Le nouveau roman de Michel de Saint Pierre nous conte l'histoire d'un jeune médecin généraliste, issu des grands hôpitaux de Paris, et qui vient s'établir en Normandie avec sa femme Armèle, une Eurasienne séduisante et secrète. Le docteur Guillaume Erikson, comme Michel de Saint Pierre lui-même, aime d'amour la Normandie, ses paysages et ses habitants. Or, voici qu'au cours de ses travaux il rencontre une équipe formée de biologistes, de médecins et de pharmaciens, qui guérissent avec des succès étonnants des maux incurables devant lesquels les plus grands centres hospitaliers universitaires reculent et s'avouent impuissants. Mais la médecine

officielle, dans son ensemble, n'aime pas les chercheurs indépendants - et sa tendance est de refuser trop souvent les méthodes de guérison qu'elle n'a pas elle-même inventées. Le docteur Guillaume Erikson et l'équipe avec laquelle il travaille font l'objet d'attaques et de menaces de toutes sortes. Jusqu'au jour... {Docteur Erikson} est le roman du drame de la médecine moderne - mais il est aussi celui de l'espérance pour les malades qui se sentent aujourd'hui menacés.

Oi Amigo! Experience the amazing mighty Amazon! It's the steamy setting for this colourful South American tale of an old family company dealing in jungle medicinal plants. The venerable firm is corrupted by lust, corporate greed, gratuitous affluence, shady characters, and duplicitous transactions. Genetic tinkering and environmental destruction run amuck amidst the

grinding subsistence life of the Amazon natives. Rune Erikson is cast as the altruistic hero as he comes to the rescue of a statuesque Brazilian heiress brutally targeted during a medical conference in Victoria. Hiding her aboard the Valhalla, Rune is love-struck. Hitching a ride with her on Dredmann Industries corporate jet, it delivers them unto the evil Dr. Manglar. Bianca Penthesilia Monteiro fights back against Gunther Dredmann, known by his victims as Dr. Death, when her family's business is ruthlessly subjected to a hostile takeover. Fast Eddie, an old buddy of Rune's who has fallen into the bottle, teams up to help with his Grumman Goose flying boat. An ancient family

enigma is revealed when a five-hundred-year-old Portuguese leather trunk is opened. A wizened soothsayer casts his cryptic prophecies as a centuries-old Portuguese sword comes scything down in an old Brazilian prison, sparking primeval powers in its possessor. This intriguing fourth novel in a series features the somewhat jaded but dashing Rune Erikson who slogs through the piranha-infested Amazon with his Grumman Goose flying buddy, Fast Eddie, in a torturous survival trek. Rune and his Brazilian heiress babe are caught up in a sinister plot of unimaginable consequences. Coloured by romance and spiced with eroticism, this adventure lures Rune off his sailing ketch, Valhalla, in Victoria's Fisherman's Wharf into the enticing arms of a young, hot-blooded Latin American woman whose powerful matriarchal lineage is unknowingly steeped in the ancient myths and secret sagas of the steamy Amazon.

Beneath the Mask presents classical theories of human nature while emphasizing the theorist's progression of ideas. The eighth edition continues to discuss the ideas of

personality theorists developmentally. This account of personality theory incorporates the personal origins of ideas to highlight the links between the psychology of each theorist and that theorist's own psychology of persons. It also explores how the personal histories, conflicts, and intentions of the theorist entered that thinker's portrait of people.

In the tradition of Atul Gawande and Sherwin Nuland, Marc Agronin writes luminously and unforgettably of life as he sees it as a doctor. His beat is a nursing home in Miami that some would dismiss as "God's waiting room." Nothing in the young doctor's medical training had quite prepared him for what he was to discover there. As Agronin first learned from ninety-eight-year-old Esther and,

later, from countless others, the true scales of aging aren't one-sided—you can't list the problems without also tallying the hopes and promises. Drawing on moving personal experiences and in-depth interviews with pioneers in the field, Agronin conjures a spellbinding look at what aging means today—how our bodies and brains age, and the very way we understand aging.

The Anatomical Record HFCA Publishing House

Este libro constituye un serio intento de clasificar las formas elementales de la enfermedad y la curación, a fin de construir

