Choose a colored pencil, pen, or marker and start coloring the kaleidoscope patterns of these unique ice crystal snowflakes! These 25 original designs are detailed and somewhat complex, drawn with fine lines, and each has its own unique look and feel. These aren't your common white snowflakes - they want COLOR! Each design was hand-drawn with a stylus and a drawing tablet, and was inspired by creative

impulses and a love of snowflakes and winter. Some designs are large, single snowflakes, others are patterns or interesting groupings, and they are all printed one-sided. Coloring is fun no matter what your age. It's also a wonderful way to relax and release stress. You can color these snowflakes anytime - over the winter holidays, or in the middle of summer when the weather is too hot!

Koichi Shinohara traces the evolution of Esoteric Buddhist rituals from the simple recitation of spells in the fifth century to complex systems involving image worship, mandala initiation, and visualization practices in the ninth century. He presents an important new reading of a seventh-century Chinese text called the Collected Dharani Sutras, which shows how earlier rituals for specific deities were synthesized into a general Esoteric initiation ceremony and how, for the first time, the notion of an Esoteric Buddhist pantheon emerged. In the Collected Dharani Sutras, rituals for specific

deities were typically performed around images of the deities, yet Esoteric Buddhist rituals in earlier sources involved the recitation of spells rather than the use of images. The first part of this study explores how such simpler rituals came to be associated with the images of specific deities and ultimately gave rise to the general Esoteric initiation ceremony described in the crucial example of the All-Gathering mandala ritual in the Collected Dharani Sutras. The visualization practices so important to later Esoteric Buddhist rituals were absent from this ceremony, and their introduction would

fundamentally change Esoteric Buddhist practice. This study examines the translations of dharani sutras made by Bodhiruci in the early eighth century and later Esoteric texts, such as Yixing's commentary on the Mahavairocana sutra and Amoghavajra's ritual manuals, to show how incorporation of visualization greatly enriched Esoteric rituals and helped develop elaborate iconographies for the deities. Over time, the ritual function of images became less certain, and the emphasis shifted toward visualization. This study clarifies the complex relationship between images

and ritual, changing how we perceive Esoteric Buddhist art as well as ritual.

Every day millions of Tamil women in southeast India wake up before dawn to create a kolam, an ephemeral ritual design made with rice flour, on the thresholds of homes, businesses and temples. This thousand-year-old ritual welcomes and honors Lakshmi, the goddess of wealth and alertness, and Bhudevi, the goddess of the earth. Created by hand with great skill, artistry, and

mathematical precision, the kolam disappears in a few hours, borne away by passing footsteps and hungry insects. This is the first comprehensive study of the kolam in the English language. It examines its significance in historical, mathematical, ecological, anthropological, and literary contexts. The culmination of Vijaya Nagarajan's many years of research and writing on this exacting ritual practice, *Feeding a Thousand Souls* celebrates the experiences, thoughts, and voices of the Tamil women who keep this

tradition alive.

This book contains most of the papers presented in the Eco-Architecture 2010 conference, which was the third edition of the International Conference on Harmonisation between Architecture and Nature. Previous editions, that were very successful were held previously in the New Forest,

UK, in 2006 and the Algarve, Portugal in 2008 and demonstrated the importance of a forum like this to discuss the characteristics and challenges of such architectural vision. Eco-Architecture implies a new approach to the design process intended to harmonise its products with nature. This involves ideas such as minimum use of energy at each stage of the building process, taking into account the amount required during the extraction and transportation of materials, their fabrication, assembly, building erection, maintenance and eventual future recycling.

Presentations in the conference were related to topics like building technologies, design by passive systems, design with nature, ecological and cultural sensitivity, life cycle assessment, quantifying sustainability in architecture, resources and rehabilitation, and issues from education, research and practice. Case studies from different places around the world were also presented.

In the third book of the Shining the Light series, the focus shifts from the dastardly deeds of the secret government to humanity's role in creation. Earth receives unprecedented aid from Creator and cosmic councils, who recently lifted us beyond the third

dimension to avert a great catastrophe. Humanity begins to learn to render the sinister secret government powerless by being the light that we are. Earth becomes a member of the Council of Planets, and the universe time-shifts to preserve the Explorer Race. Source information shines the light of truth on: Photos of beings, portals, and holes in time and space Sinister secret government (mining on Hopi land, technology, terrorist activity, being forced to move, and more) Military resistance to global power

The author investigates eighth- to seventeenth-century paintings from three traditions: Esoteric Buddhism, Pure Land

Buddhism, and the kami-worshipping (Shinto) tradition. It is generally recognized that many of these mandalas are connected with texts and images from India and the Himalayas. A pioneering theme of this study is that, in addition to the South Asian connections, certain paradigmatic Japanese mandalas reflect pre-Buddhist Chinese concepts, including geographical concepts. In convincing and lucid prose, ten Grotenhuis chronicles an intermingling of visual, doctrinal, ritual, and literary elements in these mandalas that has come to be seen as

characteristic of the Japanese religious tradition as a whole. This beautifully illustrated work begins in the first millennium B.C.E. in China with an introduction to the Book of Documents and ends in present-day Japan at the sacred site of Kumano. Ten Grotenhuis focuses on the Diamond and Womb World mandalas of Esoteric Buddhist tradition, on the Taima mandala and other related mandalas from the Pure Land Buddhist tradition, and on mandalas associated with the kami-worshipping sites of Kasuga and Kumano. She identifies

specific sacred places in Japan with sacred places in India and with Buddhist cosmic diagrams. Through these identifications, the realm of the buddhas is identified with the realms of the kami and of human beings, and Japanese geographical areas are identified with Buddhist sacred geography. Explaining why certain fundamental Japanese mandalas look the way they do and how certain visual forms came to embody the sacred, ten Grotenhuis presents works that show a complex mixture of Indian Buddhist elements, pre-Buddhist Chinese elements,

Chinese Buddhist elements, and indigenous Japanese elements.

Mandalas are concentric and symmetrical diagrams. They are a map of the inner structure of the world and also of the dynamics of development in it. They can be very simple like the circle of the four elements with the quintessence in their center, but they can also be very complex with many rings,

transitions, directions and a center. Sometimes mandalas are also depicted as a city on a hill, through which one can reach the center by various paths, climbing stairs and passing through gates, where one is tested by guards, has to dare a transformation, meets unknown beings, and so on. These mandalas also serve to order the world, but their greatest benefit is their healing capacity, because with their help one can explore one's own psyche, find in them one's own power animal, power plant and

power stone, meet one's own soul, recognize one's own patron deity ... and much more ... The journey into a mandala can be a great adventure, by which one is greatly enriched.

Ellora is one of the great cave temple sites of India, with thirty-four major Buddhist, Hindu, and Jain monuments of the late sixth to tenth centuries A. D. This book describes the Buddhist caves at Ellora and places them in the context of Buddhist art and iconography. Ellora's twelve Buddhist cave temples, dating from the early seventh to the early eighth centuries, preserve an unparalleled one-hundred-year sequence of

architectural and iconographical development. They reveal the evolution of a Buddhist mandala at sites in other regions often considered "peripheral" to the heartland of Buddhism in eastern India. At Ellora, the mandala, ordinarily conceived as a two-dimensional diagram used to focus meditation, is unfolded into the three-dimensional program of the cave temples themselves, enabling devotees to walk through the mandala during worship. The mandala's development at

Ellora is explained and its significance is considered for the evolution of Buddhist art and iconography elsewhere in India.
