Geographical imagination and the authority of images collects three papers and an interview on the themes presented and discussed during the 2005 Hettner lectures. Cosgrove examines the roles that vision and imagination have played in shaping material and represented landscapes at scales ranging from the local and regional to the global and cosmic. The book presents substantive studies of cosmographic and global mapping, the picturesque tradition and suburban Los Angeles, and the use of aeTranspennine' England as a geographical art gallery. Embedded in these are theoretical and ethical reflections on the ways that we come to know the world, ourselves and each other through geographical engagements, especially when these are mediated through graphic images. The interview locates these themes within the context of Denis Cosgrove's development as a geographer and his response to debates within the discipline about the roles of imagination, culture and representation within geographies's humanities tradition. The Challenge of American History SAGE

"Existing scholarship on living history museums addresses the subject from a museum-studies or anthropology perspective. With his background in theatre history and theory, however, Scott Magelssen analyzes living history museums using postmodern methodology. He offers suggestions for performance in an increasingly postmodern landscape, presents performance as a method for the study of history, explores emergent nontraditional theatrical practices, and concludes with an international listing of institutions and complete list of sources. Living History Museums is an invaluable resource for students and teachers of folklore and popular culture, as well as theatre, performance, and cultural, American, and museum studies."--BOOK JACKET.

A Place to Live Simon and Schuster

A Place to Live brings together in a single volume an introduction to Yi Chung-hwan's (1690-1756) T'aengniji (Treatise on Choosing Settlement)—one of the most widely

read and influential of the Korean classics—and an annotated translation of the text, including the author's postscript. Yi composed the T'aengniji in the 1750s, a time when, despite King Y?ngjo's (r. 1724-1776) policy of impartiality, the scholar-gentry class continued to identify strongly with literati factions and to participate in the political scene as such. A prominent secretary who had his career cut short because of suspected involvement in one of the largest literati purges at court, Yi endured long periods of living in exile before finishing the T'aengniji in his early sixties. The treatise, his only substantial work, is based largely on his travels throughout the Korean peninsula and presents not only his views on the desirability of places for settlement, but also his opinions on contemporary matters and criticism of government policy. As a result, the T'aengniji circulated as an anonymous work for many years. Employing the latest research on T'aengniji manuscripts, translator Inshil Yoon maintains in her introduction that the original title of the treatise was Sadaebu kag?ch'? (Livable Places for the Scholar-Gentry); she goes on to discuss in detail its reception by premodern and contemporary scholars and the treatise's ongoing popularity as evidenced by the numerous versions and translations done in this and the previous century, its having been made into a novel, and current usage of "t'aengniji" as a noun meaning "regional geography" or "travelogue." The present translation is based on the Chos?n Kwangmunhoe edition.

Although political and legal institutions are essential to any nation's economic development, the forces that have shaped these institutions are poorly understood. Drawing on rich evidence about the development of the American states from the mid-nineteenth to the late twentieth century, this book documents the mechanisms through which geographical and historical conditions--such as climate, access to water transportation, and early legal systems--impacted political and judicial institutions and economic growth. The book shows how a state's geography and climate influenced whether elites based their wealth in agriculture or trade. States with more occupationally diverse elites in 1860 had greater levels of political competition in their legislature from 1866 to 2000. The book also examines the effects of early legal systems. Because of their colonial history, thirteen states had an operational civil-law legal system prior to statehood. All of these states except Louisiana would later adopt common law. By the late eighteenth century, the two legal systems differed in their balances of power. In civil-law systems, judiciaries were subordinate to legislatures, whereas in common-law systems, the two were more equal. Former civil-law states and common-law states exhibit persistent differences in the structure of their courts, the retention of judges, and judicial budgets. Moreover, changes in court structures, retention procedures, and budgets occur under very different conditions in civil-law and common-law states. The Evolution of a Nation illustrates how initial geographical and historical conditions can determine the evolution of political and legal institutions and long-run growth.

A major discovery, with echoes of Clarice Lispector, Llansol's groundbreaking linked novellas present her unique literary vision of writing as lived life, conjuring historical figures and their ideas into her world. "I live what I have written (and what I have yet to

The future of theatre history studies requires consideration of theatre as a global phenomenon. The Challenge of World Theatre History offers the first full-scale argument for abandoning an obsolete and parochial Eurocentric approach to theatre history in favor of a more global perspective. This book exposes the fallacies that reinforce the conventional approach and defends the global perspective against possible objections. It moves beyond the conventional nation-based geography of theatre in favor of a regional geography and develops a new way to demarcate the periods of theatre history. Finally, the book outlines a history that recognizes the often-connected developments in theatre across Eurasia and around the world. It makes the case that world theatre history is necessary not only for itself, but for the powerful comparative and contextual insights it offers to all theatre scholars and students, whatever their special areas of interest.

