For the AP Course Longman Publishing Group This new edition of *Brown v. Board of Education* addresses the origins, development, meanings, and consequences of the 1954 Supreme Court decision to end Jim Crow segregation. Using legal documents to frame the debates surrounding the case, Waldo Martin presents *Brown v. Board of Education* as an event, a symbol, and a key marker in the black liberation struggle. This new edition strikes a balance between political and social history, not only highlighting the constitutional aspects of the decision but also the social context and impact of the decision for African Americans. With an updated introductory essay and six new documents, several of them by African American authors, the second edition of the text brings this case into the larger context of African American history and civil rights and explores its long-term effects. New questions for consideration, as well as an updated chronology and bibliography, supplement the sources. Available in print and e-book formats.

"The creation of the United States of America is the greatest of all human adventures," begins Paul Johnson's remarkable new American history. "No other national story holds such tremendous lessons, for the American people themselves and for the rest of mankind." Johnson's history is a reinterpretation of American history from the first settlements to the Clinton administration. It covers every aspect of U.S. history--politics; business and economics; art, literature and science; society and customs; complex traditions and religious beliefs. The story is told in terms of the men and women who shaped and led the nation and the ordinary people who collectively created its unique character. Wherever possible, letters, diaries, and recorded conversations are used to ensure a sense of actuality. "The book has new and often trenchant things to say about every aspect and period of America's past," says Johnson, "and I do not seek, as some historians do, to conceal my opinions." Johnson's history presents John Winthrop, Roger Williams, Anne Hutchinson, Cotton Mather, Franklin, Tom Paine, Washington, Adams, Jefferson, Hamilton, and Madison from a fresh perspective. It emphasizes the role of religion in American history and how early America was linked to England's history and culture and includes incisive portraits of Andrew Jackson, Chief Justice Marshall, Clay, Lincoln, and Jefferson Davis. Johnson shows how Grover Cleveland and Teddy Roosevelt ushered in the age of big business and industry and how Woodrow Wilson revolutionized the government's role. He offers new views of Harding, Coolidge, and Hoover and of Franklin Roosevelt's New Deal and his role

as commander in chief during World War II. An examination of the unforeseen greatness of Harry Truman and reassessments of Eisenhower, Kennedy, Johnson, Nixon, Reagan, and Bush follow. "Compulsively readable," said *Foreign Affairs* of Johnson's unique narrative skills and sharp profiles of people. This is an in-depth portrait of a great people, from their fragile origins through their struggles for independence and nationhood, their heroic efforts and sacrifices to deal with the 'organic sin' of slavery and the preservation of the Union to its explosive economic growth and emergence as a world power and its sole superpower. Johnson discusses such contemporary topics as the politics of racism, education, Vietnam, the power of the press, political correctness, the growth of litigation, and the rising influence of women. He sees Americans as a problem-solving people and the story of America as "essentially one of difficulties being overcome by intelligence and skill, by faith and strength of purpose, by courage and persistence...Looking back on its past, and forward to its future, the auguries are that it will not disappoint humanity." This challenging narrative and interpretation of American history by the author of many distinguished historical works is sometimes controversial and always provocative.

Johnson's views of individuals, events, themes, and issues are original, critical, and admiring, for he is, above all, a strong believer in the history and the destiny of the American people. *Creating a Nation and a Society*, | Longman Publishing Group

In this book, David K. Levine questions the idea that behavioral economics is the answer to economic problems. He explores the successes and failures of contemporary economics both inside and outside the laboratory, and asks whether popular behavioral theories of psychological biases are solutions to the failures. The book not only provides an overview of popular behavioral theories and their history, but also gives the reader the tools for scrutinizing them.

Our past is changing. In all branches of American history, scholars and writers are going back to find the people missing from our history texts...the minorities, the women, the labourers, the not-so-famous creators of America. The history emerging from this intellectual energy is, like the nation itself, vital and democratic. It's also a history far more meaningful to today's students, a fact clearly demonstrated by the overwhelming popularity of the American people—the first major text to combine an exceptionally high level of scholarship with the new, more "democratic" view of history. Now this groundbreaking text is available in a brief edition.

Carefully abridged to preserve the widely-acclaimed balanced approach and distinctive voice of the full-length text.
