The overview of television criticism, which this book provides, comes appropriately at a moment of change. Television is becoming dramatically different as a result of new and developing technologies such as cable, HDTV, satellite transmission and broadband distributions.

By concentrating on the still-dominant notion of television, what the authors call "Classical Network Television," they argue that it is as important to understand this model as it is to understand Classical Hollywood Cinema. The co-authors have a unique approach to the study of television, viewing its history and reception not only through important articles about the medium, but also through analyzing how Hollywood auteur

cinema has commented on television over the decades, in films such as *Tootsie*, *Network*, *The Last Picture Show*, *A Face in the Crowd*, *Rollerball*, *The King of Comedy* and others. Not only does this reflect the pervasive use of cinema theory to discuss television, it also helps to emphasize the importance of clarifying the distinctions between the criticisms of the two media. Television at the Movies argues that the study of television is a

crucial aspect of understanding our recent and contemporary culture, and it provides an illuminating point of entry for students and researchers in the field.

In her attempts to juggle work and family life, Brigid Schulte has baked cakes until 2 a.m., frantically (but surreptitiously) sent important emails during school trips and then worked long into the night after her children were in bed. Realising she had become someone who constantly burst in late, trailing shoes and schoolbooks and biscuit crumbs, she began to question, like so many of us, whether it is possible to be

anything you want to be, have a family and still have time to breathe. So when Schulte met an eminent sociologist who studies time and he told her she enjoyed thirty hours of leisure each week, she thought her head was going to pop off. What followed was a trip down the rabbit hole of busy-

ness, a journey to discover why so many of us find it near-impossible to press the 'pause' button on life and what got us here in the first place. Overwhelmed maps the individual, historical, biological and societal stresses that have ripped working mothers' and fathers' leisure to shreds, and

asks how it might be possible for us to put the pieces back together. Seeking insights, answers and inspiration, Schulte explores everything from the wiring of the brain and why workplaces are becoming increasingly demanding, to worldwide differences in family policy, how cultural norms shape our experiences at work, our unequal division of labour at home and why it's so hard for everyone — but women especially — to feel they deserve an elusive moment of peace.
