This addition to the Michelin Green Guide series provides travellers with a comprehensive guide to the cultural and natural highlights of Paris. The guide also includes hotel and restaurant selections.

Pius IX Michelin Travel Publications

In recent years, Japan and Germany have been facing very similar challenges: aging populations, changing employment structures, long-lasting economic stagnation, and globalization, all of which threaten existing social security arrangements. Both countries are in a number of respects more socially and politically regulated, and in this sense less liberal, than the Anglo-American economies. Nonetheless, during the last couple of years several important social policy reforms have been implemented. A comparison of these reforms may provide

valuable insights into the changing character of "conservative" welfare states. This volume concentrates on two fields of social policy: long-term care insurance and public pensions. These social insurances are at the center of current public debate in both countries because population aging translates immediately into a higher demand for care for the elderly and old age security. The contributions range from demographic and policy implications of aging through detailed analyses on the different reform measures to specific aspects such as bioethical or regional policy considerations. The volume is intended not only for experts specializing in social policy research but also for policy makers as well as the general reader interested in the current debates centering on the "restructuring

of the welfare state".

The solemn beatification of Pope

Pius IX in September 2000

celebrated the heroic virtue of one

of the most influential figures of the

nineteenth century. Born in 1792,

Giovanni Maria Mastai Ferretti was

elected Pope on June 16th 1846. His

pontificate, the subject of this

biographical study, lasted thirty-two

years, the longest after that of St

Peter himself. Elevated to the

Papacy amid the historical backdrop

of turmoil and revolution in Italy and

Europe, he was also to play a

central role in the drama of the

Risorgimento that led to the creation

of a united Italy. Publication of the

English translation of Roberto de

Mattei's acclaimed study of Pius IX

marks the 150th anniversary of the

Pope's solemn definition of the

Dogma of Our Lady's Immaculate Conception. Roberto de Mattei holds the chair of Modern History at the University of Cassino (Rome), is vice president of the Italian C.N.R. (National Council for Research) and is well-known in Italy as a journalist and writer.

This textbook uses a case-study approach to present the core principles of biochemistry and molecular biology in the context of human disease to students who will be involved in patient care. The 29 clinical cases have been carefully selected to cover key scientific concepts and some common, and other not so common, diseases. While the principal focus is on topics relating to metabolic disease, further subjects such as connective

tissue disorders, neurological disorders, auto-inflammatory disorders, infective diseases, and cancer are also addressed. Each chapter provides a specific patient report that includes the natural history, pertinent clinical laboratory data, physical findings, subsequent diagnosis, and therapy. This is followed by a comprehensive discussion of the normal biochemical processes and reactions pertaining to the case, along with the pathophysiological mechanisms of the disease. Graphical diagrams are

provided in each chapter for ease of comprehension. *Nieuw Nederlandsch-Fransch woordenboek* Includes section, "Recent book acquisitions" (varies: Recent United States publications) formerly published separately by the U.S. Army Medical Library.
