Retriever Puppy Training

presents a program of basic training that will turn young retrievers into efficient and enthusiastic hunting companions. A step-by-step teaching schedule provides the continuity so important to fostering a puppy's confidence. A favorite with people starting out with their first retriever or those who want to raise a hunting companion from puppyhood, the program is equally effective with young

dogs starting beyond that age. Experienced handlers and those planning to trial or hunt test their dogs will also find it helpful. This dog training book covers puppy selection, puppy personality types, basic housedog manners, and a progressive retriever training program that includes water retrieves, blinds, and marks.

When your pup has completed this program, he will be ready to hunt. You will have worked out of all the excuses that retrievers try to use, and you will have a well-mannered companion. Completely revised in 2010. TRAIN YOUR YOUNG RETRIEVER TO BE AN ENTHUSIASTIC HUNTER -How to work with your retriever puppy's unique personality -Correlate dog training to your pup's mental and physical development- Train your dog with lessons

that are thorough and effective -Teach obedience and house manners simultaneously with fieldwork Please be aware that this older title may recommend some training techniques that are now considered outdated. At the time of publication the use of negative reinforcement and positive punishment were more widely used to teach certain types of behaviors, especially with dogs who display a high degree of resilience. We encourage owners to always use the least intrusive, minimally aversive methods possible. m.iaabc.org/about/position-statements/lima/

Retriever Training

Coward McCann

With Absolutely Positively Gundog Training, Milner has taken the latest scientific research into how dogs learn and combined it with his own vast experience and commonsense training methods. The result is an approach that is as effective as it is easy. For the hunter who wants a calm, steady, and obedient retriever, there's

no better training method.

This book provides everything needed for you to turn out a sporting dog that excels at life.

Whether you want your dog to be a gundog, a water dog, a shed dog, an upland dog, a deer tracker or a fishing companion, this book charts the course. Every other page exclaims, "That makes perfect sense." Milner debunks a number of groundless myths and counter-productive training practices that proliferate in today's sporting dog culture. A big divide exists today in the gundog sector in America. The opposing views are tradition-based compulsion training versus the science-based positive training model derived from B.F.

Skinner's operant conditioning theory. Robert Milner's new book bridges that gap. Milner brings to the table vast experience in both training methods. He has trained over two thousand gundogs with traditional compulsion and has trained several hundred gundogs with a positive training model. He pronounces the positive model a definitive winner. His new book covers all the bases for a beginning gundog trainer. Milner covers the dog's history and domestication as it relates to training. He shows you how the dog perceives the world, how the dog communicates, and how he learns. Big surprises await some readers. Milner cites many examples of recent dog

research that upend traditional training theories. This book gives the reader a simple roadmap to success in producing a gundog that is extremely well-mannered, a persistent hunter and very responsive on whistle stops and hand signals. The simplicity of the training model will be a pleasant surprise to many new trainers. Most importantly, Milner's training model is fun for the trainer and the dog. *Zak George's Dog Training Revolution* Dog's Best Friend, Limited
