Hayao Miyazaki's career in animation has made him famous as not only the greatest director of animated features in Japan, the man behind classics as My Neighbour Totoro (1988) and Spirited Away (2001), but also as one of the most influential animators in the world, providing inspiration for animators in Disney, Pixar, Aardman, and many other leading studios. However, the animated features directed by Miyazaki represent only a portion of his 50-year career. Hayao Miyazaki examines his earliest projects in detail, alongside the works of both Japanese and non-Japanese animators and comics artists that Miyazaki encountered throughout his early career, demonstrating how they all contributed to the familiar elements that made Miyazaki's own films respected and admired among both the Japanese and the global audience.

In *The Soul of Anime*, Ian Condry explores the emergence of anime, Japanese animated film and television, as a global cultural phenomenon. Drawing on ethnographic research, including interviews with artists at some of Tokyo's leading animation studios—such as Madhouse, Gonzo, Aniplex, and Studio Ghibli—Condry discusses how anime's fictional characters and worlds become platforms for collaborative creativity. He argues that the global success of Japanese animation has grown out of a collective social energy that operates across industries—including those that produce film, television, manga (comic books), and toys and other licensed merchandise—and connects fans to the creators of anime. For Condry, this

collective social energy is the soul of anime.

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Based on a series of case studies of globally distributed media and their reception in different parts of the world, *Imagining the Global* reflects on what contemporary global culture can teach us about transnational cultural dynamics in the 21st century. A focused multisited cultural analysis that reflects on the symbiotic relationship between the local, the national, and the global, it also explores how individuals' consumption of global media shapes their imagination of both faraway places and their own local lives. Chosen for their continuing influence, historical relationships, and different geopolitical positions, the case sites of France, Japan, and the United States provide opportunities to move beyond common dichotomies between East and West, or United States and "the rest." From a theoretical point of view, *Imagining the Global* endeavors to answer the question of how one locale can help us understand another locale. Drawing from a wealth of primary sources—several years of fieldwork; extensive participant observation; more than 80 formal interviews with some 160 media consumers (and occasionally producers) in France, Japan, and the United States; and analyses of media in different languages—author Fabienne

Darling-Wolf considers how global culture intersects with other significant identity factors, including gender, race, class, and geography. *Imagining the Global* investigates who gets to participate in and who gets excluded from global media representation, as well as how and why the distinction matters.
