In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney 's films and music function as a tool of the Western elite

that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad,

and the best way forward.

Yellow Crocodiles and Blue Oranges Prima Lifestyles
This collection brings together artists and theoreticians to provide the first anthology of a new field: Practical Aesthetics. A work of art already contains its own criticism, a knowledge of its own which need not be conceptual or propositional. Yet today, there are many approaches to different forms of art that work on the brink between science and art, 'sensible cognition' and proposition, aesthetic knowledge and rational

knowledge, while thinking with art (or the artistic material) rather than about it. This volume presents ways of thinking with different forms of art (film, sound, dance, literature, etc), as well as new forms of aesthetic research and presentation such as Media Philosophy, the audiovisual essay, fictocriticism, the audio paper, and Artistic Research. It reveals how writing about art can become 'artistic' or 'poetic' in its own right: not only writing about artistic effects, but producing them in the first place. This takes art not as an object of (external) analysis, but as a subject with a knowledge in its own right, creating a co-composing 'conceptual interference pattern' between theory and practice. A 'practical aesthetics' thus understood, can be described as thinking with art, in order to find new ways to create worlds and thus

to make the world perceivable in different ways.

These are uncertain times in Latin America. Popular faith in democracy has been shaken; traditional political parties and institutions are stagnating, and there is a growing right-wing extremism overtaking some governments. Yet, in recent years, autonomous social movements have multiplied and thrived. This book presents voices of these movement

protagonists themselves, as they describe the major issues, conflicts, and campaigns for social justice in Latin America today. Latin America Bureau, a London-based, independent organization providing news and analysis on the region, spoke to people from fourteen countries, from Mexico to the Southern Cone. The book captures the voices indigenous activists, fighting oil drilling in their homelands; mothers from favelas seeking justice for their children killed by police; opponents of large-scale mining projects; independent journalists working, at great personal risk, to expose corruption and human rights violations; women and LGBT people confronting violence and discrimination; and students demanding their right to a free, universal and high-quality education system. Though their locations and causes are disparate, these people and their movements share learning and activism, and their cooperation helps to link the movements across national borders. Voices of Latin America is essential reading for students, travelers,

journalists—anyone with an interest in social justice movements in Latin America.

How one man's mid-career crisis turned into an odyssey into the weirder side of American life. Like most of us, Geoff Steward was rocked by 2016's litany of horrors. Unlike most of us, Geoff did something about it. Turning his back on his day job as a lawyer - and the requirement to account for every six minutes of his time - Geoff set off across America in hot pursuit of bears, honky-tonk bars and, above all, nice Americans to restore his faith in the world. Armed only with his blend of waspish wit and mischievous charm, Geoff roamed from New York to Alaska, meeting ordinary Americans such as Joe le Taxi, the former NYPD police officer who was one of the first on the scene at the Twin Towers; Pam and Bob, a paranoid psychiatrist and a failed actor who once saw the back of Meryl Streep's head; and Sheriff Duke of Calhoun County, who reintroduced Geoff to the long (and armed) arm of the law. For anyone at a crossroads, contemplating a temporary or permanent career break, this hilarious travel romp offers a new hope.

The rock era is over, according to one pop music expert. Another laments that rock music is "metamorphosed into the musical wallpaper of ten thousand lifts, hotel foyers, shopping centers, airport lounges, and television advertisements that await us in the 1990s." Whatever its current role and significance in Anglo-American society, popular music has been and remains a tremendous social and cultural force in many parts of the world. This book explores the connections between popular music genres and politics in Southeast Asia, with particular emphasis on Indonesia, the Philippines, Thailand, Malaysia, and Singapore.
