Human geographers have been at the forefront of research that examines the relationships between space, culture and society. This volume contains twenty-one essays, published over the past thirty years, that are iconic instances of this investigative field. With a focus on four broad themes - landscape, identity, colonialism, nature - these essays represent some of the best and most innovative interventions that geographers have made on these topics. From the visual to the corporeal, from rural Ceylon to urban America and from

the sixteenth century to the twenty-first, this volume brings together a set of theoretically sophisticated and empirically grounded works. *AC/E Digital Culture Annual Report* CRC Press
This is an examination of the interactions between people of different cultures as portrayed in relatively modern, commonly available American and European films. The cinema is a desirable medium through which to show cultural differences because it vividly portrays settings, actions and emotions, all of which greatly influence viewers' perceptions. Films showing relations of the United States, north and south; Japan, China, India, Asia, and Africa meeting the West; the clash between American Indians and white settlers; various other intercultural

contrasts, multicultural voices in film, and the connection between popular film and intercultural studies--all are examined in this work. Each chapter concludes with a filmography. *Journal Des Instituteurs Et Des Institutrices* Bucknell University Press
This provocative look at the connections—and conflicts—between Latinos and African Americans in the United States assesses the challenges facing both groups as they strive to achieve the American dream. • Reviews music forms (such as jazz, salsa, disco, and hip-hop), political connections, and intermarriages between Latinos and African Americans • Examines controversial issues such as the Trayvon Martin case, members of the Mexican Mafia, and gang violence • Provides points of unity between Latinos and African Americans • Sheds

light on the common perspectives and backgrounds of the two ethnic groups as well as their cultural differences

The environment is perhaps most misunderstood as a static place, somewhere "out there," separated from the practices of our everyday lives. Given this assumption, environmental movements and concerns have remained mostly marginalized or denigrated in cultural studies publications, conferences, and presentations. Recent global developments have made changing this oversight and, at times, direct resistance to engaging environmental concerns a new priority. This edited collection illustrates an appreciation of the dynamic, palpable, and significant ways the environment permeates culture (and vice versa), as well as a collective commitment to the ways that cultural studies has more to offer—and to learn from—taking environmental matters to heart. Like foundational categories of identity, economics,

and historical context, this collection reminds us why the environment is and should be considered relevant to any work done in the name of "cultural studies." Including research from four continents and across media, the authors offer insights on timely topics such as food, tourism, human/animal relations, forests, queer theory, indigenous rights, and water. This book was published as a special issue of *Cultural Studies*.

This title shows that Cortázar did not become a political writer as a result of the Cuban Revolution, as is often claimed, but rather that the representation of the political already existed in Cortázar's very first writings.

This book presents a narrative of both an opportunity and a challenge. The opportunity is to develop routes of cultural tourism in the North of Portugal, while empowering and engaging communities in the protection of their cultural heritage. The challenge is promoting sustainable tourism, with an impact on economic growth, poverty reduction,

environmental protection and the preservation of authenticity in culture and heritage. This book appears at a pivotal moment, given the increased interest for the use of literature, arts, crafts, heritage, and traditions, as well as tangible and intangible cultural products, to promote places and destinations, while safeguarding the identity of social-cultural territories. The current cultural turn in tourism and related research methodologies has led to the development of business strategies where culture and creativity play a relevant role in the branding of competitive cities, regions and countries, using innovation and technology to promote their international image.

The Viennese café was a key site of urban modernity around 1900. In the rapidly growing city it functioned simultaneously as home and workplace, affording opportunities for both leisure and intellectual exchange.

This volume explores the nature and function of the coffeehouse in the social, cultural, and political world of fin-de-siècle Vienna. Just as the café served as a creative meeting place within the city, so this volume initiates conversations between different disciplines focusing on Vienna at the beginning of the twentieth century.

Contributions are drawn from the fields of social and cultural history, literary studies, Jewish studies and art, and architectural and

design history. A fresh perspective is also provided by a selection of comparative articles exploring coffeehouse culture elsewhere in Eastern Europe.

This highly-informative monograph will provide a basic reference on coffee rust for both investigators in the field and those entering it. The research conducted has been organized based on principles of epidemiology and plant disease

management, providing both theoretical and practical information. This approach enables discussion of the past, present and future of coffee rust research in broad plant pathological areas of biology, epidemiology, genetics and breeding for disease resistance, fungicide technology and application, and disease management. In addition, an analysis of epidemics, breeding programs, and other rust management practices in India, Kenya and Brazil are included. This new text will contain over 45 figures and 40 tables for both investigators in the field and those just entering it.

Popular and Visual Culture:

Design, Circulation and Consumption is a transnational project that fosters a dialogue with multiple origins, both in geographical and academic terms. From the onset, this book questions the concepts of visual and popular culture, terms which are currently applied both to describe scientific fields, as operative concepts in theoretical discourse, and to characterize specific cultural contexts. The book's analysis and categorization of visual and popular culture pursues discourses and practices which mark different historical eras and shape social orders. Because popular iconic and written productions are the outcome of a network of political, economic, ideological and social circumstances that are often hardly detectable and too taken for granted to be critically recognized, even by those who draw, paint or write (and live) under their influence. That is why visual figurations of popular culture should be studied as the support of a deeply motivated symbolic discourse on the values shared by a community. This book deals, in a way or another, with how popular and visual artefacts and sceneries are

socially built, preserved and/or contested. The volume brings together, not only different disciplinary perspectives, but also diverse empirical phenomena, while approaching the wide subject of visuality and popular culture.

Preservation has traditionally focused on saving prominent buildings of historical or architectural significance.

Preserving cultural landscapes-the combined fabric of the natural and man-made environments-is a relatively new and often misunderstood idea among preservationists, but it is of increasing importance. The essays collected in this volume-case studies that include the Little Tokyo neighborhood in Los Angeles, the Cross Bronx Expressway, and a rural island in Puget Sound-underscore how this approach can be fruitfully applied. Together, they make clear that a cultural landscape perspective can be

an essential underpinning for all historic preservation projects. Contributors: Susan Calafate Boyle, National Park Service; Susan Buggey, U of Montreal; Michael Caratzas, Landmarks

One of South America's most stunning spectacles, the great Salar de Uvuni salt lake, is here as well as Lake Titicaca. Bolivia retains its pre-Columbian traditions more than any other country in South America, with agricultural practices unchanged since the Incas, and traditional festivals and markets. It also has modern nightclubs, comfortable hotels and ecolodges, and is the ideal place to soak up some Latin American culture before the onset of mass tourism.

275,000 refugees in France were immediately interned in hastily constructed concentration camps, most of which were located along the open shorelines of France's southernmost beaches. This book chronicles the cultural memory of this war refugee population whose stories as camp inmates in the early 1940s remain largely unknown, unlike the wide dissemination of the literature and testimony of the survivors of Nazi death camps. The hidden history of France's seaside camps for Spanish Republicans spawned a rich legacy of cultural works that dramatically demonstrate how a displaced political community began to reconstitute itself from the ruins of war, literally from the sands of exile.

Combining close textual analyses of memoirs, poetry, drama, and fiction with a carefully researched historical perspective, *Spanish Culture behind Barbed Wire Investigates* how the most significant literature of the early post-civil war exile period appropriated the concentration camp as a discursive vehicle.
