A good sketch starts with good bones. The fourth book in the *Urban Sketching Handbook* series uses drawings and simple steps to explain the often challenging and overwhelming concepts of perspective in practical and useful ways for on-site sketching. Most books are either too abstract or don't provide enough information that relates to what you actually do when you're out in the busy, wide world about to start a drawing. Where do you start? How do you edit what you see to flatten and shrink it onto your paper? How does perspective work? *The Urban Sketching Handbook: Understanding Perspective* helps you learn to think like an architect, to draw buildings and spaces by reducing what you see to simple, basic shapes, then adding layers in simple steps, and finally finishing your sketch with detail, tone, and color--in accurate perspective. Full of helpful tips, architect and illustrator, Stephanie Bower even de-constructs sketches to show you how to create them! Once you understand perspective, it will change the way you see the world--you'll see perspective everywhere. Some of the key concepts explored in this volume are: - Basic Terms - Basic

Spatial Principles - Types of Perspective - Building a Sketch in Layers - Special Conditions

Part of the *Eminent Lives* Series, this biography, written by the gifted author Robert Gottlieb, will describe the life of the dynamic George Balanchine, the foremost contemporary choreographer in ballet. Timed to coincide with the 2004 centenary of the artist's birth. The life and achievement of the great choreographer who both summed up everything that proceeded him in ballet, and extended the art form into radical yet inevitable new paths. Leaving Revolutionary Russia in 1924 (he was 20), he joined Serge Diaghilev's famous Ballets Russes, where he created his first enduring masterpiece, *Apollo*, cementing his lifelong collaboration with Stravinsky. In 1933 he arrived in America to found a school and a company, but the company as we know it -- The New York City Ballet -- didn't emerge until 1948. Meanwhile, he made ballets wherever opportunity allowed, while choreographing Broadway shows (four for Rodgers and Hart), movies (*The Goldwyn Follies*), even the circus -- a ballet for elephants with a score by Stravinsky. By the time of his death, in 1983, he had been recognized as a member of the triad of the greatest modern masters, alongside Picasso and Stravinsky. Balanchine was married many times, always to outstanding ballerinas, but his truest muse always remained Terpsichore, the Muse of Dance.