modelos teoricos y operativos a mitad de camino entre tipologias como las de Forster o Murdock y las estructuras que persigue Levi-Strauss. En su busqueda de las representaciones que organizan los discursos sobre la salud, el autor no vacila en juntar la biomedicina y la literatura. La base empirica y teorica de sus investigaciones son las entrevistas que mantuvo con medicos generalistas y con enfermos, las obras medicas que incluyen las terapias alternativas destinadas al gran publico y filmes famosos y obras literarias de escritores como Proust, Celine o Mann, entre otros muchos que abordaron la tematica de la enfermedad. Laplantine arroja nuevas luces sobre los modelos etiologicos y terapeuticos, indaga en las relaciones entre la enfermedad y lo sagrado, apelando para ello tanto a la antropologia medica y religiosa como a las representaciones de la enfermedad como castigo, o incluso como bien deseado, y a la curacion como recompensa o gracia divina. La antropologia de la enfermedad es una disciplina reciente que abre ricas perspectivas en los estudios culturales e incorpora categorias de analisis de las que no se podra prescindir en el futuro. En ese campo la obra de Francois Laplantine sobresale por lo exhaustivo de sus investigaciones y la originalidad de sus aportes. Su rigurosa formacion y su ya vasta obra publicada (unos 14 volumenes) le han asegurado un sitio eminente en la antropologia francesa y de toda Europa. Con esta obra consolida, sin duda, su prestigio.

"As well as exploring the way Erikson's life and work are connected, this book examines the application of his thinking to contemporary social and political issues, and to current psychotherapeutic and counselling practice. His writings have a humanity and approachability that reach beyond the world of psychotherapy to consider questions fundamental to us all. These include the precariousness as well as the creative resilience of individual and group identities; racial and other forms of discrimination; non-violent conflict resolution; the generation gap; and issues of human development from childhood and adolescence to maturity and old age." "Erik Erikson will be of interest to counsellors and psychotherapists in training and in practice. It is

also relevant to members of the caring professions seeking a deeper understanding of their work and its place in society."--BOOK JACKET.

How We Age Lulu.com

In *A World Made Safe for Differences*, Christopher Shannon examines how an anthropological definition of culture shaped the central political and social narratives of the Cold War era. In the middle decades of the twentieth century, American intellectuals understood culture as a whole way of life and a pattern of values in order to account for and accommodate differences between America and other countries, and within America itself. Shannon locates the ideological origins of current debates about multiculturalism in the pluralist thought of consensus liberalism. The emphasis on

individualism in contemporary identity politics, Shannon suggests, must be understood as a legacy of the Cold War liberalism of the 1950s rather than the counter-culture radicalism of the 1960s. *A World Made Safe for Differences* is a highly original and controversial book that will be of great interest to students and scholars of twentieth century American history.

Captain Stephen Erickson is sent to Guyana, where he runs into West Point pal Andrew Rambarran. A government overthrow is imminent, but will Steve’s dedication to his old friend cause trouble? Guyana, South America, 1979, was not a free and

easy place to be. The Kabaka Party ruled the government and the streets. They carried swagger sticks, wore heavy leather boots, and called each other “comrade.” They had promised to make the small man into a real man; instead they brought poverty, starvation, and racial mistrust to a nation once hopeful, but now disgruntled. American Captain Stephen Erikson accepts his post as Assistant Military Attaché in Guyana, aware that a military coup might be in the offing. He’s happy to reconnect with his old West Point pal, Captain Andrew Rambarran, serving in the Guyanese army. While rekindling his friendship with Andrew, Steve meets Anita, Andrew’s cousin. She is beautiful and intelligent, and Steve can’t help but fall for her. Steve’s loyalties become severely tested when the military plan to take down the Kabaka Party moves the country into a state of uproar. Should Steve be true to his friend, Andrew, or to his country’s interests in the affair? More importantly, will either he or Andrew live to find out?

Kevin Volkan and Vamik Volkan present a comprehensive study of schizophrenia using a psychoanalytic lens on the existing interdisciplinary research. Over the last seventy years, mainstream research on the

causes, prevalence, and treatment of schizophrenia has greatly diverged from psychoanalytic thinking. However, the emergence of the field of neuropsychanalysis brings hope that psychoanalytic metapsychology and clinical theory may once again provide valuable insight into understanding schizophrenia. Psychoanalytic treatment may not be appropriate for many sufferers but psychoanalysis does provide insight to inform and improve treatment. It can also illuminate what aspects of schizophrenia are common across cultures, where they present unique characteristics, and just how cultural variations occur. For any future improvement in understanding and treating schizophrenia, the cultural underpinnings

and expressions of schizophrenic illness need to be made clear. For clinicians in the field, the authors' aim is to deepen insight and promote the use of psychotherapy and integrated treatments, while increasing sensitivity to cultural variations in schizophrenic disease. Accordingly, this book is divided into four sections. The first gives a brief overview and outline of the mainstream understanding of schizophrenia. The second drills down to focus on general psychoanalytic ideas about schizophrenia, culminating with a focus on problems with early object relations. The third looks at how psychoanalytic treatment can be successful in some cases. The fourth and final part discusses how views of the disorder and the disorder itself are affected by culture. The authors hope to generate insight and understanding of schizophrenic disorders which could lead to new approaches to treating and possibly preventing schizophrenia. It is a must-read for all clinicians and trainees working in the field and presents interesting ideas to anyone with an interest in the subject.
