The human genome is indeed a mysterious world, but, as this fascinating book shows, its vital secrets are now being uncovered. The latest studies are revealing exciting new discoveries, such as how the DNA and related chemical compounds in our cells work together to direct the processes of life. Scientists are not only unraveling how life evolved in the ancient past, but are also finding the keys to creating a healthier future. How does the minuscule chemical cluster in each of our 100 trillion cells accomplish the amazing feat of creating and maintaining our bodies? Frank Ryan, a physician and an evolutionary biologist, describes the complex ways in which the genome operates as a holistic system and not solely through genes coding for proteins—the building blocks of life. Also involved are elaborate switching mechanisms that regulate and control portions of our DNA, as well as the interplay of retroviruses and bacteria. This groundbreaking book explains that we are on the cusp of an amazing era of disease treatment and eradication.

[Stop Hanging Pieces!](#) A completely new kind of chess puzzle helps you develop the necessary visualization skills to take your game to the next level The planning and visualization skills that come from working on Chess Mazes are valuable and instructive. If you are one who often loses games by hanging pieces or missing mates, then this is the book for you. "There are many good books which present chess combinations and explain tactical motifs with the goal of training your tactical ability. Thinking techniques are also well covered in the game's literature. But what about visualization? This is where it is much more difficult to find good material. But now, Bruce Alberston's highly original work fills this gap. "To master his puzzles, you have to exert better control and command of the full potential of all the pieces and you have to visualize their movements in your mind's eye. This sounds more difficult than it is, but in fact only one piece moves in each maze. The result? Excellent training to avoid one-move blunders!" - From the Foreword by German GM Karsten Mueller

After his breakout hit book I'm Sorry...Love, Your Husband, Clint Edwards has more laugh-out-loud tales from the "Terrible Twos" phase each of his three kids went through. While potty training his daughter, he reveals, "wiping a three-year-old's butt is never satisfying. It's never rewarding. It just smells bad and makes you feel like a slave locked in some butt wiping servitude." His relatable toddler stories leave parents and caregivers cackling, and remind us all that no one is the perfect parent. In fact, sometimes the only thing that gets Clint through the day is thinking about when his kids grow up...and all the ways he can finally exact his revenge. Like leaving a leaky sippy-cup full of milk to rot under the back seat of his daughters car, or waking up at 4am to incessantly ask his son for a cheese stick. With essays like Locking Doors Is Hilarious Until the Fire Department Arrives, Turns Out Poop Doesn't Go Easily Down the Tub Drain, Let Them Watch Screens, and You'll Never Pee Alone, Clint knows exactly what's "terrible" about the twos.
