"The Council of Nicaea in 325 AD marked the beginning of a new era in Christianity. For the first time, doctrines were organized into a single creed. The Nicene and Post-Nicene Fathers did most of their writing during and after this important event in Church history. Unlike the previous era of Christian writing, the Nicene and Post-Nicene era is dominated by a few very important and prolific writers. In Volume III of the 14-volume collected writings of the Nicenes and Post-Nicenes (first published between 1886 and 1889), readers will find a complete collection of Saint Augustines writings concerning Christian doctrine and ethics. On the Holy Trinity is one of his most important works, and Augustine spent a significant amount of time crafting it. Among the ethical considerations covered in the second half of the book readers will find essays on virginity, lying, patience, and proper care for the dead."

The Dialectic of Essence offers a systematic new account of Plato's metaphysics. Allan Silverman argues that the best way to make sense of the metaphysics as a whole is to examine carefully what Plato says about ousia (essence) from the Meno through the middle period dialogues, the Phaedo and the Republic, and into several late dialogues including the Parmenides, the Sophist, the Philebus, and the Timaeus. This book focuses on three fundamental facets of the metaphysics: the theory of Forms; the nature of particulars; and Plato's understanding of the nature of metaphysical inquiry. Silverman seeks to show how Plato conceives of "Being" as a unique way in which an essence is related to a Form. Conversely, partaking ("having") is the way in which a material particular is related to its properties: Particulars, thus, in an important sense lack essence. Additionally, the author closely analyzes Plato's idea that the relation between Forms and particulars is mediated by form-copies. Even when some late dialogues provide a richer account of particulars, Silverman maintains that particulars are still denied essence. Indeed, with the Timaeus's introduction of the receptacle, there are no particulars of the traditional variety. This book cogently demonstrates that when we understand that Plato's concern with essence lies at the root of his metaphysics, we are better equipped to find our way through the labyrinth of his dialogues and to better appreciate how they form a coherent theory.

This book provides a new approach to the intersections between music and philosophy. It features articles that rethink the concepts of musical work and performance from ontological and epistemological perspectives and discuss issues of performing practices that involve the performer 's and listener 's perceptions. In philosophy, the notion of essence has enjoyed a renaissance. However, in the humanities in general, it is still viewed with suspicion. This collection examines the ideas of essence and context as they apply to music. A common concern when thinking of music in terms of essence is the plurality of music. There is also the worry that thinking in terms of essence might be an overly conservative way of imposing fixity on something that evolves. Some contend that we must take into account the varying historical and cultural contexts of music, and that the idea of an essence of music is therefore a fantasy. This book puts forward an innovative approach that effectively addresses these concerns. It shows that it is, in fact, possible to find commonalities among the many kinds of music. The coverage combines philosophical and musicological approaches with bioethics, biology, linguistics, communication theory, phenomenology, and cognitive science. The respective chapters, written by leading musicologists and philosophers, reconsider the fundamental essentialist and contextualist approaches to music creation and experience in light of twenty-first century paradigm shifts in music philosophy.

In an age where appearances are often substituted for what really is, deception and falsity for honesty and truth, this metaphysics book takes things 'as they actually are' and discovers that reality 'is' actuality (which as subsistent is God), that philosophical knowledge in its content is caused by what is known and is objectively true. It considers goodness and beauty, human existents as individual, relational units (e.g., the family), agents and goals, chance and evil. It is in contrast with Sartrean existentialism, process philosophy, linguistic analysis, phenomenology, hermeneutics, and deconstructionism.

Secured Credit drives economic activity. Under English Law it is possible to create security over almost any asset, but the law is widely considered to be unsatisfactory for several reasons, including a cumbersome registration system, a preoccupation with formalistic distinctions and the lack of clear and rationally-determined priority rules. Gerard McCormack examines the current state of English law highlighting its weaknesses. He uses Article 9 of the American Uniform Commercial Code as a reference point: this Article has successfully serviced the world's largest economy for over 40 years and is increasingly used as the basis for legislation by Commonwealth jurisdictions including Canada and New Zealand. The Law Commission has suggested the enactment of similar legislation in England. In addition, McCormack considers if there really is a case for the priority of secured credit, as well as if there are other international models to draw upon. Contains the text of Article 9.

H.P. Grice is a distinguished philosopher predominantly known for his influential contributions to the philosophy of language, but that is only one strand in a rich tapestry of ideas bearing on the philosophy of mind, ethics, and metaphysics as well. Some of the essays in this collection of original papers by leading philosophers edited by Grandy and Warner develop Grice's earlier work in the philosophy of language, but most of them discuss or present his newer and less-known work. Together they demonstrate the unified and powerful character of his thoughts on being, mind, meaning, and morals. An introductory essay provides some of the first overview of Grice's thought, and makes explicit some of the relations among the essays.

"Romantic love is a defining phenomenon in human existence, and an object of heightened interest for literature, art, popular culture, and psychology. But what is romantic love and why is it typically experienced as so significant to our existence? Using central ideas from the philosophy of S2ren Kierkegaard as well as engaging with contemporary discussions in the philosophy of love, this book explores the nature of romantic love and philosophically substantiates its meaningfulness to an individual's life. It does so by developing a connection between love and selfhood, here

explained in terms of one's distinct individuality. To be a self, it is claimed, is to possess a 'name,' that is, an individual essence. Further, the book argues, it is when we love that we regard people by their names; we respond to who they (truly) are. Accordingly, the idea anchoring the book is that love is a correspondence between essences: if Jane loves Edward, she responds to him being 'who he is,' by virtue of her being 'who she is.' The conception of being thus correspondent has important implications as to the moral and spiritual value of romantic love. Relying on Kierkegaard's analysis of the self, of faith, and of love - even if sometimes in a way that departs from Kierkegaard's explicit position - the book explores these implications. By doing this, it construes romantic love as a desirable phenomenon, emotionally, morally, and spiritually"
