In 1947, a newly independent India was saddled with a host of intellectual property (IP) laws left behind by the British. In the following decades, India broke away from colonial IP legacies, while navigating international treaty negotiations in the light of its redefined national interests. These changes affected ordinary lives—be it through medicines, music, movies, books, food, yoga, or the Internet—but have never been narrated to a larger audience. This book unravels the development of India's IP law and policy in modern times, in a form and style designed for the general

reader. The chapters in the book centre on different industries and sectors, such as pharmaceuticals, book publishing, cinema, music, the Internet, food, yoga, and traditional knowledge. Each chapter features a lively narrative that has been constructed from various sources, including parliamentary debates, expert reports, interviews, archival research, and case law. The book's unique focus is on the politics and history of Indian IP, rather than the black letter of the law.

It is a casebook on patent law that involves comparative jurisprudence tailored for India. The book is best described by highlighting the following features: (1) Casebook format - The casebook format suits practitioners and judges. It allows the reader to independently interpret and assess the implication of each caselaw, which forms a vital component of the practice of law. The reader is assisted towards this objective by only containing

extracts of the relevant portions of the judgment. Even from an academic perspective, it provides an unfiltered view of the law, better than any unnecessary prose. (2) Comparative approach - For each topic of patent law, the book would provide a single point congregation of the relevant Indian provisions and extracts from relevant caselaw across India, the UK, the EU and the USA. This approach is ideal for India, where jurisprudence on the subject is limited. Courts, practitioners, and the Patent Office often resort to such a comparative approach to learn from the experiences of other jurisdictions.

(3) Notes - Author's notes before and after each caselaw or topic fulfil four purposes: (i) set the context for the reader; (ii) critique the caselaw or to bring focus on to issues that arise in practice; (iii) contextualize the discussion to the Indian statute; and (iv) examine the historical perspective, including the legislative history. (4) Focus on law - it is a no-nonsense, no-rhetoric book, focussing on the law, its interpretation and application. Patent Agent's Exam Kluwer Law International B.V.

There are five parts to this book. Part I (Essentials) breaks down the bulky content of the MPEP 9th Edition into a simple and easy to remember format

outlining the core U.S. patent law. I emphasize materials that frequently appear in officially published patent bar exams, and also AIA materials based on both MPEP and USPTO's frequently asked AIA questions. Each topic is itemized with bullet points accompanied by notes, examples and comparisons to enhance your learning experience. The MPEP chapters are not designed in a sequence conducive to learning. This book reorders them in a logical sequence starting with chapters 200, 600, 700, 2100, 800, 1200, 1400 and 1800. These are the key MPEP chapters for passing the patent bar exam. The remaining MPEP chapters mainly require memorization. Part II (Techniques) reveals techniques for passing the bar exam. Honing these techniques will save you time and avoid costly mistakes. As a few representative

examples, techniques on Process of Elimination and Time Saving Tips on Exam Date will help you manage your exam time more efficiently; and techniques on Finding Key Words in Claim Drafting Questions will help you quickly discover if a dependent claim lacks antecedent basis, or is in the alternative way, or further limits the preceding claim, or is indefinite. Part III includes 50 curated questions from published bar exams focusing on all claims drafting issues. Claims are the most important part of the patent law. A considerable number of claim related questions appear in every patent bar exam, pre-AIA and post-AIA. Part IV includes 50 frequently asked AIA Q&A questions from the latest [www.USPTO.gov](http://www.USPTO.gov). Part V includes 50 AIA multiple-choice questions that mimic the difficulties and the styles likely in a bar

exam. This 5.5x8.5 travel size book, with over 400 pages and wide margins for writing your own notes, provides an effective learning experience for your patent bar exam. It is a summary of my own learning experience in passing the bar exam in March 2016 on the first attempt.

remarkable and hopeful portrait of the endless adaptability of the human brain. ” —Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge ’ s inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they ’ ve transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.
