During his lifetime, W.E. Blatz was so much occupied with the development of the University of Toronto's Institute of Child Study that he was able to devote little time to writing. This is his first book to appear in twenty-one years, and his first complete exposition of his famous Theory of Security. The Theory of Security is radically different from the theories promulgated by Freudian psychologists. Whereas Freudian personality theory is based on the notion of "unconscious," an entity that is only indirectly observable, the Theory of Security derives from the observation of the conscious state in all its manifestations. Dr. Blatz thus makes use of both empirical observations and the results of introspection, and, as might be expected, some of his conclusions run counter to those reached in much current psychological discussion. But proof of the forcible influence of the theory and its author may be found in the impressive number of books and articles already published by Dr. Blatz's associates at the Institute of Child Study, applying the theory to the practical problems of psychological observation and therapy. It is fitting that the man whose work has generated so much fruitful research by others in this field should at last have set down in book form the fundamental principles that guided them.

Winston Churchill's superlative account of the prelude to and events of the First World War is a defining work of 20th-century history. With dramatic narrative power, Churchill reconstructs the action on the Western and Eastern Fronts, the wars at sea and in the air, and the advent of tanks and U-boats. Rich with personal insights, the first part of Churchill's magisterial book covers the years 1911-1914 and includes Ireland and the European balance, the mobilization of the Navy, the invasion of France, and Turkey and the Balkans.

In this fourth edition of 'Field Essays' we explore the specific decolonial and tactile research approach in the work of Paris-based design-duo dach&zephir. Convinced of the symbolic act of transmission and the gestures objects convey they zoom into the historic making of identity.00'Field Essays'' centrifugal node Sophie Krier follows upon their ongoing research ' É loge Cr é ole, Chapitre 2, Escale 1' in which they interweave creole histories and archival footage from the island of Martinique. Krier invited writer and curator Lucy Cotter to reflect on the ethics of cultural exchange and how the unknown in collaborative making might generate new ways of thinking. The art historian Thomas Golsenne was also invited to analyse their work through the lens of 'Bricologie', the (non)science of mending and re-composing. From the island's perspective, the Martiniquansociologist and poet Andr é Lucr é ce speaks about the lasting (mental) hierarchies that persist to this day.

Originally published in 1986, and bringing together essays written over a 10 year period, this volume offers a coherent and challenging interpretation of the German past. The book argues that the German Empire between 1914 and 1918 may have enjoyed greater stability and cohesion than is often assumed. It suggests that Imperial Germany ' s political institutions showed considerable flexibility and capacity for growth and puts forward the idea that without WWI, or in the event of a German victory, the Empire might well have demonstrated its viability as a modern state. In that case, the origins of fascism should be sought mainly in the subsequent experiences of war, revolution and economic crisis and not so much in the Empire ' s so-called structural backwardness.

This edition of the World Bank has been revised and expanded by the Terminology Unit in the Languages Services Division of the World Bank in collaboration with the English, Spanish, and

French Translation Sections. The Glossary is intended to assist the Bank's translators and interpreters, other Bank staff using French and Spanish in their work, and free-lance translator's and interpreters employed by the Bank. For this reason, the Glossary contains not only financial and economic terminology and terms relating to the Bank's procedures and practices, but also terms that frequently occur in Bank documents, and others for which the Bank has a preferred equivalent. Although many of these terms, relating to such fields as agriculture, education, energy, housing, law, technology, and transportation, could be found in other sources, they have been assembled here for ease of reference. A list of acronyms occurring frequently in Bank texts (the terms to which they refer being found in the Glossary) and a list of international, regional, and national organizations will be found at the end of the Glossary.
