Nefertari, the favorite

queen of Rameses II, was buried about 3,200 years ago in the most exquisitely decorated tomb in Egypt's Valley of the Queens. Discovered in 1904 by Italian explorer Ernesto Schiaparelli, the tomb had deteriorated to a disastrous extent when emergency consolidation began in 1986. The six-year conservation project of the GCI and the

Egyptian Antiquities Organization was completed in 1992. In this fascinating exploration of the tomb, John McDonald takes the reader through each chamber, describing the hieroglyphic messages depicted in the brilliant wall paintings and discussing the images within the context of Egyptian beliefs. He also offers insights into the life of Nefertari, the development and symbolism of royal tombs, and the construction and decoration of the tombs. House of Eternity is illustrated with historic black-and-white images and more recent color photographs that reveal the vibrant beauty of the wall paintings. In November 1995 the tomb was reopened to the

public. Because of the potential for damage and deterioration to the fragile wall paintings caused by increased humidity, carbon dioxide, and microbiological activity introduced by visitors to the tomb, the number permitted to enter daily is strictly controlled by the Egyptian authorities. This book results from a desire of the GCI to enrich visitors' experience by providing a detailed descriptive walk-through of the tomb while conveying a strong message regarding the need for conservation and continuous monitoring to ensure the long-term survival of the tomb's paintings. Visitors to the tomb and the armchair traveler alike will find House of Eternity to be an

excellent resource for understanding Nefertari's journey to the afterlife and for appreciating the extraordinary depictions of that journey on the walls of Nefertari's tomb.

In this lyrical, exuberant tale, acclaimed Turkish author Elif Shafak, author of *The Island of Missing Trees* (a Reese's Book Club Pick), incarnates Rumi's timeless message of love. *The Forty Rules of Love* unfolds two tantalizing parallel narratives—one contemporary and the other set in the thirteenth century, when Rumi encountered his spiritual mentor, the whirling dervish known as Shams of Tabriz—that together explore the enduring power of Rumi's work. Ella Rubenstein is forty years old and unhappily married when she takes a job as a reader for a literary agent. Her first assignment is to read and report on *Sweet Blasphemy*, a novel

written by a man named Aziz Zahara. Ella is mesmerized by his tale of Shams's search for Rumi and the dervish's role in transforming the successful but unhappy cleric into a committed mystic, passionate poet, and advocate of love. She is also taken with Shams's lessons, or rules, that offer insight into an ancient philosophy based on the unity of all people and religions, and the presence of love in each and every one of us. As she reads on, she realizes that Rumi's story mirrors her own and that Zahara—like Shams—has come to set her free.

Concepts of Biology is designed
for the single-semester
introduction to biology course
for non-science majors, which
for many students is their only

college-level science course. As
such, this course represents an
important opportunity for
students to develop the
necessary knowledge, tools, and
skills to make informed
decisions as they continue with
their lives. Rather than being
mired down with facts and
vocabulary, the typical non-
science major student needs
information presented in a way
that is easy to read and
understand. Even more
importantly, the content should
be meaningful. Students do
much better when they
understand why biology is
relevant to their everyday lives.
For these reasons, Concepts of
Biology is grounded on an
evolutionary basis and includes
exciting features that highlight
careers in the biological sciences
and everyday applications of the
concepts at hand. We also strive
to show the interconnectedness
of topics within this extremely
broad discipline. In order to
meet the needs of today's

instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

5 Chairs 5 Choices Harper Collins

This study examines aspects of Seth which suggest that throughout Egyptian history he was continually worshipped and indeed, at times, enjoyed some prominence, notably in the Pre- and early-Dynastic periods, during the Hyksos interlude of the Second Intermediate Period and during the Ramesside era of the 19th and 20th Dynasties. Whilst previous authors have devoted some scholarship to these various aspects of Seth there have been very few attempts to bring all these together and to demonstrate that rather than being something of an outsider' to the Egyptian pantheon, he actually had an important role within it, and as such was continually worshipped throughout ancient Egyptian

history. In sum, the author examines the role of Seth as he was perceived by the Ancient Egyptians at specific times throughout their history. To achieve this aim a chronological approach is taken beginning with Seth's role in Predynastic Egyptian religion and then progressing through the early Dynastic and Old Kingdom, the First Intermediate period and the Middle Kingdom, the Second Intermediate Period, the New Kingdom, the Third Intermediate Period, the Late Period, and culminating with the Graeco-Roman Period up to the death of Cleopatra."
