Perspectives in Life Cycle Impact Assessment

Oxford Handbooks

Perspectives in Life Cycle Impact Assessment: A Structured Approach to Combine Models of the Technosphere, Ecosphere, and Valuesphere presents a proposal for a second generation framework and method for Life Cycle Impact

Assessment. Many of the suggested elements are either based on other tools for environmental analysis, e.g. risk assessment, or fit in well with tools and concepts such as industrial ecology, technology assessment, or environmental impact assessment. The research presented in this book goes beyond the scope of presently used methods for Life Cycle Assessment and may stimulate new developments in a variety of areas.

Mediation is a very old practice that has been reborn to meet the needs of the contemporary world. It is thus increasingly present in today's societies. This book presents the theoretical foundations of mediation, as well as the way in which teachers and researchers in Information and Communication Sciences (ICS) have taken up this concept. Whether it is communicational, informational, cultural, organizational or societal, mediation belongs to a field of research, instituted by ICS, which sees in it a process of overcoming conflict, restoring communication and deconstructing social connections. Mediation: A Concept for Information and Communication Sciences inaugurates this set through its contribution to a state of the art of the theory

and concepts used by the ICS community. It is addressed to teachers, researchers and students, as well as information professionals wishing to think about their daily practice.

Businesses are incorporating automated processes and information technology, as cost cutters or productivity boosters, into their business strategy now more than ever. However, as information systems (IS) research is further focusing on IS strategy, as well as advancing business strategy research, there is a need to examine the increasing integration of technology and

automation through a clear framework. **Informing View of Organization** is such a framework. **Informing View of Organization: Strategic Perspective** features coverage on a wide range of topics such as group informatics, infoprocesses, and big data. This book is ideally designed for academics, students, managers, information technology professionals, computer engineers, programmers, and researchers interested in organization-technology interaction.

While traditional in its coverage of the major research traditions that have developed over the past 100 years, **Organizational Communication** is the first textbook in the field that is written from a critical perspective while providing a comprehensive survey of theory and research in organizational communication. Extensively updated and incorporating relevant current events, the Second Edition familiarizes students with the field of organizational communication—historically, conceptually, and practically—and challenges them to critically reflect on their common sense understandings of work and organizations, preparing them for participation in 21st-century organizational settings. Discourse Perspectives on Organizational Communication Taylor & Francis

This title was first published in 2002: This text is concerned with the role of corporate reporting in UK public limited companies. It is a common assumption that the most significant part of any corporate report is the

accounting information contained within. This book, however, takes a different view. The central argument is that the purpose of corporate reporting has changed from one primarily of stewardship and accountability to shareholders to a more outward- and forward-looking perspective. The author argues that one of the driving forces for this change in orientation is the discourse of environmental accounting, along with other forces. The book is essentially explorative. The author is concerned with looking at different aspects of the changes in corporate reporting and taking different perspectives in the development of the argument.

Engaging Organizational Communication Theory and Research

Routledge

The field of corporate communications describes the practices organizations use to communicate as coherent corporate 'bodies'. Drawing on the metaphor of the body and on a variety of theories and disciplines the text challenges the idealized notion that organizations can and should communicate as unified wholes. The authors pose important questions such as: - Where does the central idea of corporate communications come from? - What are the underlying assumptions of most corporate communications practices? - What are the organizational and ethical challenges of attempting truly 'corporate' communication? Clearly written with international vignettes and executive briefings, this book shows that in a complex world the management of communication needs to embrace multiple opinions and voices. Rewarding readers with a deeper understanding of corporate communications, the text will be a 'must read' for advanced undergraduates, graduate students, and scholars, in the arenas of corporate communications, organizational communication, employee relations, marketing, public relations and corporate identity management. Practitioners in these areas will be provoked to re-examine their assumptions and habits.

Communication Yearbook 3 Routledge

The Dynamics of Transitional Justice draws on the case of East Timor in order to reassess how transitional justice mechanisms actually play out at the local level. Transitional justice mechanisms - including trials and truth commissions - have become firmly entrenched as part of the United Nations

'tool-kit' for successful post-conflict recovery. It is now commonly assumed that by establishing individual accountability for human rights violations, and initiating truth-seeking and reconciliation programs, individuals and societies will be assisted to 'come to terms' with the violent past and states will make the 'transition' to peaceful, stable liberal democracies. Set against the backdrop of East Timor's referendum and the widespread violence of 1999, this book interrogates the gap between the official claims made for transitional justice and local expectations. Drawing on a wide range of sources, including extensive in-depth interviews with victims/survivors, community leaders and other actors, it produces a nuanced and critical account of the complex interplay between internationally-sponsored trials and truth commissions, national justice agendas and local priorities. The Dynamics of Transitional Justice fills a significant gap in the existing social science literature on transitional justice, and offers new insights for researchers and practitioners alike.

Although literature on corporate social responsibility is vast, research into the use and effectiveness of various communications through digital platforms about such corporate responsibility is scarce. This gap is surprising; communicating about corporate social responsibility initiatives is vital to organizations that increasingly highlight their corporate social responsibility initiatives to position their corporate brands for both consumers and other stakeholders. Yet these organizations still sometimes rely on traditional methods to communicate, or even decide against communicating at all, because they fear triggering stakeholders' skepticism or cynicism. A systematic, interdisciplinary examination of corporate social responsibility communication through digital platforms therefore is necessary, to establish an essential definition and up-to-date picture of the field. This research anthology addresses the above objectives. Drawing on marketing, management, and communication disciplines, among others, this anthology examines how organizations construct, implement, and use digital platforms to communicate about their corporate social responsibility and thereby achieve their organizational goals. The 21 chapters in this anthology

reflect six main topic sections: Challenges and opportunities for communicating corporate social responsibility through digital platforms. Moving toward symmetry and interactivity in digital corporate social responsibility communication. Fostering stakeholder engagement in and through digital corporate social responsibility communication. Leveraging effective digital corporate social responsibility communication. Digital activism and corporate social responsibility. Digital methodologies and corporate social responsibility.

Communication as Organizing Presses Univ. Septentrion

This title examines how contemporary currents in sociology and social theory have influenced the field of organisation studies. It aims to combat the tendency towards myopia in the organisation studies field, which encourages reliance on resources and references drawn from within the field and discourages scholars from going beyond these boundaries to find inspiration and ideas. The contributing authors show how sociologists and sociological concepts from the US and Europe have provided new insights into the functioning of organisations.
