Der Tagungsband versammelt erstmals Beiträge internationaler AutorInnen zum Thema "Kunstgeschichte an Polytechniken, Technischen Hochschulen und Technischen Universitäten" im deutschen Sprachraum. Inhaltlich reicht der Bogen von der Frühzeit des Fachs zu Beginn des 19. Jahrhunderts bis zur Gegenwart. Kunstgeschichte ist ein Grundlagenfach für eine zeitgemäße Architekturausbildung. Angesichts ihrer zentralen Bedeutung überrascht es, dass die Geschichte, die Positionen und die Perspektiven des Fachs an den Polytechniken, an den Technischen Hochschulen und an den Technischen Universitäten bis heute unzureichend erforscht sind. Dies gilt für den Stellenwert im wissenschaftlichen Fachdiskurs, der in den letzten Jahrzehnten fast ausschließlich auf die universitäre Kunstgeschichte beschränkt blieb. Dies trifft ebenso für die besondere Rolle des Faches an den Architekturfakultäten zu. Im Tagungsband werden die Vergangenheit und Gegenwart der Kunstgeschichte im deutschsprachigen Raum untersucht und international kontextualisiert, um daraus Positionen für die Zukunft zu entwickeln: Was sind heute und was waren seit mehr als 150 Jahren die Aufgaben des Fachs an den genannten Institutionen, und was werden sie in Zukunft sein?

A world away in Belle Epoque Paris, Yi Jin lives a free, independent

life, away from the gilded cage of the court, and begins translating and publishing Joseon literature into French with another Korean student. But even in this new world, great sorrow awaits her. Betrayal, jealousy, and intrigue abound, culminating with the tragic assassination of the last Joseon empress—and the poisoned pages of a book. In times of climate change and public debt, a concern for intergenerational justice should lead us to have a closer look at theories of intergenerational justice. It should also press us to provide institutional design proposals to change the decision-making world that surrounds us. This book provides an exhaustive overview of the most important institutional proposals as well as a systematic and theoretical discussion of their respective features and advantages. It focuses on institutional proposals aimed at taking the interests of future generations more seriously, and does so from the perspective of applied political philosophy, being explicit about the underlying normative choices and the latest developments in the social sciences.

It provides citizens, activists, firms, charities, public authorities, policy analysts, students, and academics with the body of knowledge necessary to understand what our institutional options are and what they entail if we are concerned about today's excessive short-termism.

Between Germany and Russia is a region strewn with monuments to the horrors of war, genocide and disaster – the bloodlands where the murderous regimes of Hitler and Stalin unleashed the violence that scarred the twentieth century and shaped so much of the world we know today. In September 2016 the German-Iranian writer Navid Kermani set out to discover this land and to travel along the trenches that are now re-emerging in Europe, from his home in Cologne through eastern Germany to the Baltics, and from there south to the Caucasus and to Isfahan in Iran, the home of his parents. This beautifully written travel diary, enlivened by conversations with the people Kermani meets along the way, brings to life the tragic history of these troubled lands and shows how this history leaves its traces in the present. It will be of great interest to anyone concerned with current affairs and with the events that have shaped, and continue to shape, the world in which we live today.

This is the digital version of the printed book (Copyright © 2008). Adrenaline junkies, dead fish, project sluts, true believers, Lewis and Clark, template zombies . . . Most developers, testers, and managers on IT projects are pretty good at recognizing patterns of behavior and gut-level hunches, as in, “ I sense that this project is headed for disaster. ” But it has always been more difficult to transform these patterns and hunches into a usable form, something a team can debate, refine, and use. Until now. In Adrenaline Junkies and Template Zombies, the six principal consultants of The Atlantic Systems Guild present the patterns of behavior they most often observe at the dozens of IT firms they

transform each year, around the world. The result is a quick-read guide to identifying nearly ninety typical scenarios, drawing on a combined one-hundred-and-fifty years of project management experience. Project by project, you'll improve the accuracy of your hunches and your ability to act on them. The patterns are presented in an easy-reference format, with names designed to ease communication with your teammates. In just a few words, you can describe what's happening on your project. Citing the patterns of behavior can help you quickly move those above and below you to the next step on your project. You'll find classic patterns such as these: News Improvement Management by Mood Ring Piling On Rattle Yer Dags Natural Authority Food++ Fridge Door and more than eighty more! Not every pattern will be evident in your organization, and not every pattern is necessarily good or bad. However, you'll find many patterns that will apply to your current and future assignments, even in the most ambiguous circumstances. When you assess your situation and follow your next hunch, you'll have the collective wisdom of six world-class consultants at your side.

The International Symposium on Medical Data Analysis is an important - riodical opportunity to exchange ideas and first-hand experiences with groups interested in the medical applications of innovative hardware and software tools. The massive information available through continuous improvements in the various modeling approaches to Medical Data Analysis is reflected in the - sults, dealing with quite different topics, presented during the Third Edition of the Symposium (ISMDA 2002). They have been grouped into the following four categories: (1) Data Mining and Decision Support Systems; (2) Medical Informatics and Modeling; (3) Time-Series Analysis; and (4) Medical Imaging. In setting up the symposium program we tried to avoid, even with the sho- age of time, parallel sessions. Thus, all participants had the chance to catch all the oral presentations, and we hope that this third proceedings volume will extend this chance also to non-participants. As for the previous volumes, it c- tains extensive up-to-date chapters on Medical Data Analysis, packed with ideas, suggestions, and solutions to many problems typical of this field.
