportunities are here today in every city in the United States if you buy right. It's been my life for 38 years and it's been fun and rewarding.

Washington Reports ...

This two-volume set collects key essays examining economic theory, methods, and issues salient to agri-environmental policy in the US and in Europe, as well as in other countries. The topics under discussion are arranged thematically and include theoretical, numerical and empirical works; all are grounded in policy and economics. The introduction to these volumes reviews the evolution of agri-environmental policies, with an important focus on the history of US policy and European agri-environmental policy. A key feature within this is the importance of the Environmental Protection Agency (EPA) in the US, particularly its move towards more 'market-based incentives' from the 1980s onwards. Within the European context, the effects of the CAP (Common Agricultural Policy) on agri-environmental programmes and schemes within the member states, are discussed. Significantly, the essays republished here have provided the knowledge base that has influenced further applied work, creating an influential impact on policy development.
