Algo est secrétaire général de l'obédience de la stricte observance de l'arithmologie. C'est au cours d'une conférence qu'il rencontre Numa, étudiante kenyane, profitant du programme Erasmus. Coup de foudre réciproque. Numa repart au Kenya en famille pour les vacances. Algo en état de burn out pérégrine dans le sud de la France. Ils s'écrivent...

L'organisation c'é leste selon Ptolé m'é e, ou essai de physiologie universelle. Destruction du syst è me de l' é cole moderne ... Solution de toutes les questions politiques, physiologiques, morales et religieuses ... Solution de la question d'Orient BoD - Books on Demand
In this collection of interpretative essays on Flavius Philostratus (TM) "Vita Apollonii," leading scholars and younger critics make for a combination of methodological continuity and innovation. The wide range of approaches does justice to the texta (TM)s high level of literary, historical and philosophical-religious sophistication.

Origine de tous les cultes ou religion universelle BRILL

Panth é e presents a collective reflection relating to the changes affecting the Graeco-Roman Empire and its religious landscapes. Leading specialists construct a picture of practices and conceptual frames, which, in their diversity and inter-action, model a religious universe whose complexity will help understand our modern globalising world. Panth é e propose une r é flexion sur les mutations qui ont affect é l'Empire gr é co-romain et ont remodel é ses paysages religieux. Les meilleurs sp é cialistes construisent un tableau des pratiques et des cadres de pens é e qui dessinent les contours d'un univers religieux dont la complexité aide à penser le monde moderne de la globalisation.

The Idea of Semitic Monotheism examines some major aspects of the scholarly study of religion in the long nineteenth century--from the Enlightenment to the First World War. It aims to understand the new status of Judaism and Islam in the formative period of the new discipline. Guy G. Stroumsa focuses on the concept of Semitic monotheism, a concept developed by Ernest Renan around the mid-nineteenth century on the basis of the postulated and highly problematic contradistinction between Aryan and Semitic families of peoples, cultures, and religions. This contradistinction grew from the Western discovery of Sanskrit and its relationship with European languages, at the time of the Enlightenment and Romanticism. Together with the rise of scholarly Orientalism, this discovery offered new perspectives on the East, as a consequence of which the Near East was demoted from its traditional status as the locus of the Biblical revelations. This innovative work studies a central issue in the modern study of religion. Doing so, however, it emphasizes the new dualistic taxonomy of religions had major consequences and sheds new light on the roots of European attitudes to Jews and Muslims in the twentieth century, up to the present day.

Revue historique Oxford University Press

Présenter en aperçu l'histoire de ce grand mouvement de l'esprit humain qui nous éleva graduellement de la magie et de l'astrologie à la science moderne, tel est le but de ce petit ouvrage. On a écrit déjà plusieurs fois l'histoire de la magie. Les uns ont cherché dans l'ensemble de ces croyances chimériques des preuves à l'appui de leur solidité; les autres n'ont voulu que nous inspirer un profond dédain pour tant de folies et d'absurdités; nul n'a songé à tirer de la comparaison des faits un enseignement réellement philosophique, et à marquer les différentes phases par lesquelles a passé une science qui, toute chimérique qu'elle est, a été cependant le début nécessaire des grandes découvertes qui devaient en ruiner les fondements. Je tenterai de le faire. J'aurais pu accumuler bien des témoignages et grossir ce volume d'une foule de détails intéressants; mais j'ai voulu me borner à indiquer la voie qu'a suivi l'esprit humain, et je n'ai demandé à mes lectures que les citations indispensables à la démonstration de la vérité. (A. Maury)

Histoire du Perche BRILL

This collection of articles illustrates the intimacy between science and literature, pleasure and sense, excess and moderation that Jean Ceard sought to understand and that he instilled in those who collaborated or studied with him. Readers will discover a cornucopia of scientific joys, drawn from the fields that Jean Ceard explored throughout his career (literature, philosophy, natural sciences, theology, poetry, translation). These seventy-two articles on Renaissance culture bear witness to the intellectual generosity and curiosity of one of the periods most eminent historians."

Application de la géographie à l'histoire ou étude élémentaire de géographie et d'histoire générales comparées BRILL

This book reconstructs the pre-Julian calendar of Rome on the basis of epigraphical and literary evidence, and analyzes its relation to the solar and lunar years. Mrs. Michels shows how the varied contents of the calendar were related to the political as well as to the religious life of Rome of the first century B.C. She traces the history of the calendar back to the fifth century, indicating the stages by which a single list of festivals may have developed into the complex document of the late republic. The Roman method of intercalation, the character of the days, and the history of the trinum nundinum are presented in appendices. Originally published in 1967. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Encyclopedie Theologique, ou Serie de Dictionnaires sur toutes les parties de la Science Religieuse ... publiee par M. l'Abbe Migne (etc.) Librinova

In the summer of 2002 the third international conference on the medieval chronicle was held, again in the vicinity of Utrecht, the Netherlands. There are several reasons why the chronicle is particularly suited as the topic of an international conference. In the first place there is its ubiquity: all over Europe and throughout the Middle Ages chronicles were written, both in Latin

and in the vernacular, and not only in Europe but also in the countries neighbouring on it, like those of the Arabic world. Secondly, all chronicles raise such questions as by whom, for whom, or for what purpose were they written, how do they reconstruct the past, what determined the choice of verse or prose, or what kind of literary influences are discernable in them. Finally, many chronicles have been beautifully illuminated, and the relation between text and image leads to a wholly different set of questions. This third volume of conference papers again aims to provide a representative survey of the on-going research in the field of chronicle studies, illustrated by examples from specific chronicles from a wide variety of countries, periods and cultural backgrounds.