History Alive!. James Lorimer & Company
When Richard Nisbett showed an animated underwater scene to his American students, they zeroed in on a big fish swimming among smaller fish. Japanese subjects, on the other hand, made observations about the background environment...and the different "seeings" are a clue to profound underlying cognitive differences between Westerners and East Asians. As Professor Nisbett shows in *The Geography of Thought* people actually think - and even see - the world differently, because of differing ecologies, social structures, philosophies, and educational systems that date back to ancient Greece and China, and that have survived into the modern world. As a result, East Asian thought is "holistic" - drawn to the perceptual field as a whole, and to relations among objects and events within that field. By comparison to Western modes of reasoning, East Asian thought relies far less on categories, or on formal logic; it is fundamentally dialectic, seeking a "middle way" between opposing thoughts. By contrast, Westerners focus on salient objects or people, use attributes to assign them to categories, and apply rules of formal logic to understand their behaviour.

This book focusses on the several forms of reconstructing the slave past in the present. The recent emergence of the memory of slavery allows those who are or who claim to be descendants of slaves to legitimize their demand for recognition and for reparations for past wrongs. Some reparation claims encompass financial compensation, but very often they express the need for memorialization through public commemoration, museums, and monuments. In some contexts, presentification of the slave past has helped governments and the descendants of former masters

and slave merchants to formulate public apologies. For some, expressing repentance is not only a means to erase guilt but also a way to gain political prestige. The authors analyse different aspects of the recent phenomenon of memorializing slavery, especially the practices employed to stage the slave past in both public and private spaces. The essays present memory and oblivion as part of the same process; they discuss reconstructions of the past in the present at different public and private levels through historiography, photography, exhibitions, monuments, memorials, collective and individual discourses, cyberspace, religion and performance. By offering a comparative perspective on the United States and West Africa, as well as on Western Europe, South America, and the Caribbean, the chapters offer new possibilities to explore the resurgence of the memory of slavery as a transnational movement in our contemporary world.

NEW YORK TIMES BESTSELLER • In this "ambitious and challenging" (The New York Review of Books) work, the bestselling author of *Monsoon and Balkan Ghosts* offers a revelatory prism through which to view global upheavals and to understand what lies ahead for continents and countries around the world. In *The Revenge of Geography*, Robert D. Kaplan builds on the insights, discoveries, and theories of great geographers and geopolitical thinkers of the near and distant past to look back at critical pivots in history and then to look forward at the evolving global scene. Kaplan traces the history of the world's hot spots by examining their climates, topographies, and proximities to other embattled lands. The Russian steppe's pitiless climate and limited vegetation bred hard and cruel men bent on destruction, for example, while Nazi geopoliticians distorted geopolitics entirely, calculating that space on the globe used by the British Empire and the Soviet Union could be swallowed by a greater German homeland. Kaplan then applies the lessons learned to the present crises in Europe, Russia, China, the Indian subcontinent, Turkey, Iran, and the Arab Middle East. The result is a holistic interpretation of the next cycle of conflict throughout Eurasia. Remarkably, the future can be understood in the context of temperature, land allotment, and other physical certainties: China, able to feed only 23 percent of its people from land that is only 7 percent arable, has sought energy, minerals, and metals from such brutal regimes as Burma, Iran, and Zimbabwe, putting it in moral conflict with the United States. Afghanistan's porous borders will keep it the principal invasion route into India, and a vital rear base for Pakistan, India's main enemy. Iran will exploit the advantage of being the only country that straddles both energy-producing areas of the Persian Gulf and the Caspian Sea. Finally, Kaplan posits that the United States might rue engaging in far-flung conflicts with Iraq and Afghanistan rather than tending to its direct neighbor Mexico, which is on the verge of becoming a semifailed state due to drug cartel carnage. A brilliant rebuttal to thinkers who suggest that globalism will trump geography, this indispensable work shows how timeless truths and natural facts can help prevent this century's looming cataclysms.

During global capitalism's long ascent from 1600-1850, workers of all kinds--slaves, indentured servants, convicts, domestic workers, soldiers, and sailors--repeatedly ran away from their masters and bosses, with profound effects. A *Global History of Runaways*, edited by Marcus Rediker, Titas Chakraborty, and Matthias van Rossum, compares and connects runaways in the British, Danish, Dutch, French, Mughal, Portuguese, and American empires. Together these essays show how capitalism required vast numbers of mobile workers who would build the foundations of a new economic order. At the same time, these laborers challenged that order--from the undermining of Danish colonization in the seventeenth century to the igniting of civil war in the United States in the nineteenth.
